# U.S., Soviet Agree On Talks Format For Geneva Meeting

By Lou Cannon

WASHINGTON - U.S. and Soviet diplomats have agreed on a preliminary format for a Geneva ummit meeting, which President Ronald Reagan intends to use partly as a forum to forcefully question Soviet military and human rights policies, a senior Reagan administration official said.

Mr. Reagan and the Soviet lead-er. Mikhail S. Gorbachev, are to meet Nov. 19 and 20. A U.S. official who discussed preparations for the Geneva meeting said Saturday that the two leaders would hold a

# ¥14 Killed In Attacks In Sri Lanka

COLOMBO, Sri Lanka - At least 14 persons, including five po-licemen, were killed in the northern town of Vavuniya when Tamil guerrillas attacked a police patrol and the police staged a reprisal as-sault, officials said.

The attack occurred Saturday, two days before the resumption of peace talks between Tamil separatists and the government. It was the most serious incident involving security forces since a June 18 ceasefire agreement between the government and the separatists.

None of the major guerrilla groups claimed responsibility for the attack, which was seen as an attempt to sabotage the next round of peace talks, which is to begin Monday in Thimpu, the capital of

A senior government official said that the rebels detonated a bomb in a tractor parked near the Vavuniya rail station as a police jeep drove by, then opened fire with guns.

One policeman died in the explosion and four were shot to death, the official said. Yavnniya residents said that the police then ade a reprisal assanti in a Tamil

aren, killing nine guerrillas. The official confirmed that there were nine dead in the second action. "Certainly there have been reprisals after this kind of attack,"

The guerrillas blew up buildings on a state farm and raided the main government office in the northern city of Jaffna, officials said, accord-

geles is the prime development contractor for the new aircraft. Northrop built and flew flyingwing military aircraft in the 1940s, but an air force plan to acquire large fleets of flying wings

was never achieved. Like the B-1, the Stealth bomber is designed to fly through ene-my air defenses and drop nuclear bombs. The B-1 would rely mostly on low-level flight and electronic jamming to evade detec-tion by defensive radars for as

long as possible. But a flying-wing Stealth bomber would take advantage of its thin profile and new, radar-absorbent structural materials to attract far less notice

The Pentagon has yet to disclose any cost figures for the Stealth bomber, which is officially called the Advanced Technology Bomber. Wall Street analysts estimate that Northrop has received \$1 billion annually from the Stealth program.

"By taking a more convention-ally designed airplane like the B-1, fundamental limitations exist as to how much you can do to reduce the radar signature," the air force officials wrote recently in a rare comment on the Stealth bomber. "Radar signature" is a term used by the military in reference to the detection of radar sig-

KAMPALA, Uganda — The government of Uganda, which took over after the overthrow of President Milton Obote on July 27, says it has freed more than 1,000 political detainees. It also has announced that peace talks would be held Tuesday in Tanzania with the country's main rebel group.

Lieutenant General Tito Okello, head of the ruling military council, said Saturday that a government delegation would hold talks with those "who do not want to join hands with the government," a ref-erence to the rebels of the National Resistance Army led by Yoweri Museveni, a former defense minis-

General Okello spoke to a crowd estimated at 50,000 at a ceremony in the central square of Kampala. He said that 1,203 detainees had been released.

He did not say where the talks would be held, but the independent Star newspaper said the conference would take place in Arusha, in northern Tanzania. The National Resistance Army had suggested Arusha as a possible site for the talks. There was no immediate response to the announcement from the resistance group.

The insurgents led by Mr. Museveni have been angry at the way General Okello set up a new administration after Mr. Obote was deposed. To date, the group had refused appeals to work with the military government and to attend peace talks originally scheduled for Monday in Kampala.

Paul Ssemogerere, minister of internal affairs, said the release of the detainees held under Mr. Obote's four-year rule was "only the first sign of a wind of change in the relations between the government and the people in Uganda in the field of human rights.

Mr. Ssemogerere said that, since the coup, about 100 members of the former regime's National Security Agency had been detained "and they are not being tortured." He said the agency under Mr.

Obote had "distinguished itself in committing atrocities against inno-cent people" but added that the government would not keep agents in custody "one day longer than is strictly necessary.

Among those freed was Professor Yoweri Kyesemiro, a former member of the Democratic Party of Mr. Ssemogerere. Mr. Kyesemiro was acquitted of charges of helping the rebel groups two and a half years ago but had been detained under Mr. Obote's security laws.

Western diplomats believe there had been at least 1,000 such detain-(Continued on Page 2, Col. 5)

# Pontiff, in Cameroon, Blames 'Unjust' Rule for Rioting in South Africa

YAOUNDE, Cameroon — Pope John Paul II said Sunday that the 'unjust situation" in South Africa was responsible for the bloody rioting by blacks in that country.

Racial separation is inadmissible," John Paul said in a statement issued by Joaquin Navarro Valls. the chief Vatican spokesman. The pope, on the fourth day of his trip to black Africa, appealed for an end to "every kind of discrimination" and for political freedom for

He also spoke about the recent violence in South Africa during his noon blessing after Mass. "New and bloody clashes," the pope said, departing from his prepared text, cause concern "over the whole of Africa Canala Cana

Africa as well as over the world." "May God take all these victims into his peace, may he inspire wisdom, just behavior, respect for hu-man dignity and a desire for peace to put an end without delay to all discrimination which is not worthy of man," John Paul said. His statement was issued as riot-

ing in black and Indian townships around Durban, South Africa, con-

tinued for a fifth day.

The pope "profoundly deplores that the unjust situation is fanning the different communities into bloody confrontation almost every day," the statement said.
John Paul celebrated Mass and

ordained 16 priests in Yaounde's central square, where hundreds of troops, riot police and plainclothesmen ringed a crowd estimated at more than 100,000. Thousands of others followed

the service on television in the city's 40 Roman Catholic churches. President Paul Biya and his wife, Jeanne-Irene, both Roman Catholics, led a throng of dignitaries at

### ■ Pope Offers Pact

E.J. Dionne Jr. of The New York Times reported Saturday from

The pope offered three African presidents what a Vatican official called "an implicit pact," promising Roman Catholic support in return for a respect for freedom, social justice and human life.

The pope delivered his message Saturday as he hopscotched across West and Central Africa, traveling 1,500 miles (about 2,400 kilometers) from Togo to the Ivory Coast and then to Cameroon's capital. He commented repeatedly on human rights and justice throughout a gru-

eling day of travel.
In Togo, where he ended a two-

PHOENIX, South Africa - Anwar Rum-

Later, on arriving in the Ivory Coast, he said, "I believe that most share my conviction that the future will not be happy or worthy of man unless the essential values of justice, freedom for persons and groups and a respect for life inspire

all of society's activity." When he reached Cameroon toward sunset, he told a large welcoming crowd, including President Biya, of his admiration for Cameroon's "tenacious will to develop its potential in a climate that harmonizes respect for groups, social justice and national unity."

"In all these speeches, the pope is offering the president an implicit pact," said Mr. Navarro, the Vatican spokesman. "He is saying that if they can guarantee three things -social liberty for individuals and groups, justice and a respect for life

— Catholics would collaborate in building up their countries."

In an address to priests and nuns in Yaounde on Saturday evening. John Paul warned the people of developing nations to be wary of the values of more technologically advanced societies, "where the religious sense weakens." He urged priests and nuns to guard against a return to paganis

It was one of the pope's most pointed comments on traditional African faith since his trip began

Thursday. The main purpose of the pope's five-hour stop in the Ivory Coast was to dedicate a cathedral for which he laid the cornerstone five years ago. The cathedral, in Abidjan, one of Africa's wealthiest cities, is said to have the largest seat-ing capacity of any Catholic church except St. Peter's Basilica in Rome. It is estimated to have cost \$10 million to \$15 million.

On Friday, John Paul, apparently disturbed by his visit to Togo's opulent presidential palace, broke his schedule to stop at a mud hut and speak with an impoverished woman about her life.

Mr. Navarro said later that the pope wanted to make clear that "he was aware of the two realities of exist side by side."

Greece Says It May Cancel F-16 Order

ATHENS (Reuters) — Greece says it may cancel an order for war-planes from the United States if the Pentagon continues to delay its

approval or the sate.

A government spokesman said Saturday that Greece could cancel its plans to buy 40 F-16 interceptors, built by General Dynamics Corp. A major factor in the Defense Department's delay it believed to be an American fear of a leak of Western technology to the Soviet Union, with

which Greece has been forging closer uses.

Greece announced last October that it planned to buy at least 40 of the F-16s for about \$1 billion, along with an equal number of jet fightestime:

U.S. Moves to Ban Food Preservative

WASHINGTON (LAT) — The U.S. Food and Drug Administration has proposed a ban on the use of six sulfite preservatives on fresh vegetables and fruits at restaurants and food markets.

The agency said Friday that the sulfites, used to keep lettuce and other salad ingredients looking fresh, have been associated with 13 deaths and 500 reports of adverse reactions since 1983. The ban would not affect other foods that contain the preservatives, including frozen potatoes, reafood dried faults wine and been

seafood, dried fruits, wine and beer.

An FDA spokesman said that sulfites posed no danger to most people, but cause reactions in up to a million sulfite-sensitive people, mostly

asthmatics. "Reactions range from nansea and diarrhea, to hives and shortness of breath, to fatal shock." the spokesman said. Jeffrey R.

Prince, a director of the National Association of Restaurants, said that

### A Slight to Indiana Prompts an Invitation

An Indiana newspaper has turned a slight to the state into a possible remedy for cool U.S.-Soviet relations: It has invited editors of the Red Star newspaper in Moscow to tour Indiana to see firsthand that "Hoosiers are really not much different from

In a recent editorial, the Fort Wayne News-Sentinel offered rebuttal to a Red Star article that referred to Indiana as a "God-forsaken hole" and was critical of Richard G. Lugar, a Republican of Indiana, who is chairman of the Senate Foreign Relations Committee. Leaving Mr. Lugar to defend himself, the Fort Wayne paper took up its state's cause, saying "Hoosiers will not sit idly by when derogatory comments are made about this fair

state of ours." How would you like it if we started calling Siberia nasty names?" the News-Sentinel said.

Suggesting that the Soviet editors were operating under "se-vere misapprehensions and mistaken notions," the newspaper invited them to visit Indiana, adding that "such a trip might be the first part of a journey toward a new era of peace and under-standing for the entire world."

### Short Takes

No. 1

The average cost of a college education is up 7 percent over last year, with the most expensive bill rising to \$17,210 for the 1985-86 academic year at Bennington College in Vermont, the Annual Survey of Colleges, published by the College Boar,

The survey, which tallied tuition, books, room, board, per-

sonal expenses and transporta-tion for undergraduates at the 3,000 private and public colleges responding, found the cost of college was one percentage point ahead of last year's increase and several points ahead of inflation.
Besides Bennington, the 10 most expensive colleges, and costs for

one year, are: Massachusetts Institute of Technology, \$17,030; Barnard College, \$16,842; Princeton University, \$16,790; Yale Universiversity, \$16,790; Yale University, \$16,650; Harvard and Rad-tiffe College, \$16,500; Sarah Lawrence College, \$16,285; Stanford University, \$16,133, and Dartmouth College, \$16,120.

When Asron Montgomery Ward first published his 163-item advertising pamphlet in 1872, he created a marketing revolution: the mail-order catalog. But the catalog, which once supplied mainly rural clients with everything from clothing to tombstones, will appear for the last time in December, the president of Montgomery Ward, Ber-

nard Brennan, has announced. Since 1980, the company has lost \$50 million annually. In dislost \$50 million annually. In discontinuing "the great wish book," Montgomery Ward plans to close 1,270 catalog sales agencies and revamp its stores, leaving Sears, Roebuck & Co., a competitor of Montgomery Ward since 1874, with the competition of the competit try's oldest — and still successful — general merchandising cata-log.

# Scientists Discover Fertility Hormone

By Harold M. Schmeck Jr. New York Times Service NEW YORK — Scientists in California have discovered a longsuspected but elusive brain hormone that is a key regulator of

fertility in humans. The hormone, called prolactinrelease inhibiting factor, has been found to inhibit the body's production of prolactin, which is crucial to fertility. The hormone also may have other functions in the brain, including an influence on behavior, according to the scientists who dis-

covered it. The discovery is considered im-portant in shedding new light on the chemistry of human reproduc-tion. The researchers say they be-lieve it may lead to the development of new contraceptives and

ture, the weekly British scientific journal, by a team of scientists from Genentech Inc., a biotechnology company in South San Francisco, and from the University of Cali-

WASHINGTON — Donald T. Regan, the White House chief of staff, has selected new presidential assistants for politics and legislative of the property of the selected new presidential assistants for politics and legislative of the property of the p tive affairs as he prepares a major fall campaign by President Ronald Reagan to press for budget cuts and tax revision. The campaign may include the vetoing of spending bills, Mr. Regan's aides say.

The chief of staff will name

Effort to

**Cut Budget** 

Mitchell E. Daniels Jr. to succeed Edward J. Rollins as White House political director, officials said. Mr. Daniels is a deputy to Mr. Rollins and was previously executive direc-tor of the Senate Republican cam-

paign committee.

Mr. Regan will also give M.B.
Oglesby expanded duties for congressional liaison, which he now shares with Max L. Friedersdorf. Mr. Friedersdorf is leaving the White House later this year.

The appointments are to be announced Monday as part of what an official calls an "aggressive" ef-fort to cope with the critical period when President Reagan returns from his vacation and recuperation

from cancer surgery. The effort comes as officials acknowledge that Mr. Reagan has experienced major political diffi-culties during the first six months of his second term.

After a series of setbacks and disputes with fellow Republicans in Congress over the budget and taxes this year, Mr. Regan is said to be determined that the president he will conduct a criminal investi-gation of the May 13 bombing by the police of a house occupied by members of the radical group regain control over the agenda and to prevail over key issues in the period between the holidays of La-bor Day, Sept. 2, and Thanksgiv- MOVE.

ing Nov. 28.

They've got to hit the deck running in September," an official

Two other staff shifts are expected as part of the effort, officials said. Linda Chavez, the public liaison director, is to carry out a significant part of the autumn political moves. William Henkel, a special assistant to the president, will also have more responsibilities, officials

The president announced Aug. 5 that he would undertake a "major fall offensive" by "pulling out all the stops for passage of tax reform and confronting Congress on spending bills with my veto pen hovering over every line."

White House officials have predicted recently that Mr. Reagan will confront Congress with vetoes over spending bills this fall. But Mr. Reagan has in the past rarely vetoed appropriations bills, largely because they were negotiated to his satisfaction by David A. Stockman, who was then the director of th Office of Management and Budget.

A "veto strategy" requires a dif-ferent approach, officials said, and the White House is studying the prospects for vetoes that can be

Larry Speakes, the White House spokesman, said Friday that the farm bill pending on Capitol Hill

troubling for Miami, where civic leaders feel that crimes stemming from drug trafficking and the arriv-al of tens of thousands of refugees in this decade have unfairly stigmatized the city as a dangerous place to live. This reputation has not been diminished by the popularity of the U.S. television series "Miami Vice," which portrays the city as a kind of wide-open badlands. This portrait is in part borne out

by U.S. crime statistics for 1984. Although the homicide rate for Dade County, which includes Miami, has declined from its 1981 peak, it still is the worst of any metropolitan area in the country, at 23.7 murders per 100,000 residents. The Federal Bureau of Investigation also reported that Dade County, with 1.7 million residents, is the second worst metropolitan area for the per capita incidence of all crime it categorizes as violent, exceeded only by Atlantic City, New Jersey.

In response to the robberies, Leonard Mellon, executive director of the Florida Department of Highways and Motor Vehicles, said that patrols on 1-95 and connecting expressways were being increased. Extra patrols are to be mounted by troopers who normally work in radar zones to stop speeders, he add-

### DG BANK 1984: REFLECTION OF PERFORMANCE

DG BANK - the central bank, liquidity manager and international arm of West Germany's cooperative banking system - continued to pursue its systerns- and results-oriented corporate policy in 1984.

DG BANK - The Key Group Figures DM 89.3 billion Business Volume DM 83.2 billion DM 46.0 billion Total Assets Deposits DM 31.2 billion DM 64.7 billion Own Bonds Loans

Solid Growth: DG BANK business volume rose by approximately 8 percent, net income by well over 13 percent to DM 116.3 million.

Stronger Base: To expand its equity capital base, DG BANK in late 1984

became the first West German financial institution to issue participating certificates, in the amount of DM 350 million DM. From net income for the year, DM 50 million were allocated to reserves. This brings the Bank's capital and reserves total to more than DM 1.8 billion. Long-term Orientation: In lending

business, long-term financing was increasingly in demand by clients.

Export Financing: Lending to clients abroad again focused on financing German exports. In international commercial transactions a substantial increase was recorded. DG BANK bases in the world's major financial centers managed to further consolidate their

Active on Capital Markets: During the year under review, DG BANK placed own bonds totalling DM 2.8 billion. Trading in both equities and bonds was extremely brisk, particularly with institutional investors. Also appreciably strengthened were our securities underwriting activities.

Head Office: DG BANK, P. O. Box 100651. Wiesenhueltenstrasse 10, D-6000 Frankfurt am Main 1, Federal Republic of Germany, Telephone: (69) 2680-1, Telex: 412291.

# **Questions for Our Time**

day of the nuclear era, we can wonder what we shall have learned when the 50th anniversaries come around in 10 years' time.

New Mexico. Hiroshima. Nagasaki. In the mostly American debate about Harry Truman's decision to unleash the bomb in 1945, the word "moral" has made a comeback in political commentary. As often happens in arguments about morality, there has been much beating about the bush. Perhaps the debate will have sharpened by 1995. Here, at any rate, are a few questions of the sort that could help to sharpen it.

The bombings of Hiroshima and Nagasaki cut short the war, and thus they may very well have prevented more deaths than they caused. (The conventional wisdom is affirmative, although minority dissent persists.) But is that the point? Are all means justifiable - torture of prisoners to obtain information, for one example - to diminish the likely casualty toll of one side (or even both sides) in wartime? Of course not. Well, in which category are we going to put the nuclear bombing of cities: licit or illicit? Long before World War II, Hitler main-

tained in public that mastery of the skies could win a war quickly. By the time he lost all hope of such mastery, massacre of civil-

After all the discourse for the 40th birth- ian populations from the skies had become standard wartime practice. From Coventry to Nagasaki, via Dresden and so forth, the bombers bombed away. We have been reminded lately that the conventional bombing of Tokyo took more lives than the atom bombing of Hiroshima. Well, is a nuclear bomb really so unspeakably special, or is mass slaughter itself the issue?

If Berlin or Tokyo or Moscow had had the bomb, Berlin or Tokyo or Moscow would presumably have used it. Washington had it and used it. End of debate? No, start of debate. The issue is whether anyone at all should use it. Back to square one.

But this last pseudo-argument ("They can't blame me for doing what they would have done if they could") points to another question. There cannot be many of us, whatever our nationality or present persuasion, who would not have done as Truman did: a weapon that can put a victorious end to an atrocious war is a weapon crying out to be used. We are left with the possibility of saying simply: It was wrong, but I would have done it. And then the question - since the whole point of moral debate is to try somehow to make a better future -- comes down to this: Well, should I do it again?

INTERNATIONAL HERALD TRIBUNE.

# **Overt Covert Deception**

When war comes, warned Senator Hiram Johnson in 1919, truth is the first casualty. The maxim applies to Nicaragna. Washington's covert war there has filled a whole hospital - and yet more evasion and deception came

to light just last week.
When it began in 1981, this war was described as strictly an internal affair. When CIA complicity could no longer be denied the administration explained that it was necessary to cut off an alleged arms flow from leftist Nicaragua to El Salvador. That story began to totter in 1984 when Nicaragua's harbors were mined to scare away neutral shipping. Even that mining was falsely ascribed to "contra" rebels; its authors were North American, Then came the infamous "contra" manual, ghostwritten by a CIA operative, counseling political morder. This ugly business, at first denied, was finally blamed on excess zeal. Next came the scary report that Soviet ships were carrying high-performance MiGs to Nicaragna, a false alarm attributed to a faulty leak.

Now comes the news that for a year the overt covert war has been supervised by a military aide on the staff of the president's National Security Council. The officer met frequently in Central America with rebel leaders, exerted "tactical influence" on their operations and directed private donors to them. At the least, these responsibilities make him a coordinator; at the most, a field marshal.

To understand why this news carries such apungent odor, recall that Congress — the Republican Senate as well as the Democratic House — tried urgently to end covert U.S. management of this war. It ordered a cutoff last November of all CIA funding or involvement in the "contra" insurgency.

That ban was partly lifted in June. While still barring a CIA role, Congress ambivalently approved \$27 million in "humanitarian aid," to keep the "contra" effort alive. Meanwhile, supervision had already been shifted to the NSC so as to give President Reagan "plausible

deniability" of continued CIA involvement, as one insider explained to The New York Times. The president insists that no laws have been broken. That is true, but only in the most technical sense. Congress said no to the secret war. To shift conduct of these activities to the NSC is a sty, even a cynical evasion. The arrangement, says Admiral Stansfield Turner, who was President Carter's director of central

who was President Carter's director of central intelligence, is "most improper."

A government that routinely deceives its people invariably winds up deceiving itself. Does the White House know what is being done in the name of the United States in Nicaragua? Only last week an overzealous re-bel group seized and then released 29 U.S. peace activists near the Costa Rican frontier.

Ducking the truth about Nicaragua has be-come habitual. Witness the devastating memoir of a former "contra" leader, Edgar Chamorro, in The New Republic. Mr. Chamorro was recruited in 1982 by an American who claimed to speak "in the name of the United States." He quit two years later feeling that he had been used and misled. By Mr. Chamorro's account, the rebel leadership was hand-picked by the CIA and coached in how to give deceptive testimony to Congress. He found that it "was standard 'contra' practice to kill Sandinist prisoners and collaborators," a practice he did his best to change.

What is most dismaying about all these deceptions is that they distract from the hard choices in dealing with Managua's provocations. Instead of a reasoned case for a plausible policy, the Reagan administration has chosen to mask war with whoppers, all the while

condemning the Sandinists as liars.

The administration intends now to move supervision of the secret war into the State Department, not for reasons of face but of space. The bureau overseeing this White House war will be called - what else? - the Agency for Humanitarian Assistance.

- THE NEW YORK TIMES.

# A Hidden Budget Spring

Did you ever really doubt it? The White House now acknowledges that the budget deficit is back on a track that, despite all of this summer's struggles with spending cuts, will produce \$200-billion deficits next year and the year after. It is as if the deficit were on a spring. Wherever the estimates and forecasts begin, as time passes they snap back to \$200 billion.

The pattern has been repeated annually for the past four years. The latest cycle, over the past six months, began with the president's budget in February. It called for a deficit of \$180 billion next year. Six months later, after a mighty struggle, Congress got it down to \$172 billion. That was a week ago. Now the Office of Management and Budget warns that the true figure is still in the range of \$200 billion.

The spending cuts - most of them, at any rate - are not fake. The chief source of the slippage is in the economic forecasts. In February the budget makers took a highly optimis-tic view of economic growth in 1986. Currently the evidence indicates a much less rapid expansion - meaning lower tax revenues. The

White House says it also expects some upward revision of the deficit when appropriations bills overstep the limits that Congress has just set in its budget resolution. That is certainly possible, but the implication that the deficits result from congressional refusal to follow the president's budget proposals is incorrect.

White House staff people want a budget next winter that pushes the deficit down in three years from 4 percent of GNP to 3 percent to 2 percent. Those are useful targets, but they are the same ones the staff tried to put in place a year ago. It turned out that Mr. Reagan was unwilling to make the choices required even to meet those goals on paper — even with those optimistic assumptions about the economy.

The point of all this highly repetitive experience is that a dangerously large structural deficit is not going to be remedied by the kind of marginal fiddling around to which Mr. Reagan has limited himself since 1982. It is to take something more serious. Like going to take something more schools. Law what? Like, to say it once more, a tax increase. -THE WASHINGTON POST.

# FROM OUR AUG. 12 PAGES, 75 AND 50 YEARS AGO

1910: Taft Is Urged to Drop Ballinger NEW YORK - Richard A. Ballinger, Secretary of the Interior, is the political sacrifice demanded by men backing the Taft Adminis-tration, so that Theodore Roosevelt shall not again occupy the White House. Trouble be-tween Mr. Ballinger and Gifford Pinchot, head of the Forest Service, began early in the Taft Administration. James R. Garfield, Secretary of the Interior under Roosevelt, withdrew 677,000 acres of public lands. When Mr. Ballinger became Secretary he rescinded the action, Mr. Pinchot began attacks on Mr. Ballinger. President Taft later dismissed Mr. Pinchot. Opponents of Mr. Ballinger have declared that [land conservation] has not been fostered as it was under Roosevelt.

1935: Japan's Army Defends Deficits PARIS—The opening of the Japanese Army's annual campaign for bigger military appropriations—for popular support of the principle of "armaments first," as War Minister Hayashi puts it — has brought an interesting antici-pation of criticism. Without waiting for the bankers and industrialists to complain that heavier military expenditures mean another, and bigger issue of "deficit bonds," a "certain section of the community" (which, of course, means the military) has been telling Mr. Takahashi, the Finance Minister, that the government's loan policy is too cautious for the public good. The army's economists insist that the deficit can be piled up indefinitely without ment to the nation.

# This Middle East 'Peace Process' Is Futile

N EW YORK - U.S. Middle East policy is headed, willfully and witlessly, toward a fias-

co. But there are grounds for optimism: The policy may collapse before it gets too far down that road.

The "peace process" to which the U.S. State Department has committed itself involves bringing Israel on the one hand, and Jordan and the Palestinians on the other, to the negotiating table. There, it is hoped, they will arrive at a settlement of the future of the West Bank — or Judea and Samaria, as most Israelis now call it.

Arriving at that table will not be easy. Israel is publicly committed to negotiations, but only if the question of Palestinian representation can be settled. Israel will not accept Arabs who, in its opin-ion, have links to the Palestine Liberation Organi-zation. Jordan, however, cannot omit such Arabs

Jordan cannot accept anything less than a return of the entire West Bank to Arab rule.

since it is committed - along with all other Arab governments — to the thesis that the PLO is the only valid representative of the Palestinian people. in addition, Jordan keeps suggesting that the Soviet Union be brought into the negotiations. In Amman's view, that is the only way to milify Syria's adamant opposition to any such talks. But Soviet participation is utterly unacceptable to both Israel and the United States, since it would open the door to all kinds of new mischief.

So it is inlikely that the "peace process" will ever reach the stage where Israelis and Jordanians and Palestinians sit down and begin to negotiate. That is good news. For those negotiations, which would inevitably begin with much fanfare and high expectations, would certainly fail, leaving all of us

worse off than we were before.

The reason failure is so certain is that there is no imaginable outcome that could be acceptable to both Israel and Jordan. Events have simply outboth israel and foreast. Events have amply our stripped the State Department's "peace process," which is based on assumptions developed many years ago. Those assumptions are no longer con-gruent with Middle East realities.

The key assumption is that Israeli-Jordanian negotiations will result in Israel exchanging territory for a peace treaty, and that Jordan will then

WASHINGTON — Before making definitive judgments

about Nicaragua as a terrorist state

— President Reagan put it on his
list of international outlaws — consider testimony from Anne Lifflander, 29, a New York doctor who

spent two years in Nicaragua and

survived a terrorist attack by the

U.S.-sponsored "contras." On July 23, Dr. Lifflander was on

a ferry traveling the Escondido River from Rama to Bluefields, a city

on Nicaragua's Atlantic coast, when gunfire hit the ship. "It was terrible," she says. "People threw themselves on the deck. They were pray-

ing and crying and screaming.

In the 15 minutes that followed, three rockets were fired. A govern-

ment soldier, one of nine aboard,

was shot in the face as he stood

guard; he died two hours later. A

civilian construction worker shot through the head died that night.

Dr. Lifflander, a quiet, round-

recognize Israel's "right to exist." This has always been the solution envisaged by the United Nations. For a long time it was the solution proposed by Israel and rejected by the Arab states. It is still the solution desired and advocated by the State

Department. But it is, by now, an anachronism.

There is, to begin with, the problem of Jerusalem. The 1967 war, in which Jordan participated despite Israeli and American pleas to stay out, resulted in the Israeli acquisition of East Jerusales - the "Old City," with its holy places. No Israeli government will ever — no matter what — return this portion of Jerusalem to Arab rule. No Jordani-an government, and no Palestinian body, will ever no matter what - recognize Jerusalem as Israeb. There is simply no room for compromise here. One supposes that Israel and Jordan just might relegate the Jerusalem issue to some future agenda. and proceed to discuss the West Bank. But that

For Jordan cannot accept anything less than a return of the entire West Bank to Arab rule; if it did, it would be universally denounced in the Arab world as a traitor to the Arab cause. At the same world as a traitor to the Arab cause. At the same time, no Israeli government can possibly return the entire West Bank to Arab rule—for two reasons. The first has to do with military security. The so-called "high ground" of the West Bank — a hilly, relatively thinly populated area with some 40,000 Arabs, adjacent to Israel's narrow "waist" and constituting perhaps 15 percent of the West Bank — is almost universally accepted in Israel as an area over which it must retain military control

discussion, too, would get nowhere.

is almost universally accepted in Israel as an area over which it must retain military control.

After all, Jordan has always in the past joined in Arab wars against Israel, and "peace treaties" in the Arab world, even among Arab states, have never been taken too seriously by anyone. Such treaties come and go quite casually, while Israel's vulnerable geography is a permanent concern of the Israeli nation. Many "peace plans" have been proposed by many Israelis of differing opinions. None that fails to continue Israeli military control None that fails to continue Israeli military control

of the "high ground" is taken seriously. The second reason is even more important. It concerns the future of Israeli "settlements" on the West Bank. These settlements have attracted much publicity, but it has been focused mainly on the relatively small encampments of religious and na-tionalist zealots in the midst of Arab-populated

areas. It is these settlements, in particular, that areas. It is these settlements, in particular, that have provoked terrorism and counterterrorism. But they involve, in total, only a couple of thousand Israelis and have the sympathy of only a minority of the Israeli public. They could indeed be negotiated away, although not easily.

The settlements that do count are not really "settlements" at all. They are new suburbs within commuting distance of Israel's major cities.

commuting distance of Israel's major cities — Jerusalem, Tel Aviv, Haifa — but located, techni-cally, on the West Bank. The largest such spinuth is just seven miles from the center of Jerusalem.

These are ordinary Israeli towns, with pleasant garden apartments, supermarkets and a popula tions that rides buses to work in the nearest Israeli city. These suburban towns were constructed in areas where relatively few Arabs live, and nothing that happens in these places makes headlines. Their total population, about 30,000, is growing rapidly. The area they encompass amounts to another 10 to 15 percent of the West Bank.

So Israel has already annexed some adjacent areas of the West Bank. It is giving this territory (or has already given it) a Jewish majority. No political party or faction in Israel (except the Communists)

will waste breath negotiating its status.

Does anyone, including the U.S. State Department, seriously think that Jordan and the Palestinians could sit down and negotiate about Israeli military control of a significant part of the West Bank? Does anyone seriously think that Jordan and the Palestimans could accept ontright Israeli annexation (already accomplished de facto) of 10 to 15 percent of the West Bank?

Had Jordan and the Palestinians agreed to nego-tiate 10 years ago, things might have been differ-ent. Today their agenda and the Israeli agenda have diverged dramatically.

Why pursue negotiations that can only collapse

into acrimony and even greater tension?

The plain truth is that, as things now stand, there is no peacemaking role for the State Department to play in the Middle East. It should wait and watch and be patient. A peaceful settlement of the Arab-Israeli dispute has cluded American policy for almost four decades now. All the evidence suggests that no kind of turning point is at hand.

she doesn't want to go back."

# The Greeks Blame It All + On America By Flora Lewis

A THENS — Greece is becoming sharply polarized again. The villages have two coffee shape — one where supporters of Prime Minister Andreas Papandreon's Socialist gov-enment gather and one for the opposition, so that they can denounce each other in friendly surroundings

free of inhibition.

The capital has two dialogues, each within its own closed cordes. Meanbers of PASOK, the government parbest of raison, me government par-ty, speak with exhibitation of dramat-ic change and of newfound indepen-dence, although the facts have been modest so far. Members of New Democracy, the opposition party on the right, intone dire warnings about a coming "one-party state" and conomic disintegration.

They agree on a few things. One is that Turkey is the menace, and the

other is that whatever they find wrong it is really America's fault. wrong, it is really America's fault.

The latest frothy seemed is over testimony of the newly appointed U.S. ambassador, Robert V. Keeley, at Senate confirmation hearings. He hoped for "better relations" on a "more equal" basis than the "client-patron" link of the postwar period. The government spokesmen The government spokesmen jumped on the phrase, saying it showed that America had admitted that previous Greek governments were servile. The opposition screamed saying it was a dirty blow by Washington to curry favor with Mr. Papandreou so as to keep U.S. bases. Leading figures in New Democracy argued among themselves about whether they should "reject" Mr. Keeley for insulting their record. The fuss is really a reflection of how much America still matters to this country, whether as scapegoat or

this country, whether as scapegost or protector. Most Greeks blame the United States for the seven years of dictatorship following the 1967 colonels' coup, and for not preventing the 1974 Turkish invasion of Cyprus.

Some emotional officials ever claim that the United States has not fulfilled obligations in return for Greece's part in World War II. Such nighteous extravagance is accompa-med by angry denials that anything Mr. Papandreou has said about the United States could be considered

Nobody pretends to have a clear idea of Mr. Papandreou's intentions now that he has been re-elected for a second four-year term. He has vowed not to give any more interviews, which leaves things murky but may not be a bad idea given his propensity

for casual provocation.

But the government has toned down its America-besting stance. Foreign policy was not a major issue in the recent campaign, although there is a lingering chance that Mr. Papandreon's pacues have made the world give Greece more of its due attention and respect

Inca Maintain

To Ecevit.

William tomber

£ ...

Brong .

attention and respect.

The trouble is that this does not address the main problem, which is the seriously deteriorating economy. Greece is likely soon to become one of those countries obliged to creep under the stern tutchage of the Inter-national Monetary Fund. That will renew the dilemma of whether to re lieve feelings by more anti-U.S. rhetoric or try to convince these plan-toms called "international bankers"

that Greece is still a good bet. Among the people who love to talk politics, there is an atmosphere of an impending watershed, of a moment of decision just ahead that will determine the country's fate. But it seems artificial. The impression is more one of groping and bumbling on the long road of transforming a backward, ru-ral economy and archaic paternal politics into a modern state.

Helen Vlachos, the outspoken, dauntless editor who sassed the colonels' regime relentlessly and now gives Mr. Papandreou similar treatment, says flatly: "I am free to say whatever I want. But [those in power] are equally free to ignore me totally. So there is no democracy.

By that she means lack of effort to seek consensus and compromise, heightening polarization between ins and outs and increasing politicization of state services that ought to be nonpartisan but have always been nked in some degree to patronage. In the circumstances, there is not

much America can or should do. There is no reason to swallow insults, and no reason to panic. At this stage, whatever the United States does, it is likely to hear from Greeks that what goes wrong is all America's fault. The New York Times.

Letters intended for publication should be addressed "Letters to the

mother of two daughters, almost

every family has a son fighting at the front, and "there are funerals all the time." Civilian casualties are

mounting. Eight women traveling to visit their sons in an army camp

were killed when "contras" at-tacked their bus. Seventeen people were injured in what certainly

When she returned to her Mana-

gna home after her brush with the "contras" she expected a "heroine's

welcome," but perspective was im-mediately restored. A woman in the

neighborhood had lost her only son.

sounds like a terrorist raid.

The Rangel idea does solve the perennial dilemma about who should get foreign sid. By his logic, only one regime in the hemisphere is deserving, because only one country is free of the drug trade. General Pinochet will be pleased with the news. Let's face facts. We live in a market

economy where demand finds sup-ply. Why should drugs be different? If you stamp out coca production in the Andes it will migrate, as it is migrating, to the Amazon and else-where You don't attack a drug problem with a foreign aid bill. It can make you feel good, and destroy a few democracies in the process, but it won't solve the problem. The narcotics problem begins at

home. "Bolivia and Peru most under-stand," Representative Rangel thunders, "that as a nation we are serious about narcotics control." Trouble is, Beverly Hills and the Bronx don't believe the nation is serious. And who coups in 140 years, has just sworn in a can blame them, so long as Amerirarity: an elected president. Peru, cans pretend that the user is some innocent victim either of nefarious Latins or of Wiggins' disease?

What drug abuse has lost is the social stigma — still the best policing agent for "victimless" behaviors that it enjoyed, say, 30 years ago. Restoring that stigma will require a little plain speaking. We could start with a moratonium on disease-talk. And on infantifizing the user, It the

lieves its own hyperbole — that drug abuse is a calamity that threatens "productivity, public health, education ... and national security" then the drug user, who collaborates in creating this calamity, deserves some social sanction, too. At least as much, say, as the drunk driver.

Why then don't the politicians push for strictly enforced penalties for drug use? Because Americans like

their drugs. And they vote. Bolivians don't vote for the U.S. Congress. If the House has its way, they will not vote very much longer for their own government, either.

CASABLANCA: Morocco — For more than name months Jordan's King Hussein has tried to forge ahead in his joint peace initiative with the Palestine Liberation Organization despite the sometimes creatic behavior of his PLO partners, threats from Syria, apparent disdain by Israel and the immobility of the United States.

Now, added to his problem, analysts say, is the public skepticism and reticence of his closest allies in the Arab world as shown at a special summit meeting in Casablanca

Syria and Libya, the most radical Arab states, did not attend. But after three days of what participants said was passionate debate, those Arab leaders who did come were able to offer Hussein nothing better than a statement that they had listened to him and the PLO chairman Vassa Arab. him and the PLO chairman, Yasser Arafat, despite hopes raised by the Jordanian-PLO and they hoped that anything the two did plan, it has yet to show concrete results. would be in line with an Arab peace plan unanimously approved at a 1982 summit meeting in Fez, Morocco.

FIGHTS DEPORTATION — Hafil Abu Ziad, accused of being a leader of the Palestine Liberation Organiza-tion on the Israeli-occupied West Bank, was led to a court Sunday to appeal a deportation order. The court was to rule Thursday. It was the first deportation order since Israel decided Aug. 4 to revive, after five years, the practice of deporting Arabs accused of hostilities.

Israeli Stabbed on West Bank

# Franjieh Appeals to Christian Clans To Unite as Dominance Is Challenged

By Nora Boustany

Washington Past Service EHDEN, Lebanon — A new mood of conciliation appears to be surfacing among Christians in the mountainous north of Lebanon, where fends are traditionally more common than compromise.

The feudal clans seem determined to turn away from memories of slaughters by rival Christian militias and seek solidarity with other Christians, who now see themselves threatened with the loss of their political domination of Lebanon.

"I think it is time for us to communicate because the Christians need to be strong," said Butros Franjieh, 18, whose father, mother and brother were slain in the June 13, 1978, raid on Ehden by a rival Christian faction.

Also killed that night was Tony Franjieh, son of the clan patriarch, Suleiman Franjieh, a former presi-dent of Lebanon. Tony Franjieh's wife and baby daughter also died.

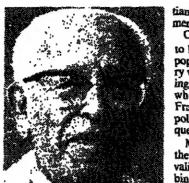

In a recent interview at his summer residence in Ehden, Suleiman Franjieh expressed a desire for for-giveness and said, "I am ready for any sacrifices if it brings people back to their consciences."

He said he regards Israel as the cause of most of Lebanon's problems and said he could not work with Lebanese who are still linked to that country.

Last week, a coalition of Moslem and mostly Greek Orthodox Christian opposition leaders met in the central Lebanese town of Chiaura to proclaim the formation of a pro-Syrian National Unity Front. The New York Times Service leader. Elyakim Haetzni, was group denounced the trend to parend to the allocation of politica offices and legislative power according to religious affiliation.

> The presidency, Lebanon's top executive post, always goes to a member of the Maronite Catholics, prisoner exchange of three Israelis the country's largest Christian group. The prime minister's post goes to a Sunni Moslem and the office of house speaker to a Shiite security measures to cope with the Mosiem. The army's commander in chief, the chief of military intellirise in Arab violence against Jews. They include deportation of Arabs suspected of hostile actions, deterence and the governor of the central bank are also Maronites.

The language of the Syrian-sponsored Chtaura declaration was mild, but its intent was clear: The days of Maronite supremacy are

Suleiman Franjieh

over. Mr. Franjieh did not attend the meeting and sent no one to represent him, and most Maronites boycotted the conference.

The wish to protect their remaining privileges has propelled Christians toward a forced solidarity, but they are not rallying behind Amin Gemayel, the country's Maronite president. Mr. Gemayel is increasingly isolated from both the Christians, who regard him as ineffectual, and from the Moslems, who doubt he can introduce reforms that will reduce the political

influence of his own group. Mr. Franjieh has repeatedly called Mr. Gemayel a "sick head that must fall," but he is not among the Gemayel critics who want both to unseat the president and to change radically the Lebanese governing formula.

Mr. Franjieh was president in 1975, when Lebanon's civil war pitted Moslems against Christians in a sectarian conflict fueled by discord over the governing formula that favors the Christian minority. To have the president from a

sect other than the Maronites would be racing ahead of reality," Mr. Franjieh said. His approach to changes in the

Lebanese system remains conservative despite his dislike of Mr Gemayel and Mr. Gemayel's close ness to Syria, which has backed Moslem demands for a more balanced distribution of power. Chris-

tians hold a 6-5 edge in the parlia-Commenting on Shiite demands to have the president elected by a popular rather than a parliamentary vote, to accommodate the growing number of Lebanon's Shiites,

who number one million, Mr. Franjieh said, "No true Lebanese politician would make such a re-Mr. Franjieh said that some of the points raised in Chtaura were valid but that they should be combined with elements raised in a "constitutional document" he drafted in 1976 with Syrian ap-

for a 50-50 representation of Moslems and Christians in parliament. On Shiite Moslem demands for a greater share in Lebanon's decision-making establishment, Mr. Franjieh said, "Naturally, man will ask for what he wishes. But what they are asking for should be based on a right that is not theirs alone or the property of a specific region.

proval. A key point then was a call

Every area, every religious group in Lebanon has the same rights." The Shiites, who live mostly in the south, complain of neglect and scarce village-development funds. Mr. Franjieh said all Lebanese villages received all the services the state provides.

But the well-paved wide highways leading to the mountain re-son of Ehden contrast with the potholed and tattered road network in southern Lebanon.

# Israel Debates Arab Contact in Schools

By William Claiborne

Washington Post Service
JERUSALEM — A proposed ban on meetings between Jewish and Arab pupils in state religious schools to prevent intermarriage has touched off a controversy between Israel's religious and

secular communities, Education Minister Yitzhak Navon has asked the director of the religious education division, Yacov Hadani, not to distribute a directive forbidding Jewish-Arab contacts during the coming school year because the ministry is trying to encourage such meetings in public schools.

However, the Chief Rabbinate has come out in opposition to Jewish-Arab meetings in schools, and Interior Minister Yitzhak Peretz has joined the battle by declaring, "If we look at Jewish history, the greatest danger to the Jewish people in all genera-

tions has been assimilation." Mr. Navon said his ministry would continue a program in secular public schools to foster coexistence between Arabs and Jews and to combat racism, but added that he was aware of special requirements in religious schools to avoid violation of orthodox Jewish ritual.

An Education Ministry spokeswoman said that Israeli law makes religious education independent of ministry directives, and that Mr. Hadani was appointed by the cabinet, not by Mr. Navon. Mr. Hadani can only make recommendations about religious education, she said.

of Israel's schoolchildren are in state religious schools and that "it is more important that 75

The greatest danger to the Jewish people in all generations has been assimilation.

> Yitzhak Peretz Interior minister

percent of the students will still have the meetings with Arab students."

Mr. Navon said that he had no intention of changing the law giving independence to the religious education division of the ministry. He said be had reached agreement with Mr. Hadani, however, and that the Arab-Jewish meetings would continue.

Under a compromise proposal made by the rabbinate, Jewish and Moslem students would not be permitted to eat together, and boys and girls of the two faiths would not be allowed to meet Instead, Jewish and Arab pupils of the same sex would work together on projects such as plant-

Mr. Hadani said that religious schools would encourage Arab-

our students to respect gentiles and grant them their full rights," but he also said that orthodox Jews and Moslem religious leaders shared his concern about intermarriage.

In a state radio interview, Mr. Hadani said that when Jewish students reach a less impressionable age, about 18, he had no objections to meetings with Ar-abs "on an intellectual level."

Disclosure of Mr. Hadani's directive prompted a storm of criticism by liberal members of the Knesset, Israel's parliament, some of whom asserted in telegrams that the decision reflected the views of Rabbi Meir Kahane. Mr. Kahane is a member of the Knesset and the leader of the Koch party, which advocates the expulsion of all Arabs from Israel and the occupied territories.

The Institute for Education for Coexistence Between Jews and Arabs, in a letter to Mr. Navon, said that Jewish-Arab intermarriage is a "very marginal phenomenon in Israeli society and among religious Jews ap-proaches zero."

The government Central Bu-reau of Statistics said that it had no figures on intermarriage, but Alouph Hareven of the Van Leer Jerusalem Foundation, which has organized a program to improve Jewish-Arab relations through education, estimated that since the founding of Israel in 1948 there have been only about 300 such marriages, or slightly more than 10 a year.

# Upbeat in London

Some London analysts say the Stock Exchange is poised for another rally. Their upbeat view is based on the belief that the pound, despite some recent setbacks, will remain firm enough for the Thatcher government to lower interest rates further. This comes as welcome news to investors who saw share prices retreat in June largely because of the heavy volume of new equity issues. A drop in export earnings as the pound strengthened earlier this summer also manerved the mar-

summer also unnerved the mar-ket. "With U.K. interest rates and bond yields trending down, we're much happier," acknowl-edged William Bain, an analyst at Wood Mackenzie.

Nevertheless, analysis are advising investors to stay away from exporters and look to constrom exporters and look to con-sumer issues, such as retail stores. Marks & Spencer, Brit-ish Home Stores and Sears Holding are on the buy list of many brokerage houses. Dee Corp., a food retailer, and Dixons PLC, an electrical retail chain store are also mentioned

by analysts. For those willing to by analysts at James Capel & Co., suggested BAT Industries, the tobacco and retailing group, and iCI in the chemical sector. Both have fairly low price-earning ratios.

Among beverage analysts, Coke is still it. The leading soft-drink producer fumbled badly earlier this year when it retired its original formula in favor of a recipe that met with strong disapproval among American consumers. In a turnabout, the company reintroduced its 99-year-old drink as "Coca-Cola Classic," which is now sold along with the new Coke. But the impact of Coca-Cola's marketing snafu on its stock price will be minimal this year and may even be positive next year, according to George Thompson, an analyst at Prudential-Bache.

Mr. Thompson bases his assessment on the fact that Coca-Cola's foreign markets, which account for 50 percent of its revenue and were not affected by the formula switch, continue to be healthy. In addition, "Coca-Cola Classic" should prove to be an efficient item requiring only limited marketing effort, explained Mr. Thompson; since its reputation is well established. When the new formula is introduced abroad next year, "its marketing will have already been fine-tuned" in the United "its marketing will have already been fine-tuned" in the United States, be said.

# **American Gold Option**

The U.S. Treasury may soon find itself a major player in the gold coin market. Proposed congressional economic sanctions against South Africa would not only ban further imports of the Krugerrand, but would also direct the U.S. Treasury to begin minting bullion coins for the first time since 1933.

The gold coins would presumably be traded in the same manner as South Africa's Krugerrand and Canada's Maple Leaf. The American coins would be designed to match the dimensions, weight and gold content of Krugerrands, which are available in denominations of one tenth of a troy ounce, one

quarter, one half, and one troy conce.
There are no official estimates of the potential demand for an American gold coin. But the increasing unrest in South Africa has burt demand for the Krugerrand and increased the sales of its primary competitor, the Maple Leaf.

# **Gilt-Edged Copycat**

The success of CATS and TIGRS, the zero-coupon instruments backed by U.S. Treasury securities, was bound to produce imitators. But last week's effort in London to introduce a similar instrument, STAGS, based on British government bonds, known as gilts, showed that some financial concepts do not travel well.

The avowed purpose of the sponsor, Quadrex Securities, was to offer offshore investors a new way to invest in British pounds. Because British regulations make zero-coupon instruments "tax horrible" for onshore investors, as one banker put it, there is virtually no domestic market. But even offshore interest did not appear overwhelming, with all but one of the 27 series of STAGS ending the week below their issue prices. In the longest maturity, STAGS yielded about 10.35 percent on an annual

Bond-market participants cited several reasons for investor reticence, including mispricing. The issue also seemed badly timed, others said, coming as many investors were taking profits on a big rise in sterling's value.

Grumman jets being built. Strategic metals are used in aviation.

# The Uneasy Market In Strategic Metals

Pollution policy and politics stir interest in a depressed sector

By Bruce Hager

HILE last week's strike threat by miners in South Africa had most metal analysts debating the longnumber of experts were expressing concern about a less fashionable metal — rhodium. A member of the plannum group, this silvery white metal is rarely thought of as a precious metal, but can be significantly more valuable.

A heat-resistant metal used in plating electrical circuits and in reducing auto-exhaust emissions in catalytic converters, rhodium is a so-called "strategic metal." This term is applied to a range of substances that are distinct from precious metals and nonferrous metals such as copper because of their limited supply and as copper because of their limited supply and ratical industrial and military applications, most notably in the construction of property and missing of the tion of aircraft and missiles.

The distribution of these metals also has geopolitical implications. Most of the world's known reserves are in the Soviet Union and a handful of African nations. Questions about the reliability of supplies have played havor in the market intermittently since the late 1970s.

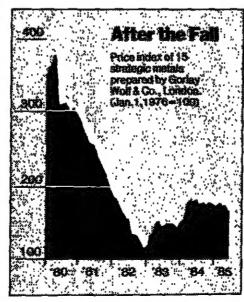

The recent unrest in South Africa, one of biggest producers of rhodium and other key industrial metals, has again focused attention on strategic metals. The market has lost much of its luster for investors since the booming metals market of the late 1970s, but it continues to attract a handful of individuals who hope to cash in on its volatility.

Although a strike on Aug. 25 by the National Union of Mineworkers in South Africa would primarily affect gold, diamond and coal mines, analysts are not discounting peripheral incidents at platinum mines that would also affect rhodium prices. To date, such fears have not affected rhodium or the prices of other strategic metals mined in South Africa, such as vanadium, manganese and chromium. But the current unease about rhodium supplies is understandable.

Political factors have created market shortages and panic in the past. The best example was in 1978 when a group of guerrillas attacked the mining town of Kolwezi in Zaire, a center for cobalt production. With about 50 percent of the world's cobalt reserves in Zaire and neighboring Zambia, fears of a shortage of this tough, lustrous metal used in the production of jet engines, drove the price of cobalt from \$6.85 a pound to \$45.

Like most commodities, the market for strategic metals has been bearish for the past couple of years. Even cobalt prices have slipped to around \$11.50 a pound, and some analysts believe these and other metals prices could remain steady for some time if the South Africa political situation is

"No producer of any metal likes to have violent (Continued on Page 8)

# **ECU Comes of Age** For Global Investing

A sagging dollar boosts its appeal for bond investors

By Colin Chapman

BOUT five years ago, a handful of French and Italian companies hit upon the idea of issuing international bonds denominated in the European currency unit, the artificial currency that reflects the values of nine currencies of the European Community. The securities found ready buyers among one group of European evaluates. group of Eurobond stalwarts.

"It was the individual conservative Belgian investor — the Belgian dentist — who bought them," recalled Pierre Jaegly, manager of Cedel, the Eurobond clearing service in Luxembourg. When it came to European currencies, he noted, Belgian bond investors were skeptical of the stability of such high-interest currencies as the French franc and the Italian lira and indifferent to the low interest rates on bonds in Stronger supergries such interest rates on bonds in stronger currencies such as the Deutsche mark. With ECU bonds, "they

as the Deutsche mark With ECU bonds, "they received higher yields than on the Deutsche mark and still had stability," Mr. Jaegly noted.

Lately, as the dollar sags, investors far beyond Belgium and Luxembourg are discovering the attractions of the ECU (about 78 cents). Although the continued high yields and security of dollar-denominated bonds discourage large-scale defections, investors with substantial portfolios in dollar securities are weighing the advantages of at least a securities are weighing the advantages of at least a modest diversification into other currencies. For these investors, the ECU has obvious benefits.

A study by Bank Julius Baer found increased interest in ECU securities among investors in the United States and Germany, and Mr. Jaegly says Japanese institutions are taking notice. Currency

funds and U.S. institutions in particular have be-gun to appreciate the "fantastic diversification it offers against the dollar," reported Leon Kirps of Credit Suisse First Boston.

The new interest in the ECU fits in with the view

of some professionals that fixed-income instru-ments make more sense than common stocks when it comes to strategies for cashing in on currency moves. They note that returns on common stocks reflect the fortunes of individual companies. A shift in value in a country's currency can have widely different effects across the spectrum of industrial activities, complicating the task of sort-

industrial activities, complicating the task of sort-ing out the winners from losers in common stocks. The returns on fixed-income instruments such as bonds are more directly linked to broad economic trends rather than to specific industrial or corpo-rate developments. Thus they are regarded as "pur-

er plays on currency moves.

The snag is that most major alternatives to the dollar have flaws. Few investors are willing to abandon the high coupons on dollar bonds for the meager returns on bonds in Deutsohe marks or yea. While bonds in British pounds offer more generous coupons than dollar securities, the wild gyrations

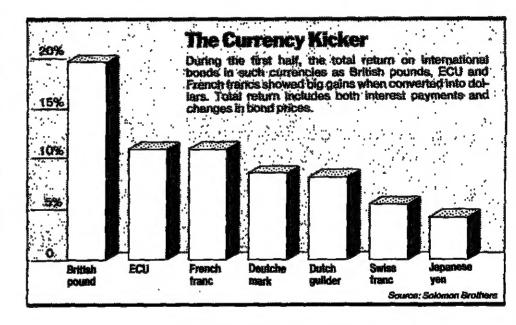

of sterling unnerve many investors.

With the ECU, investors can avoid such tough choices by, in effect, using a weighted basket of all European currencies. The ECU stands to gain nearly as much as the Deutsche mark in periods of dollar weakness, say the professionals, yet the yields on ECU bonds are substantially higher than on Deutsche mark bonds.

According to Salomon Brothers, the investment firm, the average yield to maturity on 10-year ECU Eurobonds was about 9.04 percent at the end of July. That was about 2.3 percentage points above the yields on Deutsche mark bonds and about 2.4 percentage points below the yields on Eurodollar

The reasons lie in the weightings assigned to the nine currencies in the ECU. The formula gives heavy weighting to such widely held currencies as the Deutsche mark and British pound. But inclu-sion of more narrowly held currencies such as the

# Discount Brokers Lure Investors Outside U.S.

By Barbara Rosen

ALL Street's "big bang" of 10 years ago, which ended the era of fixed brokerage commissions, gave birth to new a type of no-frills firm that offered to make trades for investors at fees far below those of the big-name "wire house" brokers. By forgoing research and other services, these discount firms kept costs low and passed the savings along to investors as reduced commissions.

Over the years, the discounters became a permanent feature of the U.S. financial scene, with other institutions such as commercial banks and mutual funds also offering stripped-down trading in stocks. The U.S. Securities Industry Association estimates that discounters, which now include some firms that offer minimal advisory services and whose fees are only marginally below those of full-service firms, handled 19.2 percent of the trading volume

on U.S. exchanges last year.

Partly because most discounters do not maintain offices abroad, this way of trading U.S. stocks has been generally inaccessible to investors outside the United States. The uncertainties of dealing by telephone, problems of time zones and unfamiliarity with the discount approach discouraged investors abroad, who tended to trade through . the foreign branches of U.S. full-service brokers or through a bank. But recently, the discounters appear to be taking steps to lure the business of investors in Europe and Asia.

We'd like to be able to serve investors around the

world," said Hugo Quackenbush, senior vice president of Charles Schwab, a subsidiary of BankAmerica Corp. Schwab, the largest U.S. discount broker with more than

one million accounts, already has an office in Hong Kong and hopes to expand into Europe next year, possibly to Britain or West Germany, he said.

Quick & Reilly, another big U.S. discount broker, hopes to offer computerized trading services and a stock informa-tion package to investors outside the United States. Using a modem, an investor who has a personal computer could tap the services through phone lines. Leslie Quick 3d, vice president of the firm, said a handful of investors outside the United States are already using the service.

But the trailblazers in the field appear to be offshoots of smaller U.S. firms such as Andrew Peck and Eastern Capital Fastern has been in London for four years, and Andrew Peck opened its office last spring. Matthew Shalloo, a vice president of Andrew Peck, said the firm wanted to be closer to its clients. Trans-Atlantic telephone calls are fine "until some small thing goes wrong and you can't go down and talk to the person," he said.

Investors who feel savvy enough to pick their U.S. stocks without the research and advice offered by the full-service brokers can roll up big savings by using discounters.

"There's a pretty enormous difference in terms of the commission rates," says Walter Prime, an American who is managing director of Prime Grieb & Co. in London, a corporate finance firm. "I would reckon the savings is generally 50 percent."

"It's absolutely crazy for someone to be paying much much higher commissions if you don't need the big firms," he said. "And frankly, you'd do better using a dart board than some full-service brokers."

A quick check of various commissions for trading 100 shares of stock costing \$50 each gave some sense of the (Continued on Page 8)

The Board of Directors of ENSERCH Corporation on July 30, 1985, declared a regular quarterly dividend of 40 cents per share of common stock, payable September 3, 1985, to shareholders of record August 16, 1985.

**ENSERCH** EXPLORATION

# A Focus on Assets Boosts Tokyo Property Shares

OR YEARS Japanese real estate stocks were noted for their stability. They were classic defensive stocks, promising limited gains with minimal risk. Mitsubishi Estate, with its blue-chip properties and ties with the huge Mitsubishi group, typified the sector's solid aspects. Its price hovered in the 300-to-400-yen range. Its all-

Its price hovered in the 300-to-300-year lange. Its artime high was 550 year in the mid-1970s.

All that changed this year. In March the stock reached 650 year (\$2.70) and by May it had shot past 800 year. It finally peaked at 970 in July before falling to around 850 earlier this month, a drop some falling to around 850 earlier this month, a drop some malysts feel may be a short-term correction

The performance of Mitsubishi and that of many spanese real estate stocks in recent months reflects Japanese real estate stocks in recent months reflects a new theme running through the Tokyo Stock Exchange — identifying latent assets. These are primarily underdeveloped properties held by companies that analysts believe are not fully valued and have yet to be reflected in share prices.

The market's search for hidden assets is largely a consequence of its current preoccupation with do-mestic issues. Trade friction with Washington and the slowdown in economic growth in the United States have soured the market's appetite for blue-chip exporters. As a result, properties and other sectors with large real estate holdings, such as railways, warehouses and non-life insurance compa-nies, are textbook examples of the domestic shares that have been thrust into the spotlight.

Moreover, these stocks are being pushed higher by expectations that the government will revise building codes and tax rules to encourage sales and development. This would be an inexpensive and painless way to stimulate domestic demand and make the economy less dependent on exports.

Although these stocks have been outperforming the generally sluggish Tokyo market since May, some analysts think the sector still has room to grow, particularly the so-called "Big Three" property stocks, Sumitomo Realty and Development, Mitsui companies are well-managed, own impressive prop-erties and, analysis say, are in the midst of develop-ing projects that could insure good returns well into the next decade. For example, Mitsubishi is under-

the next decade. For example, Missionsh is undertaking an ambitious 25-year project to rejuvenate a large expanse of the Yokohama waterfront.

Some analysis contend that if the market accurately valued all hidden property assets held by Mitsubishi Estate, including the land under Tokyo's pricey Marunouchi business district, its share price could be at least 3,000 yen.

Such optimism is not universal. Others believe the sector is about to peak or already has. Shares trading on the basis of hidden assets, they caution, are especially vulnerable to a sudden switch in market mood. And there has already been some talk that the market overreacted to export fears. "This area is volatile now, and timing is very important," said Peter Tasker, an analyst with Grieveson Grant. Indeed, prices have fluctuated wildly in recent

months for some of the small real estate companies with comparatively few shares available for trading. Osaka Tatemono, which owns choice land in Osaka, traded at 500 yen in early May when the sector was just heating up and shot to 2,200 in early July. It has since dropped to around 1,900. Tokyo Tatemono. which also owns prime urban land, experienced similar gyrations, jumping from 500 to a high of around 1,300 and back down to the 850 range. that manage money for institutions, are one reason for the drop, analysts say. But a number of observers

think these issues have good long-term prospects. "In the last three months the market has been overextended in some areas," said Tetsuhiro Miyake, a manager for Nomura Securities, who cited certain railways, warehouses, hotels and other shares boosted by latent assets and little else.

"Some stocks like Tokyo Tatemono and Osaka Tatemono were priced unjustifiably high. But for the sector as a whole, the growth should go into the

Some of the fundamentals still seem to favor real estate stocks. The price of premium property is rising by as much as 30 percent a year in Japan. This is especially true in Tokyo, where office space is growing scarce because of the increasing number of foreign companies who want to set up shop and because of the expanding use of office-a equipment, which requires added space. Moreover, Japan is showing modest investment growth in three key areas — housing, urban development and big public-works projects. Housing starts have been surprisingly strong, fueled by the lowest home-loan

Railroads and warehouse companies, particularly those linked with one of the large industrial groups, such as Mitsubishi Warehouse and Transportation. also are likely to benefit from future building and development, according to analysts.

Two government projects — a bridge to span Tokyo Bay and a new airport in Osaka — have already affected the share prices of a number of railroads whose land abuts the projects in each city. Keihan Electric Railway and Nankai Electric Rail-way have been the chief beneficiaries, and a number of analysts project further gains. At the same time, the big warehouse companies are starting to raze dockside warehouses, replacing them with high-rise

Analysts camion, however, that such shares can be chancy. Railroads are especially risky because they tend to make little money from their government-regulated fares and may wait years to develop their land. "Investors have to look at these on a case-by-case basis," Mr. Tasker said. "The land under consideration needs a potential."

litsubishi Estate Weekly share price in yen Mitsubishi Estate owns the land under Tokyo's Marunouchi business district. Such high-grade assets have enhanced its standing with investors.

# Discount Brokers Lure Investors Outside U.S.

the savings potential. Merrill Lynch would have charged \$92. Another full-service broker, E.F. Hutton, put the fee at \$103.53. In the discount category, Andrew Peck said it would charge \$56 and Eastern

Even the full-service brokers acknowledge that discounters make sense when the issue is strictly ommissions. But they note that many investors outside the United States, whether American or non-American, feel distant from the U.S. markets and may need professional guidance on selecting

Some full-service brokers also offer various financial packages designed to make it easier for clients outside the United States to manage their affairs. Merrill Lynch, for example, offers a managed-asset account tailored to the investor abroad. In addition, Americans may prefer a broker who offers investor-

directed Individual Retirement Accounts, a product not all discount brokers provide.

The issue seems not to be whether discount or full-service is better, but which is appropriate to an investor's circumstances. The choices are not mutually exclusive. Some investors maintain an account at a full-service firm and at a discount broker.

Most of the opportunities for discounters outside the United States tend to lie with expatriate Americans. "They've got cash, and they're familiar with the stocks, and they know what to do," said Robin

Relph, managing director of Eastern Capital. As with any financial relationship, investors should find out as much as possible about a discounter before opening an account. It is important to obtain details on the firm's financial status and how orders are executed and trades are cleared. Making sure the firm is dealing with an established bank is a key point. The most reliable discounters will be members of the Securities Investor Protection Corp., an industry-sponsored group that in-

Unfortunately, discount brokers structure their commission schedules in such different ways that it is often difficult to tell which one will be cheapent for an investor's particular pattern of tracing. There are two basic approaches. "Value" brokes charge a percentage of the dollar value of each transaction; the commissions usually decline as the value of the transaction goes up. "Share" brokers commissions.

transaction goes up. "Share" brokers' commissions are based only on the number of shares traded.

The two pricing methods can have vastly different effects on the costs of transactions. The investor who typically buys high-priced stock tends to save, more with the "share" approach, while the investor who buys low-priced stock tends to determine with a "value" system. One way to determine which is appropriate is to draw up a list of likely transactions and compare the commissions under various fee and compare the commissions under various fee

price fluctuations," said Philip Baillieu, a trader with Wogen Resources Ltd. in London. "It upsets their own production plans and also does the same for consumers, who don't want to be paying dou-ble for what they paid at the beginning of the year."
Still, demand for specific strate-

gic metals sometimes creates an erratic market. Earlier this year rhodium prices jumped from \$800 an cumce to \$1,200 on the news that European countries were planning stricter emission-control systems on automobiles. It has since settled back to about \$790. The potential demand for rhodium, a key component in catalytic converters, spurred analysts to predict that annual world rhodium consumption might jump 17 per-cent to 210,000 ounces by the early 1990s if the Europeans chose cata-

lytic converters. · Investing in strategic metals is tricky. Unlike with most commodities, investors cannot leverage the purchase of a strategic metal. They must buy the whole physical amount through a broker and then make additional payments for shipping, storage, assays and inthe investment is part of a man-Those costs and the risks associ-

ated with metals trading have led to a decline in the number of private investors as well as a corresponding drop in the number of brokers who deal in these markets. For example, Prudential-Bache Securities is the only major U.S. brokerage firm that offers strategic metals as an investment alternative and does so with ample

"We do not think this is the type of investment the client can trade in and out of like IBM or AT&T," said Fred Wasserspring, executive vice president of Prudential-Bache Metal Co. in New York. The commissions are bigger and it's not an actively traded market. Some people joke that it's traded by appointment."

The joke is well put, for the biggest problem facing private investors is not buying but selling strategic metals. Most purchasers are large companies or countries like the United States that will turn to producers to increase their stockpiles. "If you're Pratt & Whimey and you need cobalt for

If no member of your household has subscribed to Value

jet engines, you're going to be buy-ing a serious amount of cobalt," said Mitchell Posner, co-author along with Philip Goldberg of The Strategic Metals Investment Handbook."

Finding a buyer does not come cheap. Although brokers are loath to discuss commissions, they say it takes little common sense to de-duce that the commissions on a \$25,000 contract for silver, a very liquid commodity, would be significantly cheaper than the com-missions for a similar amount of vanadium or bismuth. "In our industry, commissions run between 10 and 12 percent on a normal \$25,000 strategic-metals contract," said John Rockenstein, a vice president at Troy Anthony and Associates in Costa Mesa, California. "For silver, it's more

like 4 or 5 percent." Despite the small size of the \$10-billion a year strategic metals market, there is still ample room for unscrupulous brokers who will gladly sell anything to the naive investor. In the wake of the 1979-80 metals boom, so-called "bucket shops" sprang up charging high prices for small amounts of strate-

Even with the bear market, ome brokers have been known to play up the "specialized nature" of strategic metals trading, where there can sometimes be a 10-percent differential between the bid and ask price. To compound problems, traders do not have to be licensed to sell metals, and they have been known to sell amounts

gic metals that were never deliv-

### CAPITAL STRATEGY **FUNDLIMITED**

that are too small to be of any use to anyone except the plainly curious. "One pound of cobalt is a nonmarketable commodity. It would cost more to ship," said Mr. Wasserspring at Prudential-

To counter bogus practices and safeguard its own reputation, Pru-dential-Bache has investors sign a "strategic-metals suitability let-ter," which outlines trading risks. The company also strongly recom-mends that potential investors shop around and compare prices as well as metal marketability be-

fore putting any money down.

James Gourlay, director at
Gourlay Wolff & Co., asserts that if his company sells metals to an investor, then the company will buy the metal back at the going price. "We will always make a market for somebody," he said, adding that investors should note a member of the London Metals Exchange. "We realize it's no good somebody buying this material and finding out they can't sell it." Other traders recommend that

the potential investor take a good hard look at the market before getting involved. Because of long dormant periods between metal price fluctuations, experts contend that only the very rich can afford to play. "People should qualify themselves," said Mr. Posner. "These are markets only for someone who can afford to tie their money up — essentially, it's dead equity — and be able to cover the ongoing costs of insurance and

To James Knealsey, president of Cambridge Commodities Corp. in Cambridge, Massachusetts, that means someone whose net worth is around \$1 million and has an

### A Strategic Metal Primer

REIODSSIIK: The most expensive member of the platinus group, its resistance to corrosion and ternish are making its uses more widespread in the optical equipment indeatry, but its main applications are in automotive products. Primary producers are the Soviet Union and South Africa.

CADESUSE: A by-product of zinc processing. A highly twic metal, efforts are being made to reduce its use in pigments and stabilizers. Canada and the United States have the biggest reserves.

COBALT: its heat resistance, strength and magnetic properties make it a vital alloy in serospace and electrical products. Primary reserves are in Zaire and Zambis. The Soviet Union is also a big producer.

MOLYBOENUM: An important alloy that increases the strength, durability, and corrosion resistance of iron and steel for military and industrial uses. The United States is the largest producer.

VANADELISE Used as an alloy to increase the strength in aron and steel products. It is also combined with ti-tanium-based alloys for jet engines and aircraft frames. South Africa and the Soviet Union are the big-

TITANSUM: Because of its high strength-to-weight ratio, it is used in jet engines, airframes and missiles. The Soviet Union is the largest producer.

GALLILAN: A silvery white metal used chiefly by the electronics industry. Gallium compounds are used to produce light-emitting diodes for visual display panels in calculators, radios, televisions, clocks and instuments. Switzerland is the biggest producer.

# Swiss Rules Squeeze the Lakeside Scenery Market

Without some clout, foreign buyers face major complications

By David Tinnin

UPERB scenery is Switzerland's most salable commodity, and nowhere is it in great-er demand than along the vineyard-lined shores of Lake Geneva. Freddy Heineken, ine Datch beer baron, owns a villa there. So does King Fahd of Saudi Arabia, Audrey Hepburn, the conductor Mstislav Rostropovich and a host of the world's rich and famous.

Yet for foreign real estate investors looking for lakeside property, Switzerland may not be the "golden island" that Swiss bankers describe. The problem is, so many non-Swiss have bought property along Lake Geneva that the Swiss themselves feel switzered cut. squeezed out. As a consequence, the federal government has enacted restrictive laws that are putting a light squeeze on foreigners who want to enjoy the scenic panoramas, mild climate and well-policed tranquility of Switzerland's Riviera.

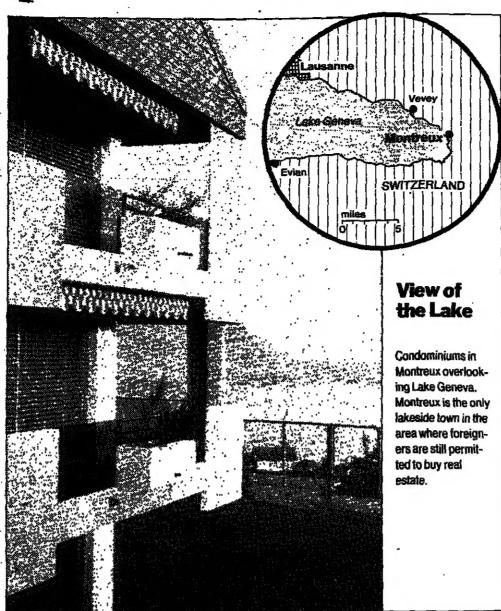

Lake Geneva with its international flavor remains the prime real estate attraction in Switzerland. Property-appreciation rates average 6 percent to 8 percent a year compared with a Swiss inflation rate of about 3 percent. But under current regulations, most lakeside towns are closed to foreign purchasers. The total number of dwelling units to be sold to non-Swiss buyers this year is limited to 200 in the lakeside Canton of Vaud, which includes such towns as Montreux, Lausanne, Morges, Nyon and Rolle.

Swiss officials, real estate agents contend, divide potential buyers into two categories: the rich and famous, whose presence brings wealth and prestige

to Switzerland, and others, whose entry should be scrutinized and drastically limited in numbers.

For the potential buyers who are judged in Bern to belong to the desired category, the usual barriers to real actule commercial matteriously disappear. to real estate ownership mysteriously disappear, agents say. Suddenly, an authorization materializes to buy this or that old château for a sum ranging from 3 million to 5 million Swiss francs (\$1.25 million to \$2.1 million).

Even then, Swiss real estate agents say, the buyer is well advised to spend a sizable amount of time and money in the country as evidence of his appreciation. While on visits to Geneva, one canny European billionaire regularly parks his Rolls-Royce illegally so that the tickets, duly recorded in police computers, will bear testimony to his presence in Switzer-

For other would-be purchasers, the opportunities are limited and less glamorous. The Swiss government's aim, observers say, is to drive the newcomers into areas already heavily populated by foreigners. The only lakeside city still open to non-Swiss pur-chasers is Montreux, about 53 miles (85 kilometers) from Geneva at the lake's eastern end. One of

Switzerland's traditional tourist attractions, Montreux is a bustling convention center, host to the annual jazz festival and the classical September Musical, as well as home to dozens of finishing

schools for girls and rejuvenation clinics for men. Since Montreux is wedged between the lake and the Alps, the level area suitable for construction is so scarce that already the city is becoming overbuilt. Of the two most attractive new buildings currently offering apartments to foreigners, one is tightly placed between older, less attractive buildings, and the other is perched high upon the steep mountain-side, a location that offers a fantastic view but poses

daunting transportation problems.

Purchase prices in Montreux rival those in Manhattan. For a three-bedroom apartment, the buyer must pay at least \$250,000 to \$350,000, depending upon the height of the floor and the view. An apartment with a lake vista commands a premium of 20 percent or so above one on a lower floor that looks out only on neighboring buildings. Moreover, foreigners may face fees for additional paperwork and services that could add 5 percent to 10 percent to the base price.

Those are not the only extra costs. The annual maintenance and bill-paying services provided by the building administrator amount to about 1 percent of the initial purchase cost. The apartment owner must also pay a small charge for fire insurance. More significantly, the foreigner is hit with less advantageous financing arrangements than his Swiss neighbor. While the Swiss may take out a first and second mortgage for up to 80 percent of the purchase price of a new dwelling at less than 6percent interest, the foreign buyer usually can raise no more than 50 percent of the price on a single first mortgage and the rate is no less than 6.5 percent.

HERE are other financial disincentives. The foreign owner of a Swiss apartment cannot recover some expenditures by subletting the property for long periods. The Swiss police, who keep a discreet but watchful eye on new foreign buyers, tolerate at most only subleases of two or three months. Furthermore, for at least three weeks each year, the owner or his immediate family must live in the apartment.

Paradoxically, ownership of an apartment does not entitle the purchaser to a coveted Swiss residency permit. Like other tourists, the apartment owner may stay in the country for three months without a visa, but then must leave for at least a few days

before re-entering.

Also, for the first five years after the purchase, the owner is forbidden from selling the property. After that, it can only be sold to a Swiss. Since real estate is plentiful and unrestricted for domestic buyers, a Swiss purchaser is unlikely to be willing to pay the higher price that a foreigner would need to recover

Despite the disincentives, purchase orders from foreigners continue to pour into Geneva and Lausanne real estate offices. Because of slack oil prices, Arab buyers, once the most active, for the moment have largely dropped out of the market. But their absence is offset by a surge of orders from Hong Kong. Real estate agents say Hong Kong residents are looking for a new haven after China takes over toward the end of the century.

# Have all the advantages of a bank account in LUXEMBOURG, without actually being there.

# The Perils of Specializing

By Edith Cohen

New York S investment dollars pour into mutual funds in the United States in record amounts, they are finding their way into what has become a popular product, the specialty fund. These are funds that seem to fly in the face of the conventional wisdom and appeal of mutual funds, namely, that a broadly diversified portfolio, managed by professionals, is the key to success.

Instead, the specialty funds fo-cus on a particular industry, such as health care or utilities, and the investor essentially bets on being able to target an arena for dramatic growth. Although the possibilities for growth may be greater than in a fund diversified across many industries; by the same token, the chance of large fluctuations in net asset value make spe-cialty funds decidedly not for

"The risk-averse investor should stay away," said Jeremy Duffield, vice president for prodnot development at Vanguard Group of Investment Cos., which offers funds that specialize in energy, precious metals, health care, technology and service-oriented stocks. They are for the more sophisticated investor.

While the specialty funds account for only a small percentage of the total amount invested in mutual funds, they are clearly capturing the imagination of investors. Although as group their per-formance this year has been almost identical to the performance of equity funds in general, specialty funds have dominated

the list of top performers.

Michael Himes, equity funds product manager for Fidelity Separate the specialty lect Portfolios, says the specialty funds represent a "rapidly growing minority among all mutual funds," increasing about 10 percent in the past year. In the four years since Fidelity has been offering specialty funds, Mr. Hines says, well over 100,000 investors have put more than \$1 billion into those at Fidelity alone. In addition to the more popular sectors, Fidelity also offers funds that concentrate in defense and aerospace, leisure and financial services.

The appeal is easy to under-stand. "By targeting by being fo-cused, you get all the advantages an individual sector has. Sectors move irrespective of the market." Mr. Hines said, so there is always a sector with something to offer.

investors tend to choose a specialty through one of three approaches: by choosing an area that is already on the move and that they feel will continue to move; by taking the contrarian view, going bottom lishing as Mr. Hines puls it, and choosing an area that is not currently doing well but that seems likely to move next, or by choosing an industry the investor

understands well, perhaps one he works in, for example.

According to Mr. Hines, it is usual even for individual in**Taking the Narrow View** 

Average performance of mutual funds grouped by apecialty based on change in net asset value, including dividends, from the start of 1985 to July 25.

vestors to cluster stock purchases around one industry or another. We tend to see people liking a particular industry, and investors know that industry groups tend to move together," he said.

Given that orientation, Mr. Himes says the specialty funds of-fer broader diversification than an investor is likely to construct on his own. Moreover, the big fund groups, like Fidelity and Van-guard, allow investors to move in and out among their specialty funds, offering a great deal of mobility at low cost. At Vanguard an investor can move among its sec-tor funds at any time, with no fee. At Fidelity, an investor can switch among the Select Portfolios four times a year at no cost. There is a \$50 fee for additional switches. 'All the individual has to do," Mr. Hines said, "is pick the sector."

But that is one point at which specialty funds pick up critics. Glen King Parker, publisher of Mutual Fund Forecaster in Fort Lauderdale, Florida, says the essence of mutual funds is to provide the help of professional management in three basic decisions: market timing, industry concentration and specific stock. "The manager of the [specialty] group," he argued, "is abdicating the responsibility for one of those decisions back to the investor and saying, You have to decide on the industry."

On the other hand, Mr. Parker sees a decided advantage for fund managers. "From the point of view of the manager, the more specialty funds you have, the bet-ter chance you have of one of them being among the top 10 performers. The less diversified a fund is as to the number of industries represented or the number of stocks. the more likely it is to be an 'outlier in performance," he said. If just one fund is a winner, he says, people will be drawn in the next year, and if one is a loser, "everyone

tends to ignore it." For example, in the first six months of 1985, Fidelity Select's health-care portfolio ranked as the top performer among mutual lunds, up 46.93 percent, while its technology portfolio was fifth on the list of worst performers, off

Analytical Services Inc. Specialty funds also tend to be

more volatile than broader mutual funds. In practice, according to A. Michael Lipper, president of Lip-per Analytical Securities, "most specialty funds are born after there is good performance. But the period of superior performance for a sector doesn't last as long as a period of superior performance for more generalized funds." And Mr. Parker says that trusting to a specialty fund rather than to the management of a portfolio offered in a general mutual fund merely "assumes that what happened in the past will happen in the future."

GOOD example of the tors Natural Resource Fund. It led Lipper's list of mutual fund winners in the first quarter with an increase in netasset value of 39.53 percent. In the second quarter, the fund was the second-ranked loser, down 15.7

Mr. Duffield of Vanguard, acknowledged that "specialty funds aren"t for everybody, but they meet the needs of the more aggressive investor who follows the mar-ket closely, finds an industry appealing and wants to get more diversified play in the future."

The key seems to be how closely an investor is able to watch such funds. Some like to use them when they sense that an industry is about to take off, Mr. Duffield said. "But not everyone is that attentive, and if you don't want to be attentive, you shouldn't be in them," he cantioned. Mr. Hines agrees. "It is not an investment to disregard," he said. "It calls for a watchful eye on the investor's

However sophisticated the investor, warns Mr. Lipper, "a specialty fund is not an investment program. It can be part of one, but the balance of other balance of other investment and the timing of when to use the specialty fund is the responsibility of the investor."

Mr. Hines agrees. "Ultimately, the decision is always up to the individual, who should always feel strongly about an investment." **Swiss Bank Corporation:** 

# Three times a day, we bring an issue to market.

"There are a number of reasons why so many borrowers ask us to market their new issues. First of all, professional design increases the ultimate success of the issue. Then there's our acknowledged placing power, and finally, our group's distribution capabilities are recognized as among the best, worldwide." Dr. Christian F. Puhr, Senior Vice President

And it's not surprising, either. Swiss Bank Corporation started business as a securities issuing bank, so we have a long historical perspective on how the modern markets evolved and how they work. Over the last hundred years and more, we have acquired a good deal of expertise in providing financial assistance to many different borrowers from all over the world and in all major international capital markets.

If you are thinking about your next funding operation, talk to us. We will help determine what instruments best meet your financial requirements. Through one of our operative units in Basle, London or New York, we can help.

# **Movie Deals** Often a Shot In the Dark

By Leslie Whitaker

ONG ON glitter, short on gold. That is the reputation of movie limited partnerships, offerings that have tempted thousands of investors to gamble on Hollywood's ability to produce blockbusters. Structured much the same way as oil and gas limited partnerships that raise money for energy exploration, movie partnerships bank on hitting a boxoffice gusher and benefit from tax breaks in

But while these public offerings have managed to raise huge sums for movie studios and generate hefty commissions for brokerage firms, critics say that they offer little to the individual investor. Despite the fact that only one in six Holly-

wood films is profitable, movie limited partnerships have become increasingly popular in the past several years. Delphi Film Associates, a division of Merrill Lynch, has raised almost \$180 million for Columbia Pictures Industries Inc. and Tri-Star Pictures Inc. through four offerings in three years.

This summer Walt Disney Studios hopes to raise \$200 million through its second publie offering put together by Silver Screen Partners, a unit of E.F. Hutton. Investors. who can spend as little as \$5,000, will be party to profits from four children's movies, including "The Black Cauldron" and "Re-turn to Oz," scheduled for release this summer, and 10 to 15 adult films that will be released next year.

"My view is that there are definitely better ways to make money," said Larry Scherzer, an entertainment-accounting analyst with Arthur Young & Co. He sums up the attractiveness to investors in one word: "Sizzle." "We try to steer our clients clear of movie

partnerships," said Barbara Russell, an analyst with Prudential-Bache. "The statistics show that the investor has not fared very well." Movie partnerships typically lend money

to one or two movie companies for use in the production of a slate of movies. Like the movie studios themselves, partnerships like to spread their risk over a number of productions. General partners, who manage the partnerships, say they keep a close eye on the budgets and production schedules of films that they have an interest in.

But prospectuses, and the potential rewards, vary widely among offerings. Some entitle investors to no more than 30 percent of the proceeds from domestic distribution, generally the most lucrative source of a film's income, and a much higher proportion of the smaller sums generated by, say, the sound

Many investors have benefited from sub-

Sylvester Stallone in 'Rambo.' It's a hit, but investors will have to wait.

through to the partners. U.S. investors in an offering in 1982 by Delphi, which included an interest in the smash hit "Tootsie," were able to take a federal income-tax deduction equivalent to about 72 percent of their investment that year. By May of this year, they had received cash distributions of almost 40 percent and tax credits totaling 7 percent of their original investment. Lewis Korman, Delphi's managing partner, feels certain that revenues will eventually exceed the partnership's original contribution.

Most brokerage firms contend that profits will show, but not until several years down the road, when all of the movies have been released and sold to profitable secondary markets, such as television and video cassettes. Exorbitant production costs are part of the reason. Sylvester Stallone's latest hit, "Rambo: First Blood Part II," which has generated more than \$140 million in receipts so far, cost \$30 million to produce. Investors in Delphi IV, which has an interest in the film, still cannot expect to see a profit for

several years.

Another reason for the clusive nature of profits from movie partnerships is the high percentage that studios take off the top for distribution costs. High distribution deductions mean that a film must earn three times its production cost - a rare event - to efit investors.

Movie buffs, who are well acquainted with box-office track records and think they can steer their money toward productions featuring successful actors or directors, may also want to think twice about movie partnerships. Investors are unable to choose a partnership based on its planned projects, because most are undisclosed at the time of the offering. And even if some of the films include big names, past success is rarely assurance of future profitability in Hollywood.

Although the tax exemptions offered by movie limited partnerships have yet to be challenged by the Internal Revenue Service. that real possibility presents an added risk. And now, numerous proposals in Congress for revamping the tax system place the tax breaks in further jeopardy. Consequently, some offerings have been

structured with built-in guarantees for a return of the principal, thereby minimizing the importance of tax breaks. Silver Screen II, for instance, guarantees investors a 100-percent return at the end of 15 years. Because there is no risk to investors, the IRS will not accept tax deductions.

"I structured Silver Screen partnerships with guarantees because I do not feel that the industry is a tax-driven industry," said Roland Betts, president of Silver Screen. Mr. Betts declined to comment specifically on Silver Screen II because of Securities and Exchange Commission regulations barring him from discussing an offering that is still

VEN partnerships that rely on tax deductions to entice investors have restructured to include guarantees. Delphi IV, which raised \$40 million for Columbia and Tri-Star Pictures this summer, is designed so that investors' money is returned from unprofitable films before distribution costs are paid to the film company. Delphi's first three offerings deducted investments in unprofitable films from the earnings generated by the box-office hits. "We think the risk of loss is substantially reduced," said Delphi's Mr. Korman.

Ironically, the most profitable movie part-nerships may be those devoid of glamour. Investors in Troma Co., an independent producer of low-budget, slightly raunchy come-dies, are not courted with slick prospectuses that discuss the past hits of Hollywood stars. Troma's few private investors commit much larger sums than those accepted by public offerings. But, according to published re-ports, their return is substantial. "Squeeze Play," a film Troma made in 1982 for \$300,000, grossed \$1 million at the box office and returned a 50-percent profit to investors

"We don't have the high star salaries and production costs," explained Lloyd Kauf-man, Troma co-founder, whose office is in a fourth-floor walk-up in midtown Manhattan. "And we can't offer our investors any big cocktail parties. When we've had some food, we've gotten it for free," he said.

Stocks on the New York, London and Tokyo exchanges that

showed the largest percentage gains and losses in July,

ALLING interest rates and a growing most supply and a growing money supply continued to spur New York markets in July, despite widespread concern about Congress's mability to pass a deficit-reducing budget. The Dow Jones Industrial Average hit a record at 1,359.54 on July 19, but closed the month at 1,347.45, only 7 points above June's closing. adard & Poor's Composite Index closed less than a point lower

than in June at 190.92. "I think we traveled a long way to get nowhere," said Hugh Johnson, president and head of investment strategy at First Albany Corp. He said most of last month's activity reflected investors shifting from interest-sensitive stocks, such as utilities, savings and loans, insurance and banks, to cyclical stocks, such as metals, consumer durables, some retail companies and basic industries.

Analysts say the change in strategy reflects the market's conviction that the U.S. economy will rebound in the second half. Last month's news that the gross national product rose only 1.7 percent in the second quarter, sharply lower than the previous govern-ment estimate of 3.1 percent, barely stirred the market.

Levi Strauss emerged as the New York Stock Exchange's top performer last month after acceptng a buyout offer from its president, Robert Haas, and members of his family. They will purchase the 22 million shares they do not

already own at \$50 a share.
Phelps Dodge was a close second. Aside from the marker's faith in the company's recovery, Value Line analyst Tom Au said last month's interest was fueled by forecasts of a rise in copper prices next year. July's announcement of strong second-quarter earnings was behind the gains scored by toy manufacturer Tonka Corp.

Topping the list of worst per formers was A.H. Robins. The pharmaceutical manufacturer continued to wrestle with settlements related to its Dalkon Shield contraceptive diaphragm. Last month a federal judge declined the company's request to consolidate punitive damage claims.

AMF Corp., a manufacturer of industrial equipment and leisure products, saw heavy selling in response to the terms of its takeover Irwin L. Jacobs of Minstar Inc. Mr. Jacobs, who gained control of the company by purchasing 12.5 million shares at \$24 a share, offered 10-percent subordinated debentures for the remaining shares. Analysis said investors preferred to sell their shares for cash. Applied Data Research saw its stock price slide after it reported a second-quarter loss of \$3.1 million.

The American Stock Exchange index finished the month at 233.92, up slightly from last month's 230.89. Leading the exchange was Martin Processing, a

manufacturer of carpet and upholstery dyes, which announced second-quarter carnings that were much higher than last year's.

In London, the market "generally wanted to fall" in response to the pound's strengthening against the dollar, said Mark Williams, an analyst at Vickers da Costa. Although sterling's gains gave the neuver interest rates lower, most analysts were concerned about its adverse impact on the export earnings of big British concerns.

Total return measures both the changes in the prices of securities and the income they provide, either in dividends or interest. Gains and losses were measured by comparing market indexes with their levels a year earlier. The chart does not take into account taxes or inflation.

Nevertheless, the market moved higher, helped in part by takeover rumors. The Financial Times All-Shares Index ended the month at 606.45, up 10.91 points over June's close after dipping to a low of 591.23 in mid-July.

TI Group, one of Britain's big-gest engineering concerns, showed the steepest gain after reports that a group led by Evered had made a bid for the company. Bowater Industries gained on news that Hanson Trust had built up a 7-percent stake. Allied Irish rose on remors

that it was planning to sell its stake in First Maryland Bancorp. in the United States. in Tokyo, the Nikkei-Dow aver-

# As the Dollar Sags, the Appeal of ECU Grows

(Continued from Page 7) which high interest rates are paid, pulls up the yields on ECU invest-

Adding to the ECU's appeal is the dramatic increase in the number of new bond issues in the composite currency. In 1981, two years after the EC ministers agreed to create the ECU as a unit of account for official business, there were only five issues totaling the equivalent of \$208 million. In 1984, the number of new sues shot up to 60, totaling \$2.47 bil-

So far in 1985, the ECU is running a close second to the Deutsche mark as the most important currency for new Eurobond issues after the dollar. Besides government issuers, such industrial giants as Chrysler, Philips and Fiat have raised funds in ECUs, along with more glamorous names such as Walt Disney and Club Mediterrance. The EC has even floated an ECU bond in the U.S. domestic

The international role of the ECU seems set to expand further. In April, EC finance ministers perced to allow central banks in non-EC countries to use the ECU is a reserve currency. There are recommended ICU bonds. Some and raising the value of other cur-

Total return for 12 months

ended June in dollar terms

Some of the anxiety can be one percent against the dollar.

In addition, Mr. Kirps argues that the number of ECU currents in the European Monetary traced to wornes about realignments in the European Monetary System, which links all the ECU component currencies except the British pound. Under the system, EC governments are committed to taking steps to keep their currencies' values within agreed upon ranges. But when pressures in the foreign-exchange markets build, such as they did last month, member governments can be forced to change the relationships among their currencies. The July 20 realignment resulted in a devaluation of the Italian liva.

Despite the occasional realignment, the European Monetary System has meant that the ECU has remained fairly stable against most European currencies. Though that is far less true for the ECU-dollar relationship, bankers generally dismiss the impact of realignments as long as the dollar continues to move downward slowly, without a crash.

In last month's realignment, they note, the 8-percent devaluation of the lira was achieved by reducing the Italian currency's value by 6 percent within the EMS

 ${\mathcal F}_{\mathcal F}$ 

-

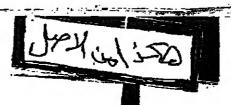

cies that could be categorized as weak has declined, giving it more stability.

Looking ahead, Michael Brett. currency specialist at the London brokerage De Zoete & Bevan, foresees "lots of weekend meetings and gnashing of teeth, but it's only glitz. There will be small problems when the Spanish and Portuguese currencies join the ECU, but their weightings will only be minor,"

Investors who venture into the ECU bond market will find that "the system is geared to large pri-vate investors." according to Mr.

Most issues are denominated in units of 1,000 ECUs, which mean a cost of about \$700 to \$800 per bond. Though the Belgian dentist of Euromarket lore often invests in small amounts, it is usually "commission-ineffi-cient" to purchase fewer than \$15,000 of bonds, says one dealer.

The market is dominated by banks in Belgium, Luxembourg

BUSINESS/FINANCE

# Market Was Ho-Hum Over Speculation on U.S. Rates

By CARL GEWIRTZ

tional Herald Tribune ARIS - The prospect of a renewed decline in U.S. interest rates, normally a powerful incentive for investors to buy dollar-denominated Eurobonds, failed to excite the international capital market last week. The effect such a rate decline could have on pushing up bond prices was overshadowed by fears that it also would send the dollar's value

skidding on foreign-exchange markets.

Although analysts remain divided about the outlook for the U.S. economy and the drift of interest rates, expert opinion appears to be shifting in favor of a further rate cut to get the

He said Friday that, "the scattered data now available for July are probably disquieting to the Fed. Declines in auto sales together with reports from retailers suggest that consumers are retrench-

ing after a first-half spending spree."

"Reinforcing prospects for slower growth are expectations of only small gains in industrial production and personal income for July," Mr. Kaufman continued. "Also, the retarding influence of the forcing trade sector continues to sinhon demand overseas."

Market Turnover

13,737.A 9,028.9 4,302.5 23,659.A 20,063.3 3,596.1

the foreign trade sector continues to siphon demand overseas."

This view may help explain why last week's record \$21.75-billion refinancing by the U.S. Treasury produced lower rates on its offerings of three-, 10- and 30-year paper than had generally been expected. The acceptation rates and at yields of 9.81, 10.6 and been expected. The securities were sold at yields of 9.81, 10.6 and 10.66 percent, respectively, the lowest since mid-1983. This sparked a late week rally in New York bond prices, but produced little echo in the Eurobond market.

What demand there was for dollar securities from foreign investors - primarily in Japan - continued to go into the Treasury market, whose enormous liquidity assures them that their holdings can readily be sold with the least adverse impact on

While investment bankers expressed conflicting views about how much demand there was for Eurodollar bonds, the fact was that three straight issues for U.S. borrowers were floated last week. In the previous two weeks, no U.S. issuers had tapped the market because the terms available here were unfavorable compared with New York.

AST week, both Citicorp and a double-A-rated unit of United Technologies saved an estimated 10 basis points, or 0.1 percent, by issuing here. Placement obviously was not easy as UT's \$100 million of 10% percent, 10-year bonds ended the week trading 2½ points below the offering price of 99½, or just outside the 2-percent commission paid to underwriters. The third was a three-part offering by Connecticut Mutual Life insurance Co. of mortgage-backed securities having a face value of \$343.7 million

The best received of the new dollar offerings was one that will only be officially launched this week - \$500 million of bonds convertible into shares of Rockefeller Center Properties. The magic of the name has enabled managers to preplace 80 percent of the paper, lead manager Goldman Sachs reported.

In all, \$1.1 billion will be raised, including \$600 million of common stock to be marketed in the United States. The sale will leave the Rockefellers personally holding only 40 percent of the 12-building complex that sits in the heart of New York City.

The bond offering consists of two parts: \$730 million (face value) of zero-coupon bonds which will be sold at a deep discount of 221/2 percent of the nominal value, raising \$165 million in cash, and \$335 million of bonds bearing an 8-percent coupon for the first nine years and 13 percent for the final six.

The terms have been based on the assumption that rental income rises 6 percent a year over the 15.25-year life of the issues. The implied increase in the value of the shares would produce a total return of 11% percent for holders of the zero bonds and 12% percent for holders of the coupon issue. If the inflation rate is faster, say 8 percent a year, holders of the zeroes could expect a return of 13.43 percent versus 13.27 percent on the others. The zero-issue's greater sensitivity to the inflation rate also

# **Bi-Invest** Resists Takeover

## Seeks to Overturn Montedison Stake

MILAN — Bi-Invest SpA, the Italian finance group, has started legal proceedings in an effort to overturn a takeover by Montedison SpA, the country's largest chemi-

cais concern. A writ served on Friday by law-yers acting on behalf of Carlo Bon-om, chairman of Bi-Invest, asked a Milan court to declare illegal the acquisition last month by Monte-dison of 37 percent of Bi-Invest's share capital.

The writ asked that Montedison be instructed to sell its Bi-Invest shares and be prevented from buying any more of the company's

11.12 %

136 % 157 % 9.22 %

是99 % 10.10 % 9.70 %

On July 8. Montedison confirmed press reports that it had wrested control of Bi-Invest away from the Bonomi family of Milan in what observers called one of the most spectacular raids in the history of the Milan bourse. Montedison had retained its anonymity during the takeover, acquiring the shares

through a subsidiary. Stock analysts estimated that the chemicals group had paid 250 billion fire, about \$133 million at cur-

rent exchange rates, for the shares. The action drew strong criticism from Italy's industrial establishment on grounds that Montedison was indirectly buying into one of its

own shareholders.

At the time of the takeover, Bi-Invest owned a big stake in Gemina SpA, an investment company that is the single largest sharehold-er in Montedison, with a 17.1-percent interest.

Bi-Invest said on Friday that it was reducing its stake in Gemina to 2.3 percent from 17.2 percent by selling 14.9 percent of Gemina's capital to existing shereholders in a transaction valued at around 100

A daily newspaper in Milan, Il Sole/24 Ore, reported Saturday that the move appeared to indicate Mr. Bonomi was preparing a counterattack on Montedison by raising cash to buy back Bi-Invest shares. But it was not clear whether Mr. Bonomi wanted to win back full control of his company, the news-paper said. The Bonomis are be-

### lieved to hold around 30 percent of Bi-Invest's stock. Indesit Calls for Receiver

Shareholders of Indesit SpA, the Italian appliance manufacturer, have voted to put the company in receivership after failing to find a foreign buyer, Remers reported Saturday from Turin.

Indesit said it had suffered mounting first-half losses after losing 106 billion lire in 1984.

in Italy, companies can petition a court to appoint officials to run their affairs for up to two years, during which time debts and liabilities are frozen while efforts are made to restructure the business.

Indesit said last month that it was hoping for a rescue by Bosch-Siemens AG. But the West German company later said it was not interested in acquiring a stake in the

# Burnishing the U.S. Steel Industry

# Pressure From Automakers

By Jeffrey A. Leib New York Times Service CHICAGO — Three years ago, Ford Motor Co. was rejecting and returning nearly 9 per-cent of the steel it purchased from suppliers because of surface defects or faulty chemistry. Now, the rate has been reduced

to less than 2 percent. Similarly, Ford has forced its suppliers to reduce delinquent deliveries of steel to less than 3 percent today, from 20 percent in August 1983.

On a crash program to close the "quality gap" with their foreign counterparts, particularly the Japanese, Ford and other domestic automobile manufacturers have been pressuring U.S. steel manufacturers to improve their performance.

And while most industry experts contend that steel producers have still not attained the production quality of their Japanese counterparts, the steelmakers have been making significant changes in their businesses, ranging from improvements in quality and delivery times to the industry's growing adoption of a type of steel that will help make cars more rustproof.

The steel companies have taken very significant steps at reducing the quality differen-tial," said Robert B. Costello. executive director of purchasing

activities for General Motors

Still, National Steel Corp. estimates that Japanese producers have a 15-percent advantage in quality, measured by rejection rates of finished products, over U.S. steelmakers. A company spokesman said that the Japanese also have a 12-percent advantage in yield, the percentage of finished product that is ob-

tained from raw steel. "In the past, U.S. steelmakers felt it didn't cost anything to throw rejected product back in furnace," said John D. Debbink, vice president in charge of material management at GM.

Despite the new cooperative approach between the two industries, and the automakers' longstanding loyalty to domestic steel producers — GM and Ford each buy more than 95 percent of

their steel from United States

plant lift panels off a press. The panels, made from electrogalvanized sheet steel, will be used on a new minivan. suppliers -the alliance between the auto and steel giants is an

uneven one. While the automakers have been flush with profits. many steelmakers have been steeped in red ink. The demands of the auto companies put additional pressures on the nation's steelmakers at a

time when they already are bat-tered by high levels of imports and low prices. Moreover, at the same time that the auto companies have sought improved performance, they also have been seeking to cut the prices they pay Industry observers estimated that GM extracted price reduc-

tions of up to 3 percent from its steel suppliers for the current model year, which began Aug. 1. The automobile giant purchased 6.5 million tons, or about 9 percent of the domestic steel industry's shipments last year. Steel pricing has become "cut-throat," said Peter L. Anker, a

metals analyst with First Boston Corp. "The steel companies are fighting very hard for tonnage. They're under enormous pressure to lay off excess supply." The car companies represent

steelmakers' biggest customers automakers, including parts (Continued on Page 13, Col. 4)

# China Threatens **Retaliation Over** U.S. Textile Bill

Compiled by Our Staff From Disputches BELITNG -The leader of a U.S. congressional trade delegation said Sunday that China has made clear it would retaliate by cutting off trade in other areas if a bill to restrict textile imports becomes law in the United States.

They let us know in no uncertain terms. . . they would have to cut off other trade with us," Represen-tative Sam M. Gibbons, a Democrat of Florida, said after three days of talks in Beijing. Mr.Gibbons said Chinese dele-

gates did not say what U.S. goods would be affected by a possible retaliatory action. "High-technology goods are not likely to be af-fected," he said. "But they could cut off access to our goods."

At stake in the growing dispute is more than \$6 billion in annual U.S.-China trade, six years after the two countries normalized relations. According to U.S. figures, China exported \$1.29 billion worth of textiles and garments to the United States in 1984, making it China's largest customer for these

Mr. Gibbons, chairman of the trade subcommittee of the House Ways and Means Committee, said that one solution his nine-member delegation had proposed was diversification into other products.
He said that China's productive

capacity and inexpensive labor should be tapped for other exports, rather than flooding the U.S. marketplace with low-cost fabric and

The delegation was split on the proposed Textile and Apparel Trade Enforcement Act of 1985, which would protect the U.S. in-dustry by slashing textile imports into the United States. China's imports would be cut by 55 to 58 percent under the bill, due for action this fall, Mr. Gibbons said. Mr. Gibbons and Representative

Bill Frenzel, a Republican of Minnesota, said that they opposed the "There's a good chance it won't

pass," Mr. Frenzel said, noting that the Reagan administration opposes

district in South Carolina is heavily dependent on the textile industry. supports the proposal.

He said that 13 to 14 percent of the United States' \$150-billion foreign trade deficit is due to imported :

"Each billion dollars accounts for 25,000 U.S. jobs," Mr. Camp-bell said, "China is but a small part' of the problem," he added, ac-knowledging that the bill probably would do more damage to Hong Kong, Taiwan and South Korea,

China has said that the proposal: would cost it more than \$500 million a year, one-sixth of its exports to the United States. Textiles comprise 35 percent of China's world-

wide exports. China "has very determinedly let." us know in writing and in talk that this would be a very serious matter," Mr. Gibbons said, "and they would have to retaliate in some."

He reported "some progress" in talks with Vice Premier Tian Jiyun; Wei Yumin the vice minister for foreign economic relations and

trade, and members of China's National People's Congress, but declined to give details. (AP, Reuters)

### Earlier Warning Printed

The warning issued to the congressional group was not the first issued by China on the U.S. pro-posal, The Washington Post reported from Beijing.

The official Beijing Review said

in the July 22 issue that the pro-posed legislation has "sparked a crisis in Sino-U.S. trade relations." The commentary, written by the magazine's economics editor, said that the bill would violate the Chinese-U.S. Textile Agreement and Multi-Fiber Arrangement.
"China's textile industry pro-

duces its most important export products," the commentary said. As such, the impact on China's economy and its foreign exchange earnings resulting from a sharp drop would inevitably have a negative impact on China's importa-But Representative Carroll A. tions from the United States."

have also undergone a dramatic turnabout during the same period. Exports jumped last year by 17 percent and nearly doubled to the United States, yielding a currentaccount trade surplus of \$2 billion.

according to the government. But on the negative side, Mr. González has been unable to produce the 800,000 new jobs he promised upon taking office. In fact,

almost that many have been lost.

The economy has been growing

the growth has come from increased exports. Internal Spanish Mr. Solchaga believes inflation demand has been weak, with busimarket sense of the word, and is will come in below 8 percent for the nessmen complaining about high largely defined by Mr. González year, and that the deficit figure will labor costs and low productivity. and expressing more skepticism Spain's international accounts about the Socialists.

Still, there are positive signs, In recent months, there have been jumps in housing starts and machinery orders. And more job openings are beginning to appear.

But they may not be enough to prevent economic growth from ending up slightly lower this year than last because exports have slowed, Mr. Solchaga said, as a' result of changes in the U.S. and European economies.

### Grand Met **ACI Refinancing Coal-Mine Loan to Cut Costs** To Buy U.S. · ranging in maturity from one be financed through the sale of ning to tap the market for up to month to one year, should trade as Euronotes or commercial paper in \$200 million. Banks are being By Carl Gewirtz

ional Perald Tribus

PARIS - Following the lead of the major sovereign borrowers, companies that previously raised money on the international credit market through syndicated bank loans are now turning to the shortterm money market to refinance their obligations at lower cost. The most novel is a transaction

SYNDICATED LOANS

The move, announced Friday, fits in with Grand Met's strategy of reducing dependence on its slower-growth businesses, such as tobacco for ACI Cole, which in 1983 arranged a \$110-million project loan and dairy products, and expanding to finance an open-pit coal mine in in consumer services and products. Grand Met has agreed to buy a 40-percent stake in Pearle from Queensiand, Australia.

Project loans are considered the riskiest kind of bank lending, and require elaborate analysis. While the project is being developed, the loan is a direct obligation of the producer. But once production begins — as it has for ACI — repayment and servicing of the debt is secured exclusively by the output of the project.

In the early stages of ACT's original nine-year loan, interest was pegged at what then was a modest %-14 point over the London interbank offered rate. The rate rose to

EC Receives Credentials

J. William Middendorf, the new U.S. ambassador to the community, presented his credentials to Mr. Delors on Aug. 1. The post had been vacant since March when the days fending off reporters who been vacant since March when the wanted to know if Mr. Delors was former ambassador, George Vest, reatening to resign. left to become director-general of The latest rumors about Mr. De-

Saudi Arabia has been making threatening noises about the community's tariffs on Saudi petro-

chemical products. Last week, the English-language Sandi Gazette of Jeddah quoted an unnamed official of the Gulf Coopcration Council as saying that Saudi Arabia might impose retaliatory tariffs of 20 percent on EC goods. The council includes Saudi Arabia Bahrain, Oman, Qatar, the United Arab Emirates and Kuwait.

Saudi Basic Industries Corp., a state holding company, said the threat to EC industry from Saudi exports had been exaggerated.

The community last month imposed a tariff of 13.4 percent on Saudi polyethylene products.

THE NEW KGB:

ley. 560 pages. \$19.95.

New York, N. Y. 10016. Reviewed by David Wisc

Engine of Soviet Power

By William R. Corson and Robert T. Crow-

William Morrow, 105 Madison Avenue,

IGNETTE No. 1: On a recent trip to the

V Soviet Union, I dined with Victor Louis,

the most famous reputed agent of the KGB.

Louis, who says he is a journalist, is an engag-

ing and articulate man. Westernized in manner, and he spent the time at dinner in spirited defense of the Soviet system. At the end of the evening he climbed into a gleaming silver Bentley and drove off into the night

Vignette No. 2: A few years ago, I dropped off my car (not a Bentley, not gleaming) to be serviced at a garage in my neighborhood. Another customer offered me a ride home. It was only later that

other customer offered me a ride home. It was only later that I realized my benefactor was Robert T. Crowley, who had been the assistant deputy director for operations of the Central Intelligence Agency. Crowley, now retired, and William R. Corson, another former intelligence man, have written a detailed and revealing book about the KGB. I doubt that Crowley and Victor Louis (whose real name, according to "The New KGB," is Vitali Levin) have met, but if they could, it would make for a fascinating evening. The relative merits of the CIA and the KGB, and the two contrasting systems that bred them, would be discussed with consider-

bred them, would be discussed with consider-

Intelligence agents live in a world that is rather different from that in which the rest of

us reside, and they tend to think differently.

As only one example of the complexities of this subterranean world, Corson and Crowley recount the strange case of Yuri Loginov, who was arrested in South Africa in 1967 as a Soviet

was arrested in South Africa in 1907 as a Soviet
"illegal," that is, a spy without official (usually
diplomatic) cover. The authors find his arrest
by the "relatively inexperienced South Africans" to be odd, since illegals are the slipperiest of intelligence eels and the hardest to catch.

The implication, although the authors do
not severe directly is that I original was sent out

not say so directly, is that Loginov was sent out in order to be caught. The authors cite a report

that Loginov supported the story of another defector, Yuri Nosenko, who had turned up in

Geneva three years earlier. Nosenko discounted the allegations of a previous KGB defector, Anatoli Golitsin, who had warned the CIA that it harbored a high-level mole. The argument

able wit and erudition.

Yet the CIA the reader should keep a mind has permitted only what it want to be published about the KGB to appear in the book. As a former CIA officer, Crowley had to submit the book to the agency for clearance. The CIA says he did so. It also says that Course did not submit the book and was not so obligated.

"The New KGB" is mistitled, since the bulk of this study deals, not with the modern KOB but with the history of the "organs" of Soviet state security. One must plow through make of detailed examination of the evolution of the Cheka, the OGPU, the NKVD, the MVD and so on, as well as descriptions of ancies the security to the security of ancies and the security of the security nanigans by various commercial areas of the Soviet government, to find the nuggets - but they are there.

For example, Corson and Crowley say Ynn Andropov, the first head of the KGB to be come leader of the Soviet Union, and his prosge, Viktor Chebrikov, now head of the KGR met years ago on a dull, bureaucrate assignment, a KGB promotion panel on which the two men served for two weeks. But they stayed in touch. In 1955, when Aadropov was KGB promotion in the stay and later and was KGB promotion. in touch. In 1955, when Andropov was KCR resident in Hungary and later ambassador, he sent for Chebrikov as his deputy. The two won their spurs the following year when Soviet tanks and troops crushed the revolt in Budapest. When Andropov came to power in November 1982, one of his first acts was to appoint Chebrikov head of the KGB.

There is tradecraft galore here, descriptions of how the KGB goes about compiling isses of infant deaths, finding defunct businesses, schools and addresses to build unchectable legends for its illegals. There is an account of the spy school at Bykovo, near Moscow, where Soviet agents were allegedly taught to pess for Americans. They were required to memorize batting averages and were taught by a faculty that "understood the importance (for legend purposes) of baseball, radio, hot dogs and apple pie." Bykovo, according to the authors, even had a roller skating rink.

"The New KGB" spends a great deal of time noting that the Soviet secret police killed 40 million people, that Stalin and Beria were responsible for mass terror, that the KGB is not the Rotary Club. The depunciations of the Soviet system tend to detract from the narrative. Still, the authors cannot conceal their admiration for Hans Galleni, a Soviet agent who showed astonishing ingenuity in outwinting the British secret service and tracking down "Scott" a circles clock in the British down "Scout" a cipher clerk in the British Foreign Office. The case is a tale well told.

Corson and Crowley give a balanced ap-praisal of Andropov as KGB chief, concluding that he was a man of considerable skills as an administrator. Andropov chose his young offcers with care: "The group cannot be seen as resembling political backs or 'ticket punchers' of the sort seen in the past. Rather, they are the 'best and the toughest' the Soviet system has been able to produce in nearly seven decades."

David Wise writes frequently about intelli-gence. His latest book is "The Children's Game," a novel of expianage. He wrote this review for The Washington Post.

# Green Is PGA Leader by 3

By Sally Jenkins Washington Past Service

DENVER — Hubert Green shot a one-under-par 70 here Saturday to take a three-stroke lead in the 67th PGA Championship as the Cherry Hills Country Club course took its revenge on much of an

unsuspecting field.
Green had trailed leader Lee Trevino, the defending champion, by two strokes after Friday's secset two bogeys with three birdies for a 54-hole total of 7-under-par 206. Trevino, meanwhile looned to a 75/209.

But Trevino was better able than most to minimize the damage, as virtually everybody on the leader board faltered on a course that had suddenly become unmanageable. Trevino's round left him two strokes ahead of Tom Watson (74), Nick Price (65) and Fred Couples

Those four weren't far back enough to suit Green; being the eader is an unfamiliar sensation for the 38-year-old, who has been suffering through three of the worst years of his career. "I can win, and I probably should win a major championship," said Green. "But better men than me have squandered leads like this, I didn't come here in a turnip truck and I'm not leaving

Cherry Hills, which yielded a tournament-record 31 subpar rounds Thursday and played only slightly tougher Friday, turned pasty Saturday with greens that were kitchen-counter fast and winds gusting to 25 miles an hour (40.2

The midpoint leaders met with problems all over the 7,089-yard layout. That was partly because of the condition of the greens, which tournament officials decided not to rolled with 30-pound weights, further hardening them.

Green's resurgence, which included a 69 Friday that put him in sign for the 1977 U.S. Open cham-pion, whose only tour victory dur-cials. "It's just the wind," Suny contention, was an encouraging

Gooden Survives Shaky Start to Win 12th Straight

ing the past three years was in the 1984 Southern Open. "I died two years ago," he said. "But my game is back."

said. "They can't score here in the wind."

Trevino disagreed, saying that

On Friday, Trevino, 46, shot a 68 for a the lead at 134. Couples registered the day's low round, a 65, which put him one stroke behind Trevino. Couples was followed by

Green, with a 69/136.
In the third round, Green fionto greens for relatively routine pars. In a threesome with Couples and Trevino, he was the only one to get consistently near the flags. Green birdied the par-4 fourth

hole with an 8-iron to within 10 feet, the par-3 sixth (which Trevino bogeyed in a two-stroke swing), and the par-3 No. 8 with a 2-iron to within 25 feet. His twisting putt on

The turning point in Trevino's the eighth broke about six feet.
"I'm not that good," Green said.

"I didn't try to call that one. I just tried to get it close and not embarrass myself." Green bogeyed the par-4 ninth

with a 6-iron that left him with an unmakable uphill seven-foot putt. But then he reeled off nine straight pars. He didn't waver again until the 18th, a long par-4, He closed with a bogey when he hit a 2-iron into the rough, left a 9-iron just off at Nos. 13 through 15. # 'Andrea's World': A Woman With 28 Personalities

By Sandy Royner Washington Post Service

Washington Post Service

WASHINGTON — She was schizophrenic.

No, epileptic, No, just hopelessly crazy. Strap
her down, lock her up, give her a lobotomy.

What was really going on inside Andrea Biaggi's
head were Sheba and Anton, Joseph and Dara,

Philippe, Little Andrea-Ellen, Mother Mary, The Angry One, The Monster, Super Andrea, Nothing, Especially Nothing. With 28 different personalities, the real Andrea was only rarely in control. Sheba and Anton killed cats. Joseph, her mind's incarnation of her father, burned her with caustic

chemicals or slashed her with knives. Her mother's voice intoned throughout. "You deserve to be punished. You're bad." Super Andrea held down a high-level, high-

pressure job and performed brilliantly.

Bridget enjoyed casual sex, but then Dara, her mother image, would punish her sinfulness, and Philippe would try to make sure it could never

happen again — with pins, with acids, with suicide attempts that often landed her in hospitals. Andrea herself felt nothing. Because Nothing had taken not only the pain upon himself, but the knowledge of toddler years of anspeakable physical and psychological torture: repeated, unremitting abuse at the hands of her deranged father and of her mother, whose escape was to blame her 4-year-old daughter for her husband's behavior, piously telling her it was "God's will."

Nothing kept Andrea from feeling — when Philippe used the drain-cleaning crystals, when Dara burned her arms with oven cleaner, and all those other "crazy things."

Until five years ago, when Andrea Biaggi met Dr. Eugene Bliss, it never occurred to her that she might be a "multiple personality." She simply believed, as her family and many therapists had assured her throughout her 31 troubled years, that she was "hopelessly, incurably crazy - bad and evil and crazy.

When Bliss suggested that he not only knew what her problem was, but thought he could cure her, "Why." she says today, "I thought he was the craziest therapist I'd ever seen."

Andrea Biaggi is not her real name. Her parents are dead, but her big Corsican-American family is scattered around the country, six brothers and sisters. They do not know of her sessions with Bliss, nor her part in the book "Prism: Andrea's World." which she wrote with him and his son, Jonathan Bliss.

Nor do Andrea's employers in Salt Lake City, where she holds down a responsible job. For television appearances, she wars a wig and sunglasses.
Her integrated or "fused" personality is full of a
bubbling wit and intelligence that no one would
associate with the anguished, haunted group of shadowy selves that warred among themselves in-

side her head. "Andrea and people like her are unbelievable bypnotic virtuosos," said Bliss, a University of Utab psychiatrist who, after 30 years of relatively traditional practice, has emerged in the last half-decade as a specialist on multiple-personality dis-

MOVING

MOVING

Dr. Eugene Bliss and "Andrea," a victim of multiple-personality disorders.

"People with multiple personalities have been to practicing using spontaneous hypnosis frequently since the ages of 4 or 5, and by the time they are adults they we had a hell of a lot of practice. They can cope with all sorts of nasty things without

Andrea's case is fairly typical, despite the seemingly bizarre nature of her symptoms and the

events that precipitated them.

Dr. Frank W. Putnam, an authority on the disorder and part of the National Institute of Mental Health team at St. Elizabeths Hospital in Washington, while disagreeing about the impor-tance of self-hypnosis in the ailment, said most multiples were "victims of extremely sadistic, usually sexually oriented abuse that occurs before the age of 12, usually at about 4, 5 or 6, and continues for a number of years."

Putnam had never seen Andrea, nor was he aware of her book. Nevertheless, characteristics he described as typical of multiple-personality disorder fit the particulars of her case—the childhood abuse and the creation of numbing or protective personalities that later turn against the host personality, producing self-mutilating behavior.

The more virulent the abuse and the longer it

lasts, the more personalities are likely to be created, he said. Though therapy with adults can be difficult, children who have "dissociated" can be successfully treated within weeks.

Potnam cited new evidence suggesting that a "child witnessing violence may have an even more powerful traumatic experience" than one who was the victim of the violence.

Andrea's compulsion to kill cats was found to

have stemmed from an incident she witnessed, one she repressed until late in her therapy. Her father worked as a maintenance man in a

hospital. One day he brought Andrea to work with him. She had found a kitten. From the book, Little Andrea-Ellen, a terrified

5-year-old remembers: "It was hard with the kitten to go down. The stairs went to the big room where my father worked . . . He was angry like wild He scares me. . . . He grabbed me and the cat. The cat kept running. He kept wanting me to touch him. He kept twisting my hand. Inst let me get kitty — please, Daddy — let me go home. He hit me. I wouldn't do what he wanted I kept saying I

wanted the kitty. "'All right, if you want the kirry, I'll give you it.
You want this kirry? He was real angry. He pulled
the furnace door open and threw the kirry in the

"Then I ran up to him, and I was screaming and crying and I kept begging, 'Please take the kitty

"He said, "If you want that kitty, do what I want,

and I'll get the kitty."

"I thought be could do it. I really did. That is when I did what he wanted... He pulled me into a dark corner. I hated it, but I thought I could save the kitty. It was my fault the kitty died.

"He put my clothes on. Now, Daddy, you promised the kitty." He started to laugh. You dumb kid. Don't you know the kitty is dead?" "Then he opened the furnace to show it was dead. He said he would put me in the furnace if I

REAL ESTATE

FOR SALE

told anyone. I didn't feel anything then. I didn't feel my body. I didn't cry. I wasn't afraid, and I

didn't care." Much of the time nothing seemed to be very wrong with Andrea Bizggi. With a few exceptions — when periods of hospitalization could not be hidden, for example — she appeared to lead a more or less normal life.

Super Andrea, who was created to keep her from flunking French in high school, kept achieving at a high level. Even during her therapy, when she was consciously reliving her lifetime of horrors, her coworkers never knew.

Andrea harbors bitterness toward the mentalhealth establishment, which drugged her, used in-appropriate therapies and, she said, brought her "within a hair's breadth" of a lobotomy.

"It is so scary to think how those mistakes ruin

somebody's life," she said. After repeated misdiagnoses, "I still don't know how or why I kept

She said tartly, turning to Bliss, "I know, you're going to defend your colleagues."

Bliss sighed. "Look," he said, "I was ignorant for 30 years. If you'd come to me 10 years ago, I

wouldn't have known what was wrong." At St. Elizabeths, Putnam's research has in-volved, in part, the demonstration of how the different selves in multiple-personality disorder can evidence distinctly different brain waves in response to the same slimulus and manifest different physical characteristics — visual acuity, allergies, even illnesses such as diabetes.

He described an adolescent patient who, when one personality emerged, always developed a rash on her face, chest and arms.

Andrea and the Blisses wrote "Prism" at least in part to call attention to the widespread existence of multiple-personality disorder and to the need for more meticulous screening of psychiatric patients. The book was written two years ago, three years into the therapy, but both Andrea and Dr. Bliss knew that even though all the personalities had been fused by then, the work was just beginning.

been fused by then, the work was just beginning.

"It feels almost like an addiction to me," Andrea said. "Whenever I'm in high-stress sinations, I always get that sense to pull back, pull out of it."

She and Bliss said they were surprised at the interest the book was generating from the public and from television filmmakers.

Putnam recalled a CBS producer who was filming recently at St. Flizabeths. "He said, 'Oh, multiple-personality disorder — the only sary thing psychiatrists are doing these days."

psychiatrists are doing these days." If you look at our culture, you will see a deeply embedded fascination with transformation - Je kyll and Hyde, Superman, Wonder Woman — and behind that lurks something else, the issue of the hidden — werewolves, vampires. . . . It is part of Western civilization."

Bliss, Putnam and most other experts in the field agree on one major point: The therapy is exquisitely painful for the subject, and alternately reward-ing and exasperating for the therapist. Putnam quoted from a recent book on post-transmatic stress among Vietnam veterans: "Remembering is worse than being there."

## LANGUAGE

# How to Break a Taboo

By William Safire

WASHINGTON — How do you break a linguistic taboo? We all know some words that are not used in what used to be called "polite society." Now that polite society has loosened up considera-bly, formerly proscribed words are bandied about between people passenger who had been kishingped without embarrassment; the vertige of the old ban applies only to after his release: "I'm so an words on radio and television and gry. . . I was just hoping that in your family newspaper.

ated with sex. Only two generations ago, for example, rape was not a word used in general conversation, certainly not over the air or in the newspaper. The verb violate was sometimes substituted, but the preferred cuphemism was attack; tation on its front page: There was when a woman was said to have a definite expansions between the been anacked, the crime in mind original two hijeckers and the rest was not an assemble but a rape. of the bastards."

That taboo was broken when the from the word's sexual meaning. lieve that the crime deserves more used in ordinary discourse, not so much meaning "illegitimate" as Bastard is a word in the early "unlegitimated."

Bastard is a word in the early stages of breaking its taboo. The word is acceptable in specialized meanings such as "variant from the standard," as in bostard size, as well as in verb form for "to debase,

make inferior," as in bastardize. How ver, in its basic meaning illegitimate offspring, or child born out of wedlock — the norm bastard (etymology in dispute) is still looked upon prudishly for its con-notation of the result of illicit sex and, more important, is avoided on the air or in print because it is also used as an imprecation. Most often when we call someone a bastard we do not mean that he is a "love child," but that he has the characteristics of inferiority that have long been contemptuously and quite unfairly attributed to the product of liaisons not benefited by clergy or City Hall. That taboo on

the star spills over to a restriction

on the use of the word in its origins

Along comes an event that breaks, or at least reducts, the tatoo in an emotionally seeming interview with Tercoor Smith, a re-porter on "The CBS Morning News," Peter W. Hill, an airline and held in Beirut, said bitterfy me gry. . . I was just hoping that that plane we saw on the turner in

# Pentagon's Victory Opens a New Battle

Chemical Weapons Debate Divides Experts Over Storage and Testing

By Bill Keller New York Times Service

WASHINGTON — The expected decision to end a 16-year moratorium and resume military production of chemical weapons is being celebrated by the Pentagon as the end of a long campaign.

A House-Senate conference has authorized \$155 million to begin production of a new chemical bomb and artillery shell, billed as a safer replacement for aged stockpiles of nerve gas,

The nerve gas program, part of a bill authorizing \$302.5 billion in military programs for the fiscal year beginning Oct. 1, has been approved by the Senate and awaits a final House vote in September.

But according to a wide range of experts on both sides of the issue, the debate has left unresolved a number of divisive questions about the future of the United States's involvement with these weapons, including where they would be deployed and how they would be test-

Interviews with Pentagon officials, members of Congress, scientists, and others involved in the chemical weapons debate have raised the following points:

· Although most experts have said that Europe is the most likely scene for a battle with chemical weapons, European allies have balked at even discussing the deployment of the new weapons on their soil. Pentagon officials say they have now decided to deploy them only in the United States or on ships, which critics say would be too far from battlefields.

 Many scientists and intelligence officials believe the United States cannot be fully confident that its new weapons will work without open-air testing, banned in the United States since 1969. Yet politicians have said that there would be emphatic public resistance to resuming tests.

 A presidential commission that endorsed the production of new nerve eases in time was amone those who have said that the army. chemical weapons program may be

obsolete before it is completed. The critics have faulted the army for not designing long-range, unmanned weapons to deliver chemi-cal agents behind enemy lines with-out risking the lives of pilots.

 Talks aimed at an international treaty banning chemical weapons remain stymied in Geneva, and there was little optimism among Reagan administration officials or outside experts that the impasse could be resolved, because such a treaty would be extremely difficult

to enforce. The Pentagon has promoted its new chemical weapons program in part on the ground that a sign of American determination would induce the Soviet Union to bargain more seriously toward a ban.

But talks aimed at controlling chemical weapons have gone on without success since 1972, and American intelligence officials have said that the Soviet Union is perfecting more advanced nerve

To some observers, that raised the prospect of a continuing chemical arms race.

Richard E. Cavazos, a retired army general who served on President Ronald Reagan's Chemical Warfare Review Commission, which endorsed the new chemical program in June, said he was often exasperated by the reluctance of Pentagon officials and critics to look beyond the immediate pro-

One of the most politically volatile issues was whether to deploy the new weapons in Europe, especially after campaigns to deploy medium-range missiles and neutron weapons there,

The House, arguing that an encounter by superpowers would most likely begin in Europe, voted in June to require that the North Atlantic Treaty Organization formaily agree to store the new weapons on its soil before production

After strong objections from the Pentagon and State Department that this would cause political tur-(Continued on Page 6, Col. 5)

Three women walked to a makeshift medical clinic in Institute, West Virginia, Monday, the day after a chemical leak at a Union Carbide plant sent scores of residents to hospitals.

# **Emergency Warning System Failed** In Union Carbide Leak at U.S. Plant

INSTITUTE, West Virginia The emergency warning and shut-off system installed at a Union Carbide Corp. plant here failed in Sunday's leak of of toxic chemicals, local officials said here Monday. The system was installed after

the leak of a chemical at a Union Carbide plant in Bhopal, India, last year killed more than 2,000 people. Six plant employees, one serious-fy injured, and about 130 nearby residents went to hospitals Sunday with lung, eye, nose and throat irri-tations after the leak of a chemical

used to make a pesticide. Thou-sands of people were asked to stay in their houses for several hours, until the chemical dissipated. The mayor of Charleston, West

spread a chemical cloud over four aldicarb oxime, is made from meth-They did not notify anybody

other than making an initial call to the county," Mr. Roark said Monday, "and the information that came from them was sparse to say

Doctors said most of the injured would recover quickly. Officials said the chemical unit

was shut following the leak, but that workers were back at work Monday in other parts of the plant. Meanwhile, the company planned to respond formally to

complaints about its emergency procedures but had not decided on how to do it, a spokesman, Charles Ryan, said.

The chemical cloud spewed from Virginia, Mike Roark, accused a unit that uses methyl isocyanate, Union Carbide of not providing the substance that leaked last Deadequate information about the cember in the Indian city of Bholeak at its pesticide plant, which pal. The substance that leaked here,

yl isocyanate, but that chemical is consumed in production.

Company officials said a cloud of aldicarb settled on nearby homes after leaking from the plant when a gasket on a storage tank failed.

Many people living near the plant said their homes had already been engulfed in fumes when they first heard the plant's emergency

"Carbide's got to do something better than this," said Donna Willis, one of nearly 300 residents examined at an emergency clinic.

"We can't let them wait 10, 20 or 30 minutes before they let you know what's going on," she said. "We could have been dead."

The company said it had notified the county Office of Emergency Services of the incident within "ap--Countried on Page 2, Col. 5)

# Boeing 747s, one operated by Pan American World Airways and the other by KLM.

The JAL plane was operating from Tokyo's Haneda Airport to Osaka during one of Japan's busi-

minutes before reaching it," Izumi Omori said after he landed. "I saw "I could not see the wreckage," he added. "But the flames did not

Pilots of two other planes report-ed seeing an aircraft burning in air before the crash, The Associated

flames at more than 10 places."

saw nothing but flames.

look like woods burning."

had reported trouble with a door.

Japan Airlines Flight 123, It was

bound from Tokyo to Osaka.

Press reported. Geoffrey Tudor, a spokesman for Japan Air Lines, said the pas-senger list included 21 non-Japa-went down.

nese names. "There are some Western names," he added. The worst one-plane crash ever recorded until now was of a Turk-Osaka to await word. ish Airlines DC-10 near Paris in

1974, in which 346 people died. A cargo door opened, causing explosive depressurization, and the floor collapsed, severing control lines. fire and smoke. The worst accident reported in

commercial aviation history was at Tenerife in the Canary Islands in March 1977, when 582 people died in a runway collision in fog of two and had then seen a "mushroom

ka when the trouble started.

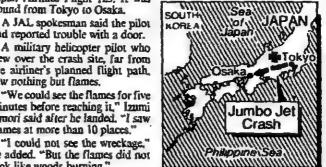

In Japanese 747 Crash After a Door Problem

> visit home villages. The 509 passengers included 12 infants, the JAL spokesman said. The plane had 15 crew members. Officials at the U.S. Air Base at Yokota, 21 miles (34 kilometers) west of Tokyo, said the pilot had

requested and received permission to make an emergency landing. However, the plane disappeared from radar screens when it was

524 Are Feared Dead

near Saku, a city in the Nagano

District. The time of the crash was calculated at 6:54 P.M.

The Japan Broadcasting Corp. said there was a thunderstorm in

The site of the crash is in an uninhabited area that is accessibleto land vehicles, the police said. Relatives gathered at the airport

Kyodo News Service quoted witnesses as having said they saw the Boeing 747 make a long turn and then they saw "red and black,"—

The Japan Broadcasting Corp. said some people in the Nagano area had telephoned the network to report they had heard a loud crash

The Boeing 747 appeared to be off course between Tokyo and Osa-

The JAL spokesman, Mr. Tudor,

est holiday travel seasons, when city dwellers traditionally return to said by telephone that the plane's captain, Masami Takahama, 49, radioed that "there was trouble with a door on the deck of the main cabin" and that the door appeared to be on the right rear side. Japan Broadcasting said the first

emergency message from the pilot was received at 6:39 P.M. The U.S. air hase at Yokota authorized the plane at 6:54 P.M. to make an emergency landing.

One report of a plane on fire

came from the pilot of a U.S. Air Force C-130 transport, and the other from a plane of the Japanese Air Self-Defense Force, Japanese news

reports said. JAL said the plane was a short-range 747, a model built to carry a large number of passengers on rela-

tively short flights. One of the passengers, it was reported, was Kyu Sakamoto, a singer known worldwide for a hit record in the 1960s, "The Sukiyaki

(Reuters, AP) ■ The Worst Crashes

Following is a list of the worst civilian aviation disasters, as reported by The Associated Press: 1. March 1977: 582 were killed in

a collision of two Boeing 747s operated by Pan American and KLM on the runway at Tenerife, the Canary Islands. 2. March 1974: 346 died in the

worst single-plane accident to that time when a Turkish DC-10 had a cargo door problem and crashed northeast of Paris.

3. June 23, 1985; 329 were killed when an Air-India Boeing 747 fell into the Atlantic off Ireland. An explosion is suspected as the cause.

4. Aug. 19, 1980: 301 died in a Saudia L-1011 making an emergen-cy landing at Riyadh in Saudi Ara-

5. May 25, 1979: 273 were killed at Chicago when an engine fell off an American Airlines DC-10 during takeoff and it crashed.

6. Sept. 1, 1983: 269 died when a Korean Air Lines 747 was shot down by a Soviet jet while in Soviet airspace near Sakhalin Island.

man was too badly wounded to be moved to hospital and died in the mosque, police said. The hostage, a mosque official, was freed unharmed, but another

employee shot by the gumman at the start of the siege was taken to a hospital with serious injuries to the The gunman entered the mosque shortly after the start of afternoon prayers, when about a hundred

worshipers were inside the sprawling whitewashed complex on the Left Bank of the Seine. A witness said she heard him shout: "I have a gun." Then he took a weapon from a bag and fired at Rabbah Dramchine, the mosque's

personnel chief. The man seized Omar Hadji, the mosque's chief of protocol, as a hostage. The rector, Sheikh Abbas Bencheikh-el-Hocine, was at first feared to be among the hostages but police said he managed to lock

himself in his office. The Paris police's anti-comman-do unit had surrounded the mosque, which is in the Latin Quarter. A state prosecutor negotiated by phone with the gunman,

police said. The gunman demanded to be flown to Algiers, and an Algerian diplomat entered the mosque to negotiate with him. Shortly before 7 P.M., the hostage tried to escape and police sharpshooters fired four shots, hitting the gunman.

"After the negotiations which went on until 7, the hostage tried to get out of the office in which he was being held prisoner," according to a Paris police spokesman, Michel

LaudeL "When the police saw the hostage coming out and the gunman behaving in a threatening manner they intervened and he was wound-

ed," Mr. Laudet said. The mosque, the main place of worship for Paris's 400,000 Moslems, has in the past been the scene of violence.

Mohammed Benzouaou, the mosque's principal imam, or religious leader, was beaten to death with an iron bar in front of the mosque in September 1984 by a Moroccan described by the authorines as a "crazy mystic." About two million Moslems live

# The Parents of 'Martyrs' Soweto Families Fear for Children

By Glenn Frankel

Washington Past Service
JOHANNESBURO — Wilfred Ratala's 15-year-old son, John, came home from school recently with a police bullet in his leg.

As his father told it, John was on his way home in Soweto when he was caught in lighting between po-lice and local youths. The youths had rocks, and the police automatic rifles and shotguns. When the dust cleared, John's right leg was bleeding from a shotgun wound, and he

dragged himself home. Mr. Ratala did not take his son to the local hospital, where "I knew he could be arrested," but to a local obysician.

"It makes me very angry, but what can I do?" said Mr. Ratala, an insurance broker in South Africa's largest black urban community "The police can shoot anyone they like. No one can stop them."

These are times of pain for many parents of South Africa's black lownships as they watch their children standing on the frontline of the low-level war against the state. Some become the parents of martyrs. They can be seen at political funerals huddled on simple grass rugs, staring at their chil-dren's coffins while speeches are made. Others search for children who have been detained by police for their alleged role in the unrest or who have gone into hiding a step

The Detainees' Parents Support Committee, an opposition civil rights group, said it believed that more than half the 1,500 people detained since South Africa's state of emergency took effect July 21 were age 18 or under. An average of 20 parents a day go to the commit-tee's overcrowded office in central Johannesburg seeking advice and assistance in locating their chil-

The families are often torn by conflicting emotions: agonizing fear for their children; anger, often first directed at the children, then at the police and, ultimately, the white-minority government. With some, there is a small dose of pride. As the unrest in black townships

continues, its recruits grow younger. Beauty Guduka's 11-year-old son, Fanie, left July 11 to play with friends in the craggy, rock-strewn streets of Alexandra, a black township north of Johannesburg. His mother was visited that eve-

ning by a white police officer and a half-dozen black policemen who told her the boy had been arrested for throwing rocks at police. She witnessed her son make a written confession. Four weeks later, he was still being held without bail at John Vorsier Square, Johannes-

burg's central police jail, on charges of public violence that could bring him a maximum 10-

year sentence in a reformatory. His lawyer, Krishna Naidoo, said police and judges no longer seemed interested in mitigation pleas based on the youth of a de-

They say outside agents are using these kids as agents of unrest," he said. "Age is not a factor to the

Edwin Melk said he wished his 17-year-old son, Isaac, were just an ordinary student instead of a leader of the anti-apartheid Congress of South African Students, Mr. Melk was asleep in his Soweto home at 3 A.M. last week when he heard a

The Associated Press JOHANNESBURG - A black onsumer boycott against white businesses spread to Johannesburg and Pretoria on Monday, while se-curity police forced striking black students to attend school in a township near Johannesburg.

Police reported scattered rioting in the country. There were reports that at least four blacks were killed in racial unrest.

Hospitals in Durban reported two deaths in outbreaks at black townships, bringing to 67 the total reported killed in the Indian Ocean port in nearly a week of violence. More than 700 were injured in the week of rioting, the most intense in a day since protests against apartheid began throughout the country 11 months ago.

Newspapers said that at least two blacks, one of them a 12-yearold girl, were killed Sunday as firebombs and stones were thrown between youths and residents of a workers' hostel at Mamelodi, near

Black activists announced the start of consumer boycotts in Pretoria and Johannesburg, the two main cities in South Africa's business and industrial center. They said a boycott would begin Wednesday in Cape Town.

Black boycotts of white businesses began a month ago in the eastern area of Cape province in the southern part of the country. The boycotts are seen by many militants as the best way to make their

By John Burgess Washington Pass Service

TOKYO - The tale is told of a Japanese Rip Van Winkle, who, having entered his slumber in the dark, final days of World War II, awakens in modern Tokyo. He is dumbstruck by the skyscrapers, cars and throngs of smartly dressed people. Silently, he rejoices. Somehow, that terrible war was

Forty years after they raised the white flag, the Japanese have given history one of its choicer ironies. They have achieved in defeat much of what they sought fruitlessly in war: affluence, military security, the respect of foreign countries and economic domination of the Far East.

But with all its success, Japan continues to see itself as a society living on the edge. It is forever debating what it owes to the world, how long the good times can last and whether wealth has brought true happiness. To that last question, more and more Japanese answer no. Not that anyone would turn back the

clock. Japanese today live longer than any people on Earth. Life expectancy is 80.2 years for women, 74.5 years for men. They enjoy excellent health. They can pass from cradle to grave without a single encounter with violent crime. Their streets are clean and their waiters polite.

When Japan surrendered on Aug. 15, 1945. Tokyo and the other great cities were blackened fields of ash and twisted metal. Most factories were mined and ships sunk. Three million Japanese were dead. Many of those who had survived were living on sweet potatoes and other roots.

The devastation was so complete that American paratroops scouring Yokohama for food for General Douglas MacArthur's

> The Pacific At War and at Peace

First of four articles first breakfast in Japan reported back with one egg.

The reconstruction began.

People came to believe that happiness is found in having things and money," said Jiro Kamishima, a political science professor at Tokyo's Risho University. The Japanese approached their new task with the single-mindefness that they had

applied to making war. Americans say the squeaky wheel gets the grease. But Japanese say the nail that sticks up gets hammered down. And by most accounts, it is that conformity and imswerving loyalty to the group that are the keys to understanding the Japanese character and the country's stuming success in world commerce

Today's Japan, with its 120 million peo-

ple, is a finely nined, \$1.2-inilion economy,

But much of Japan's trade and investment is directed at former members of the

billion, will include power-generating equipment for China, automobiles and dig-ital phone exchanges for the United States and cassette recorders for Bahrain. The cheap toys and saucepans that once made the stamp "Made in Japan" synonymous with junk in many Western countries vanished years ago.

Since the war, the United States has become Japan's most important economic partner, taking 35 percent of its exports last year. Despite Washington's huge delicits with Japan, which reached \$37 billion in 1984, the United States does make major sales here. Japan is the largest foreign market for American farmers, with almost \$8 billion of purchases in 1984.

outside the Communist bloc, Its steel, auto

and electronics industries are the cuvy of

the world. The challenge now to Japan is

how to sell less to trading partners who are

Gross national product, the total value

questions about the social cost of the great

# Soviet Anti-Booze Drive: For Now, an Uneasy Sobriety Prevails

New York Times Service MOSCOW - As the Trans-Siberian railroad set off recently on its Beijing-to-Moscow run, it was filled with the tipsy revelry that is traditional in much of Russian life. But as it approached the Soviet border, a passenger recalled, the. bottles were put away and passengers settled down to a long, dry ride across the steppe.

In cities and towns across the Soviet Union, a two-month-old liquor law has taken hold and is transforming much of the way Russians live their daily lives.

The traditional mugs of beer have disappeared from many of the steamy bathhouses where people beat each other with birch branches. Some waiters have walked off the job in restaurants where reduced liquor sales have cut down on tips.

Sales of eau de cologne are reported to have increased as alcoholics, desperate for a drink, feel the effects of shortened store hours.

Long lines now form outside liquor stores before they open at the new, later hour of 2 P.M., and again before their early closing at 7 P.M., as people rush to buy a bottle on their way home from work. Restau-

# Pakistanis Riot After Family of 9 Slain

RAWALPINDI, Pakistan (AP) — Hundreds of police dispersed demonstrators Monday after thousands of rioters protested the unexplained

killing of nine members of one family.

More than 10,000 people marched Sunday through various parts of Rawalpindi, which adjoins the capital of Islamabad. Vehicles and thous were burned in several slums. Residents demanded to know why the mine people were killed and charged that police were unable to protect the

The riots began after news spread that nine members of a family, including five children, had been killed by a group of men who broke into their home. The victims were stabbed and beaten with clubs and bricks.

# Firebombs Found in U.S. Troop Cars

FRANKFURT (Reuters) — Two incendiary devices were found Monday by cleaners on U.S. Army railroad cars, four days after a car bomb attack on the U.S. Rhein-Main Air Base killed two Americans.

The devices consisted of blankets drenched in inflammable liquid and an ignition mechanism, which failed to go off, a police spokesman said. Police officials investigating Thursday's car bombing joined in the investigation into the incendiary devices. The railroad cars, which are used to transport U.S. troops, were parked in sidings at a Frankfurt cargo station overnight. It was found Monday that two had been broken into.

# Greenpeace Says Suspects in Africa

David McTaggart

sought in connection with the July 10 bombing of the Greenpeace ship Rainbow Warrior in New Zealand flew last week to an unnamed African country, the head of Green-peace said Monday.

"That is my information," said David McTaggart, the chairman of Greenpeace, in Paris. "They flew to Africa on Wednesday."

Mr. McTaggart said he would meet later this week with President François Mitterrand of France, who has ordered an inquiry to learn whether the French secret service was involved in the attack. A Greenpeace photographer was killed in the bombing.

### Polish Court Upholds 2 Convictions

WARSAW (AP) — A Polish appeals court Monday upheld the convictions of two Roman Catholic priests charged with leading a student protest against removal of crucifixes from their classrooms, but it revised a one-year prison sentence against one of them, the official Polish

press agency, PAP, reported.

The provincial court in Kielce suspended the one-year prison term and placed the Reverend Marck Labuda on three years' probation, the agency said. It fined the priest 100,000 zlotys (\$650). The count upheld a 10-month suspended sentence against the second priest, Andrzej Wilczynski, who was ordered to pay a 60,000-zloty fine.

The two priests led a protest Dec. 3-16 involving about 300 students and 100 parents. They occupied a school building in the southern town of Wilczynski and the protest beautiful a country of supplies from classroom with

Kwathema, a township of 175,000 east of Johannesburg, and went house-to-house searching for students who were not in school. Po-Włoszczowa to protest the removal of crucifixes from classroom walls. The two priests were convicted by a lower court June 11 for leading an illegal strike and breaking into a school building.

# Sri Lanka Rejects Tamils' Demands

oup

Watts, a mostly black section of southern Los Angeles, was struck by burning and looting that began Aug. 11, 1965, and went on for six days, leaving 34 people dead, 1,032 injured, 3,952 under arrest, and \$40 million of property destroyed.

The events were considered an explosion of anger and frustration over joblessness, poor schools and services, physical and social isolation from the city as a whole, and police brutality. It was the worst urban riot in 20 years, foreshadowing similar rebellions to occur a few years later in Detroit, in Newark, New Jersey, and in other American

Today Warts, a community of 52,000, has a new hospital, a civic center, and better bus service. A shopping center, named for the Reverend Martin Luther King Jr., opened last winter and includes the first full-service supermarket in the neighborhood since the riot. But those improvements fail to mask the universe of deprivation that is Warts in the 1980s.

Michael McCluster, 30, has been comprehensive job training or luckier. He earns \$7.60 an hour as a placement program is operating in housekeeping porter at a hospital the area today. "Coordination of north of downtown Los Angeles housekeeping porter at a hospital existing programs is described as poor," the 1985 report added.

He said getting to work requires a bus trip of as long as two hours each way from Watts.

"Some of these guys, they probably say, why should I work?" he said. 'If they sell dope instead, they can make a lot of money fast. But fast money only lasts for so long."

In 1965, reports of police brutality increased tensions. Since then, black officers have increased to 10 percent from 4 percent of the police force, and Hispanic officers to 14 percent from under 4 percent. Officers from both groups have risen through the ranks, a fact that is pointed out with pride by Mayor Tom Bradley, himself black and a former police officer.

But the deeper police-community problems have not been resolved, according to many in the community. The neighborhood's relations with the police "seemed to have slipped to an all-time low," according to the city-county report.

Dr. Poussaint believes that black people in Watts 20 years ago were in "a self-hatred mode" that, in younger black people, has since been largely lifted by the black

pride movement. He said, however, that this means that a repetition through the generations of such factors as welfare dependency and the phenomenon of teen-age pregnancies could throw them into "a cultural mode that may lock them in further."

# Soviet Hails 1970 Pact, Warns Bonn New List Issued

MOSCOW — The Soviet Union mixed praise with criticism in messages to Bonn Monday marking the 15th anniversary of a treaty that laid the basis for West Germany's learn the lessons of the war." improved relations with Eastern

Messages from the Soviet leadership to Chancellor Helmut Kohl and President Richard von Weizsacker, recalling the signing in 1970 of a nonaggression treaty, said that the Soviet Union favored the im-

proved ties. The messages made it clear, however, that the Kremlin would contime to oppose any moves toward reunification of the Germanys.

Soviet press commentators at-tacked Mr. Kohl's government for its support of Washington's policy siles in Western Europe and President Ronald Reagan's plans for a space-based missile defense shield. The commentators also criticized Bonn's rejection of proposals for a mutual nuclear test ban.

The 40th anniversary of the end of World War II has caused strains

between Bonn and Moscow. The Soviet Communist Party newspa-"Enormous gulfs had to be overper Pravda said Monday that precome - of alienation, mistrust and sent Bonn policies showed traces of

# Britain's Left Looks Ahead

The British Labor Party, together with the unions, has announced its economic platform even though the general election is thought to be some two years off. This is not too soon, given Prime Minister Margaret Thatcher's propensity to follow her triumphs in the South Atlantic and the coal pits with an accumulation of minor errors.

The platform is miles from the promises the miners fought for so bitterly - the defense of existing jobs, however inefficiently performed, by milking the taxpayer. For the left it is a middle-of-the-road message. It displays the traditional faith in economic planning, espousing a periodic national assessment in which government, organized labor and employers (but perhaps not the unorganized consumers) would argue things through to consensus. The problem is that attempts to reach rational and acceptable decisions through such a process have had little success since ancient Greece - whose economy was underpinned not by the consurger but by a slave class.

The manifesto is insular. It prescribes new import curbs, plus exchange control and tax discrimination to discourage capital outflows. It ignores the certainty of trade retor-tion by other countries and the beneficial effects of the profits and interest that capital export can earn from abroad, Britain's left has still not thrown off the myopia that set in when the original charms of international socialism faded some 70 years ago.

The manifesto is confusing on privatiza-

tion, fudging the scope of Labor's intentions for renationalization of the industries that Mrs. Thatcher is busy selling off. Since this particular cycle is about the worst thing that can happen to the major sectors in question, the Labor platform will not help confidence -a scarce resource in Britain today.

Understandably, the platform's primary target is to reduce unemployment, which stands at around 3.5 million, or some 12 percent of the work force. The plan is to step up public investment and repairs —on sewers and schools, roads and hospitals. Britain needs this to arrest its present dilapidation, and Labor argues that this sort of job creation has the edge over tax reduction be-cause it sucks in fewer imports. But to plan to create a million jobs in two years - twice the recent rate - is probably unduly risky, given the tendency for inflation to accelerate as economic growth picks up. Like most countries, Britain has not yet solved the problem of combining high growth and employment with acceptable price stability.

It is no attempt to among this sirely that

It is in an attempt to square this circle that the manifesto comes back to the concept of consensus: Government, unions and business agree, at top level, how the national cake should be shared between wage and profit increases, and their wise decisions are faithfully translated into individual bargains struck on the shop floor. This is historically unconvincing in Britain, where cooperation between Labor governments and the unions has been checkered at best. The past two decades are littered with solemn and binding agreements that bound no one for long.

Electorates must be wary when politicians make promises: They might try to deliver on them. The best service the Labor manifesto can do is to tempt the rising Liberal-Social Democratic alliance out of its present vagueness and force the divided Conservatives to produce something constructive.

INTERNATIONAL HERALD TRUBUNE

# Self-Rule Isn't Optional

It is good news that President Reagan's national security adviser, Robert C. McFarlane, has been putting new pressure on the South African government to move away from its abominable racial policies. Later this week we will see what the results of that pressure are. Meanwhile, there is one minor refrain on this subject that needs a little attention.

As the predictable violence in South Africa has grown, one has begun to hear people saying that the bloodshed and turnoil in fact tend to justify the repression by the South African government - that they demonstrate that South Africa's racial majority is not fit to participate in self-government.

Black Africa — not just that part under Pretoria's control, but all of it —has long been subject to a special standard in this connection. We suppose a case could be made that Hitler's Germany and Stalin's Russia indicate that whites are not ready for self-rule. But no one extrapolates that way where whites are concerned; the sweeping conclusion is saved for the African case. Oddly, when you read about tribal warfare among other takes -- inthe tribe is seen as something different. So is savagery on the part of large numbers of peo-ple who turn on each other and on those in authority. In South Africa this is viewed as primitive; in Ulster it is viewed as tragic.

The South African government has long been good at interpreting the unhappy effects of its own rule as vindication of that rule. It strips vast numbers of blacks of their freedom, of their capacity to earn a living, of an oppor-tunity to learn and of a chance even to live with their own mates and parents and children, It says to the world, "Look, they don't know how to govern themselves, they are unschooled, they do not live the same way we do. What are you asking us to do?" It cites the violence generated in large part by its own protracted repression as evidence that the blacks under its

rule are not responsible people. The terrible internal violence in South Africa is not evidence that the white government's apartheid policies are right. It is evidence that they are wrong and must be changed. THE WASHINGTON POST.

# **Keep the Oil Noose Loose**

Times are tough in the oil business. A barrel that brought nearly \$40 five years ago now sells for less than \$28. Oil rigs at idle in Texas on the brink. But what is bad for oil is not necessarily bad for America. Indeed, to think back just five or six years is to realize that for the country as a whole, the energy news is wonderful. Then, American necks were caught in an oil noose that foreign producers could tighten at any time — and did. Remember the gas lines that followed the revolution in Iran. In 1977, President Carter insisted that America would never again import as much oil as it was importing then: about 8.8 million barrels a day, almost half of total consump-tion. In part because of oil price decontrol launched then, he was and is right. By 1983, imports were down to a daily average of 5 million barrels a day. For the first six months

of this year the average is still lower, 4.8 million barrels a day. Still a noose, but loose. Holding down demand for energy is not mand like recession. But the explanation in America now is conservation. Energy consumption is about the same as in 1973: 74.3 quadrillion BTU's then, 73.7 "quads" in 1984. Yet the economy has boomed. In constant dollars, GNP has increased 31 percent. America has become vastly more energy-efficient. Good could be better, It would be an ideal time to impose oil import fees or a new federal gasoline tax — simultaneously enhancing more conservation, further weakening the OPEC cartel and yielding new revenues with which to reduce the federal deficit. Import fees would also shore up domestic prices, helping those faltering oil companies in the Southwest. -THE NEW YORK TIMES.

# Other Opinion

# Botha Has an Appointment

South Africa has an appointment with destiny on Thursday when President P.W. Botha is expected to announce an unprecedented package of reforms of the apartheid system. Appointments, however, are not always kept. On the evidence of his record, Mr. Botha is unquestionably committed to reform to an extent

unmatched by any of his predecessors. His nessage has consistently been, Adapt or die. [But] apartheid, like slavery, is such a distortion of nature that blinkers are an essential item of equipment for those operating it. The recent disorder, and the increased pressure from outside which has followed, have shifted the blinkers but have not torn them away. - The Guardian (London).

### FROM OUR AUGUST 13 PACES, 75 AND 50 YEARS AGO

1910: Strikers Militant in Spain SAN SERASTIAN, Spain - Two hundred strikers at the Bilbao mines attempted to stop work at a Northern Railway station [on Ang. 12] but were dispersed by the Civil Guards. The strikers are excited because the employers announce they will recommence work in the mines with strike breakers. This decision will not be put into practice until Tuesday [Aug. 16] since the Government has decided that it will protect every man who is willing to work on that day if no critical clash occurs before then. Tranquility prevails throughout the rest of Spain. Among the people arrested here for

causing a disturbance in the streets last week

was Senor Ome, president of the Bilbao Junta,

who at first gave another name to the police.

1935: Pessimism at Ethiopian Talks PARIS - Despite reports on their arrival here that Anthony Eden, British Minister for League of Nations Affairs, and Sir Robert Bansittart, Permanent Under Secretary for Foreign Affairs, have brought concrete pro-posals for a settlement, the conversations preliminary to the Three-Power Conference on the Abyssinian controversy are opening today [Aug. 13] in an atmosphere of pessimism. Hopes generated by the Ethiopian Emperor's concessions and the conciliatory attitude tak-en by the Italian organ "Affari Esteri" were dimmed yesterday by reports from Rome that the Emperor's proffers were considered ridicu-lous, and that the "Affari Esteri" reports did not originate from the Italian Foreign Office.

# America's Enduring Success Is a Successful Japan

By Anthony Lewis

T OKYO — When Japan surrendered, Douglas MacArthur undertook not just to occupy but to remake the country. If the general had been asked what his most extravagant hope was, I think he might have said: to channel the drive of this aggressive people away from militarism and into economic ambition.

That hope has been realized to an extraordinary degree. It is one of the great achievements of any foreign policy in modern times. But now the country that had the vision and carried it out, America, is in a state of alarm about the successful outcome.

Alarm may be too tame a word, judging by a recent dramatic expres-sion of American feelings about Jap-anese economic success. That was a ances economic success. Hat was a piece by Theodore H. White in The New York Times Magazine. Headed "The Danger From Japan," it rang with resentment and threat, ex-

with resentment and tureat, expressed in almost military terms.

"The power was all ours," Mr.
White wrote. "There was no question but that we had won this war." But now Americaus are challenged at home by Japanese products.
Those Japanese had better be care-

The Recipe

For a New

Depression

By Jack Kemp

The writer is a Republican

representative from New York.

WASHINGTON — Representa-tives Dan Rostenkowski and Richard Gephardt and Senator

Lloyd Bentsen say that their proposal

for a 25-percent import surcharge is a

shot across the bow of America's trading partners. Like every shot across someone's bow, this one would

miss its target. But it would score a

direct hit on American businesses,

workers and families. The Rosten-

kowski-Gephardt-Bentsen bill is no

different in principle from the Smoot-Hawley tariff, which helped precipitate the Great Depression.

Even some of the circumstances

are uncomfortably similar: a growing debt burden in the developing na-

tions; a progressive decline in American agriculture because of the rise of

the dollar against other currencies in real terms; failure to establish a sta-

ble international monetary system.

those problems, Congress enacted

and President Hoover signed the Smoot-Hawley tariff, which in-

creased duties across the board. It was the last straw for world trade,

The debtor nations could not repay

their debts if they could not export to

The Democratic sponsors of the new protectionist bill seem to want to

repeat the same mistake.
The main provision is a 25-percent

tariff on any country whose exports

to America are 50-percent higher than imports from it and whose

world exports exceed world imports

by 65 percent. (Why the difference?

There is almost a \$100-billion statisti-

cal discrepancy between total world exports and world imports, even

though the two are obviously identi-

cal; yet these statistics are supposed to decide whether or not we trigger an all-out trade war!) It turns out that this would selectively target Japan,

It is easy to see who this bill would

not help: American farmers. Japan, South Korea and Taiwan all make a

living by importing raw materials and

food and exporting manufactured goods, Japan, for example, is Ameri-

South Korea, Taiwan and Brazil

The world economy imploded.

In 1929-30, instead of correcting

ful, or we shall strike back—that was the tone of the piece. It charged the Japanese with winning economically up loyalty and plan years ahead. Hobart Rowen of The Washington suggested that the United States should have been less kind, less en-lightened, Presumably, it should have kept Japan in subservient status.

Yes, the Japanese are rough economic competitors. And yes, they have used some unfair tactics in protecting their home market. But can anyone doubt the main

But can anyone doubt the main reason for their success? They have made brilliantly designed, reliable, economical products. That is why Americans bought Japanese cars.

The visitor here quickly feels the commitment to work, the satisfaction of the most modest shop assistant in doing the job right. Even in an alien language and culture, Tokyo's international airport is easier to manage than Kennedy Airport in New York, with its confusion and squalor.

Those fearful of Japanese competi-

Those fearful of Japanese competition should think about correcting their own mistakes. Americans waste billions in corporate raids that pre-

Post, writing about the White article, noted that the United States last year had a \$20-billion trade deficit with Canada — but no one called that a threat. "Could it be," he asked, because Canada is white "while Ja-

pan is yellow?" It could.
Would Americans like the result of the kind of crude protectionist mea-sures against Japan that are now the talk of U.S. politicians? Economic

frustration might start to undo Gen-eral MacArthur's great achievement. The militarist spirit still lurks here and some think it is growing. Even in Hiroshima, sound trucks prowi the streets with right-wing militarist messages — a reminder of the alternative to the economic miracle that has rebuilt that flattened city. Would the countries of Southeast Asia be hapted er with an economically frustrated Japan? Would China be? One reason why America lags be-

hind Japan economically is deeply

ironic. It forced Japan to renounce militarism, but it has become a profoundly militarized society itself.

The United States faced a threat from the Soviet Union. But instead of

lealing with it rationally, it has again and again exaggerated the threat, see-ing "missile gaps" when none cousted. Now the compulsion to build more and more weapons is fed by the laboratories, the manufacturers, the pol-iticians, the local citizens who fear there is no other source of jobs.

"It is no longer a question of con-trolling a military-industrial com-plex," Jerome Wiesner, a scientific adviser to presidents, wrote in the current Bulletin of the Atomic Scientists. It is a question, "rather, of keeping the United States from becoming

a totally military culture."

By all means press Japan to compete fairly, But begin by understanding that the United States cannot compete effectively while it wastes billions on "star wars" and needless weapons, mortgaging its economic future with immense deficits. The fault, dear Brums, is not in our

The New York Times.

# A Nation of Confidence, for a While

WASHINGTON — The bomb that burst over Hiroshima and opened the atomic age was not the only explosion triggered by World War II that was to make a profound impact on our lives. The other was the enormous postwar surge of energy unleashed in America, as in the rest of the world.

The United States underwent revolutionary change, as it had af-ter the Civil War 80 years earlier. In both cases revolution came from marriage of pent-up energies and technologies with public policy.

There were enormous differences. World War II was a unifying experience, and the national morale and sense of power were never greater. The Civil War was destruc-tive and divisive, and even in the victorious North many were not sure that they had not lost more than they had won. Nevertheless, the two wars had similar impacts. After the Civil War the western half of the American continent was scaled, and the nation was industrialized and urbanized in relatively short order. Government policy in the form of subsidies to the railroads, encouragement of settlers through the homestead and land grant acts plus a benign attitude toward late 19th century industrial statesmen and robber barons alike

was a major factor in this.

Public policy played a similar role after World War II. For starters, it augmented the awesome energies of the nearly 13 million veterBy James R. Dickenson

ans obsessed with the desire to make up what they saw as lost time. The GI Bill of Rights transformed America from a nation of renters to one of home owners. More important, however, were the educational benefits — the \$75 per month plus tuition, books and lab fees that encouraged more than 8 million of those World War II vet-

erans to continue their education. Intended partly to keep the re-turning GIs from flooding the job market, the GI Bill opened up colless, which before the war had been the province of the well-to-do few, to nearly everyone. That demolished the one vestige of a class society in America. It is impossible to imagine anything that enlarged and strengthened the middle class more than the expansion of opportunities for education and home ownership.

Young men and women who four years before had not dreamed of going to college trooped off to Har-yard, Oklahoma A&M, UCLA and Kenyon to become electrical engineers, doctors, sales managers and schoolteachers. Many farm boys got degrees in agriculture; the ever increasing productivity of that industry was one result. Never was an investment of \$14.5 billion, the cost of the World War II GI Bill, so

handsomely returned.

That revolution in education was a major factor in a great surge of

national affluence, and not just in the production of goods and ser-vices. Sales, advertising and marketing, powerful engines of the private enterprise system, benefited from GIs who started out to be historians or English literature teachers but turned their education

to more mundane pursuits. Postwar affluence and technology, particularly the antomobile and television, reshaped society, which was and is organized around the automobile. This led to greater mobility and personal freedom as millions escaped the daily scrutiny of family, church, small towns and ethnic neighborhoods.

There is a down side to this, of course - loss of community and intimacy, weakening of family ties. Affluence and isolation brought problems of their own. Still, no one would even dream of turning the clock back on the nation's post-World War II accomplishments.

Looking back points up the dra-matic contrast between World War II and the Vietnam War. With Victnam, the accounting has been pri-marily of pain, division, loss and regret. But victory in the great, twofront effort of World War II was an enormous feat that united Americans and focused energies.

Most Americans were confident 40 years ago that there was nothing they could not do. Twenty-five years were to pass before that assur-ance was significantly tarnished. The Washington Post.

# The Setting In Manila Is Familiar

By Robert K. McCabe.

MANILA — The setting is national fully familiar. Here is a tenacious, wealthy Southeast Asian ofgarchy, supported by an army that is increasingly mistrusted by the people it is assigned to protect and that is not quite coping with a blossoming Communist insurgency.

The economy, based largely on raw materials, is floundering. The political opposition is fragmented and leaderless. The National Assembly is ineffectual. And the U.S. massing

presence is significant.
This is Manila in summer 1985. It is also Saigon in summer 1968.

During that summer 22 years ago, Westerners in Saigon — diplomás, journalists and businessmen — were trying to decide whether the South Vietnamese government had the will, and the ability, to deal with its polin-

and the ability, to deal with its political, military and economic problems.

In Mamia these days, the same process of analysis is going on, and similar questions are being asked. No one is coming up with clear answers.

But if one thing is certain in this very uncertain capital, it is that Viennan-scale U.S. military intervention is about as lifety as snow.

is about as likely as snow.

This despite the view of aemor
Western diplomatic observers that
the Communist insurgency led by the New People's Army continues to

(16 184) (18 184)

1.1

y Mariana

WE FLY TK

Vosta or sex

CONVENIENT I

erow steadily stronger.

Military activity, once largely concentrated in the rich southern island. of Mindanao, has spread north, via Samar and Negros, to Luzon itself. This development is serious enough "But this military activity", a senior Western diplomat said, "is only the tip of the locberg. What's

more important is the growth of the NPA infrastructure."

The growth has been at least as dynamic as the spread of military ashes. And even in some areas

where fighting is rare, the NPA is known to be constructing its system of parallel government.

Questions about the capabilities of the government of President Fertinand Marcos bring camous answers. "There is a growing awareness of the seriousness of the problem," says one senior Western diplomat. "In the past year there's been a very senous change in the posture of the govern-ment toward the insurgency. Though there's still far too much power in the executive branch, there's been some diffusion lately."

The problem of army reform sags at public consciousness. A significant reason for the growth of NPA infin-ence has been the army command's inability to prevent some units from overreacting to NPA provocations. For the peasantry, caugin in the cross fire, the results have been bloody.

Many younger officers have joined the reform movements that have

spring up in the army in recent motion. These movements, simed at restoring the army's inargity, are still in their early stages. But the Marcos government, and foreign observers as well, take them senously. They are now, says one Westerner, a "recognized force" on the Philippine scene.

Economic reforms are at an equalsenior diplomat says, "the macroeco-nomic picture is getting better; infla-tion has been trimmed and foreign debts rescheduled. But there is still anxiety at high government levels."

Overall, the broad public sense of

frustration — and anger — with the Marcos government persists. One serious area of contention is the presideat's failure to squarely address recent charges that he, his family and cronies have illegally invested millions of dollars overseas.

The president's mysterious illness. which in recent years has caused him to retire from the public scene in late summer for months at a time, raises deep concern about the leadership.

Perhaps, as some observers hope, the national emmi will begin to dissipate as the national elections of 1986 draw nearer. But for now, the ques-tions persist. In Saigon, by 1963, most observers had discarded the old slogan of "Sink or swim with Ngo Dinh Diem." In Manila these days, Save your carcass with Ferding Marcos" draws even less enthusiasm.

The writer, a deputy editor of the International Herald Tribune on leave, is a specialist in Asian affairs.

### LETTERS TO THE EDITOR

Investment by Filipinos

In response to "A Manila Financier

I read with much regret the state-ment by Enrique Zobel, former head of Ayala Corporation: "If you had money to invest in Southeast Asia, the Philippines is the last place I would tell you to put it now." I feel compelled to make clear the position of Ayala Corporation. Our

investment decisions are based on the proposition that in a time of crisis we must do our part, because if we all adopt a wait-and-see attitude, nothing will ever happen. What the Philippines needs is new investment to hasten economic recovery, and Filipinos themselves should take the lead. Thus, despite the depressed simation in the microelectronics industry Ayala is in the midst of a 95-millionpeso (about \$5.4 million) plant expansion for Integrated Microelec-

tronics, Inc., an Ayala subsidiary. Believing that food production is a vital area in economic recovery, Pure Foods Corporation, Ayala's food manufacturing subsidiary, is in the final stages of an expansion and diversification program entailing investment of about 80 million pesos. We have invited institutional investors from abroad to participate in the equity of the new venture, and it looks as if we may be able to launch this before the close of the year.

And Ayala has invested some 70 million pesos in land for the development of a new residential subdivision Looks Abroad" (Aug. 1) by Steve Lohr: in northern Metro Manila. On these three projects alone we

have in effect committed close to a quarter of a billion pesos in priority thrusts such as exports, food production and residential development. This represents in part our contribution to what we believe should be a national effort to spor our economy.

JAIME ZOBEL de AYALA Chairman and President Ayala Corporation, Manila.

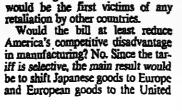

### No Round Lumbers

Regarding "Square-Trunk Trees Found in China" (Science, Aug. 8); As a mathematician, I was perturbed when I read about the discovcary of the species of tree with a square trunk. Why was I not informed as to whether it has a square root? PETER McCABE

ca's single biggest agricultural cus-tomer. And to the degree that American farmers compete with Brazilian farmers, it is mostly abroad, not in LEE W. HUERNER, Publish RENE BONDY Danty Publisher
Associate Publisher U.S. markets. The 25-percent tariff would raise the prices paid by American farmers for equipment, although the world prices they received would

be no higher. And U.S. farmers

the United States. They sought to ease the pressure by devaluing their currencies and imposing retaliatory States. That would not help Ameritariffs. The dollar rose even further. ca's trade balance at all.

> To the degree that any American businesses could gain, it could only be at the expense of other American businesses — and, of course, American households. Both would be hit with price markups from foreign and domestic suppliers. American goods would cost more at home and abroad. Productivity and the standard of liv-ing would fall, and jobs would be lost. Any reduction in imports would be more than matched by a loss of exports. And how can Brazil repay its debts if it cannot export? How can Japan invest its savings in the United States if it cannot transfer the re-

sources to America through trade?
In solving a problem, it helps to
know what the problem is. Part of the
U.S. trade deficit is not a problem. Countries that grow faster than the rest of the world, as America has done, generally import capital seek-ing a higher return, in the form of a trade deficit. This part of the trade deficit will automatically disappear if other countries pursue growth-oriented policies, if not, America does not need to slow down its economy to reduce the gap, as long as the goods are used to increase economic capacity. The United States ran a trade deficit for its first 100 years.

But part of the trade deficit is a problem. As in the 1920s, American farmers, manufacturers and mineral producers - industries that export or compete with imports — have been priced out of world markets by the dollar's rise. Just as the fall of the dollar in the 1970s provoked protectionism abroad, the rise of the dollar in the 1980s has led to calls for protection in the United States. The instability of exchange rates has cost many jobs in both the United States and the Third World. The obvious answer to a monetary

policy that permits a rising dollar or a falling dollar is one that preserves a stable dollar. We need a domesti monetary policy geared to the value rather than the quantity of money. And we need to return to an international system of stable exchange rates that is neither inflationary nor deflationary. (The Rostenkow-ski-Gephardt-Bentsen bill does have section calling for movement toward stable exchange rates.)

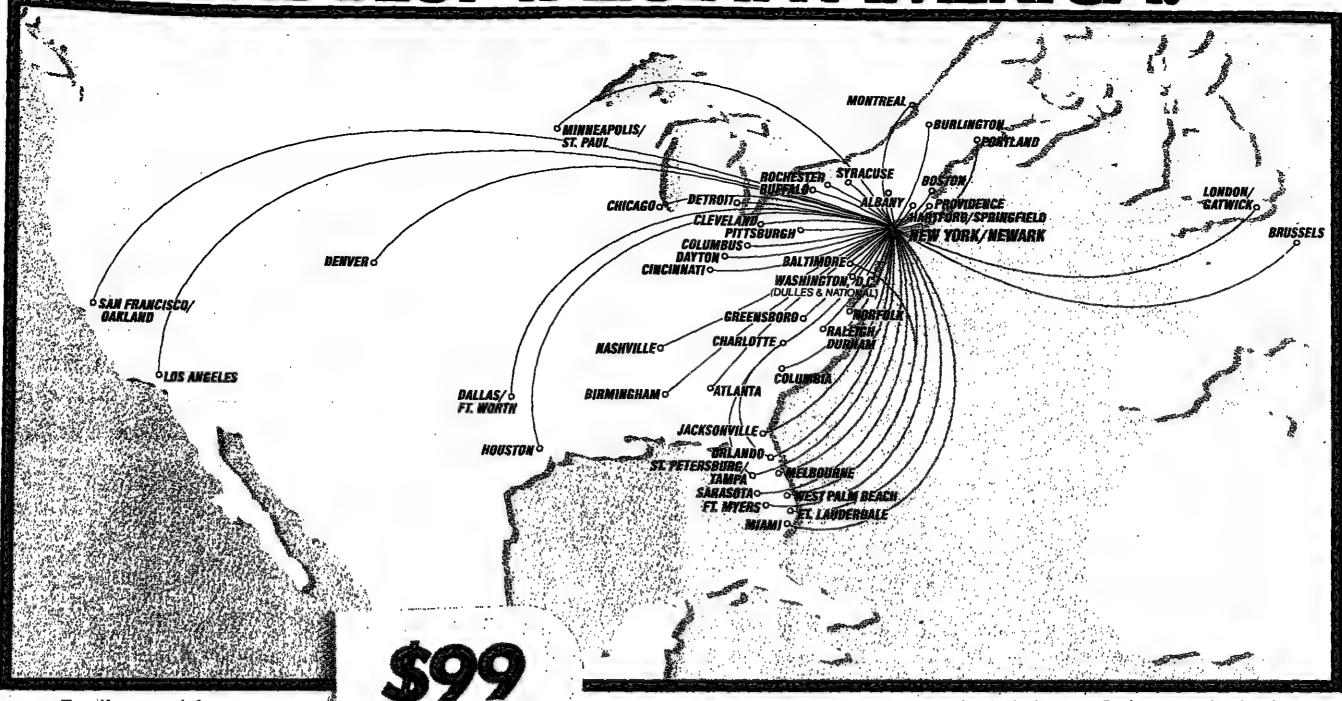

At the same time, we need a Reagan round of talks on trade liberalizaion, patterned on the successful edy round of the 1960s. This was the goal of the statesmen who designed the postwar Bretton Woods monetary system: to dismantle the beggar-thy-neighbor protectionism and competitive currency devaluations of the 1930s.

Politically the Democrats might do well to consider the kind of lnck we Republicans had with the ideas they are now thinking of adopting. The Smoot-Hawley tariff was the prelude not only to national economic but also to Republican political disaster. As E.E. Schattschneider remarked about the soon-to-be-minority Hoover Republicans in his classic study of the Smoot-Hawley tariff: "To manage pressure is to govern; to let

The Washington Post.

pressures run wild is to abdicate."

# THE AIRLINE THAT OFFERS THE BEST VALUE TO AMERICA ALSO OFFERS THE BEST VALUE IN AMERICA.

For the past four years, People Express Airlines has offered Americans the kind of flights they want at the kind of prices they want.

thing

mila

niliar.

V

In that short time over 24 million people have flown us. This has made People Express the fastest growing airline in the United States.

In fact, in the world.
And starting September
8th, we're bringing to Europe
the same simple concept: The
most intelligent way of getting
from one place to another.
People Express now offers you
daily non stop service on
Boeing 747 jets from Brussels
National Airport in Zaventem

to Newark International Airport for an incredible \$99\*. And from Newark Airport it's just 20 minutes to Manhattan.

## WE FLY TO A LOT OF PLACES FOR JUST A LITTLE.

Once in Newark, People Express offers a lot of connections to a lot of places. You see, at People Express, we don't think it's enough to offer low prices to just one city.

In short, People Express offers low prices every seat. Every flight. Every day. And absolutely no restrictions.

# PAY FOR YOUR TICKET IN THE MOST CONVENIENT PLACE: ON THE PLANE.

At People Express, we think it's ridiculous to spend as much time in line

as you do in the air.

So you can make your reservation in advance with us and purchase your ticket right on the plane. We prefer American dollars but will accept Belgian francs at our prevailing exchange rate.

# HOW DO WE DO IT?

By giving you the things you want. Daily flights; the ability to make reservations; prompt courteous service...in the air and on the ground, plus clean, comfortable Boeing jets.

And eliminating the things you didn't want but always had to pay for...airline food for instance.

Of course, if you're willing to spend a little of all that money you're saving, you can buy a first rate snack or beverage on board.

### YOU AND YOUR LUGGAGE NEED NEVER BE SEPARATED.

We've eliminated another of your pet peeves; waiting for your luggage. We not only allow you to carry your own luggage aboard the aircraft—we want you to. We provide you with an unusually spacious overhead and underseat area that can accommodate a garment bag (or small suitcase)

# PEOPLEXPIESS FLY SMART

and a briefcase. Or the equivalent.
But if you have additional luggage
—or luggage you want us to handle,
we're happy to do it for \$3 a bag.

### OUR PREMIUM CLASS. SAVE MONEY IN STYLE.

It's the comfort you'd expect in First Class, but for only \$450\*.

Leather seats, two abreast. Fine crystal, china, silverware and linen. And service that is second to none. With every amenity available to you on an a-la-carte basis. People Express Premium Class is for the business traveler who knows that one of the best ways to make money is to save money.

### AN OWNER IS NEVER MORE THAN A FEW STEPS AWAY.

From the person who welcomes you on the plane to the person who pilots the plane, each and every member of our staff owns thousands of dollars of our stock.

The result quite simply, is the first airline where attitude is as important as altitude.

### THE PEOPLE EXPRESS PLEDGE.

Right here, in public, People Express makes this pledge. Our goal is, year in year out, to offer the lowest unrestricted airline prices and the highest value. Every seat. Every flight.

We offer you our promise that People Express will always be the smartest way of getting from one place to another.

# Growing Ability of U.S. Japan's Prosperity in Defeat Leaves Some Fearing It Won't Last (Confidenced from Page 1) 11 P.M.? How sane and stable can children be when life for them is an unreleating battle for entrance to a complete state of the control of the c

Washington Past Service

WASHINGTON — The United States is operating a little-publi-cized worldwide nuclear monitoring system that is designed to detect all Soviet underground test explosions, according to testimony before Congress and former govemment scientists.

In June, the United States added a sophisticated seismic array in Norway as part of a program to upgrade the system. Washington is negotiating with another Nordic government for a similar facility, according to sources.

The new seismic arrays, which measure high-frequency signals, will be able to pick up extremely low-vield nuclear explosions at much longer distances than has been possible with a lower-frequency system, operated in cooperation with Norway since 1970.

If the Soviet Union tries to hide tests by exploding a nuclear device inside a large cavern, a scientist said, it is unlikely to be successful because the new arrays can detect tests even under 10 kilotons.

Small underground nuclear explosions are used by the United States and the Soviet Union to test the fission triggers for hydrogen sions of the weapons. They are used less frequently to test the reliability of weapons already in the stock-

b. Associate Professor ENT - I post c. Associate Professor in Anaesthesia - 1 post d. Associate Professor in Orthopaedic Surgery Condidates for surgical posts should have at least 5 years dinical and teaching experience. They should also possess a Ph.D. or higher professional medical qualifications (e.g. F.R.C.S.) in their respective fields.

### Diagnostic Radiology

a. Professor - 1 post b. Associate Professor -2 posts c. Assistant Professor Experience in one or more of the following areas is needed: Body-CT, Orthopaedic Radiology, Paediatric Radiology, Gl and GU Radiology, and US Interventional Radiology.

### Nuclear Medicine

a. Full Professor -1 post -2 posts b. Assistant Professor

Experience research and ability to teach are highly required. Candidates must have been involved in undergraduate and postgraduate teaching and basic and clinical research. Knowledge of computers applied to medicine is desirable.

## **Organ Transplantation**

- a. Assistant/Associate Professor in Transplantation Surgery Applicants should have a background of general, vascular or urogical surgery, possess the Fellowship of the Royal College
- or be certified by a recognised Board of Surgery or their equivalent. They should have 2 to 3 years of training in any area of dinical organ transplantation. For the Associate Professor another additional 3 to 4 years of practice in dinical transplantation surgery are required.
- b. Assistant Professor in Experimental Surgery. Applicants should have a background in surgery or immunobiology, possess a surgical Fellowship or a Ph.D. or equivalent
- and have 2 to 3 years of experience in surgicul research preferably in an area related to Organ Transplantation.

  c. Assistant/Associate Professor in Clinical Bane Marrow Trans-Applicants should have a background in haematology, ancology or immunology, with Postgraduate Fellowship, Member-
- ship of Certifying Board in the speciality and have 2 to 3 years of training in Clinical Bone Marrow Transplantation. For the position of Associate Professor 3 to 4 years of experience in clinical Bone Marrow Transplantation will be
- d. Assistant/Associate Professor in Transplant Intensive Care.
- Applicants should have a background in Anaesthesia, Respiratory Care or Metabolism, passess the appropriate Fellowship, Membership or appropriate Board Certification or equivalent and have 3 to 4 years of experience in the field.

### Biochemistry a. Associate Professor

b. Assistant Professor -1 post Pathology Histopathology/Cytology a. Full Professor b. Associate Professor - 1 post c. Assistant Professor

### a. Associate Professor Microbiology

Clinical Chemistry;

a, Full Professor

Hoematology;

- Clinical Immunologist; a. Associate Professor 1, Condidate should be experienced in Clinical Immunology
- with a minimum of 3 years experience in the routine operation of a routine dinical immunology laboratory. 2. Condidate should have a Ph.D./MD and Professional

- qualification e.g. M.R.C. Path or American Board or equivalent degree.
- Clinical Virologist; a. Professor/Associate Professor
- 1. Will be responsible for viral serology unit which mainly involves hepatitis and rubella serology. He will be responsible for cell culture laboratory, virus isolations and preparation of viral antigens and antiserum. Both
- jobs include teaching, research and dinical work, 2. Clinical Virology experience. MD, Ph.D. MRC Path or equivalent. Internationally known for work in clinical virology.
- Virologist;
- a. Associate Professor/Assistant Professor Job description:
- Basic virology research, or molecular virology. Teaching undergraduates and postgraduates. Research in basic virology. Ph.D. with sound research experience.

### Community Medicine and Behavioural Sciences

- a. Associate Professor in Medical Psychology Applicants should be able to demonstrate teaching and research competence. Preference will be give to condidates who have experience in leading introductory and medical psychology courses to medical and allied health students, and who are interested in contributing to the development of
- posigroducie programmes Associate/Full Professor in Epidemiology Assistant/Associate Professor in Epidemiology Applicant should be able to demonstrate teaching and research competence in the application of epidemiological methods to either etiological or health services development problems. The successful condidate is expected to take active part in undergraduate and post graduate teaching, using field demonstration and small group teaching techniques. He would be encouraged to follow his own line of research in addition to

assisting the Department, Faculty and Ministry staff in the

### REQUIREMENTS FOR APPOINTMENT

design and conduct of quantitative studies,

Applicants should possess a Ph.D. or higher professional qualification, i.e. F.R.C.S., M.R.C.P. etc. in their respective speciality and have conducted and published research in their field, Professors should have 14 years' experience, 4 as an associate professor or its equivalent, i.e. senior lecturer or reader. Associate Professors should have 9 years' experience, 4 as an assistant professor or its equivolent, i.e. lecturer.

### CONDITIONS OF APPOINTMENT

Scionies: Total monthly salaries will be within the following scales according to qualifications and experience (1KD) = £2.5, US\$3.2 opprox.).

Professors with clinical appointments = KD1210KD1370 (8 increments).

Professors medically qualified with medical science appointments = KD1140-KD1300 (8 increments).

Professors non-medically qualified = KD1070-KD1230

(8 increments). Associate Professors with clinical appointments = KD 989-KD1149 (8 increments).

Associate Professors medically qualified with medical science appointments = KD 932-KD1092 (8 increments). Associate Professors non-medically qualified = KD 875-

KD1035 (8 increments). Assistant Professors with dinical appointments = KD 768-KD 928 [8 increments]. Assistant Professors medically qualified with medical science

appointments = KD 724-KD 884 (8 increments). Assistant Professors non-medically qualified = KD 680-KD 840 Clinical Supplements: In addition to the above university solaries

there will be monthly clinical supplement poid by the Ministry of Public Health for 10 months a year to medical school staff with dinical service commitments. Professor and Chairman

Professor KD200 Associate Professor KD150 **Assistant Professor** KD100 Conference: A member is entitled to attend one academic conference a year which would be subject to the University rules

and regulations. Greaturity: There is a greaturity of one month basic solary for each, year employed payable on termination of contract. Housing: Suitable furnished, air-conditioned accommodation, electricity and water free of charge.

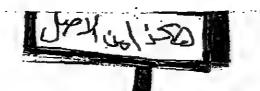

Medical Care - Free, comprehensive treatment is available in Kuwait under the State Health Service. Travel - Air tickets are provided from the country of recruitment for the appointee, spouse and up to 3 dependent children under 20 years. Thereafter, return air tickets are issued annually to the

country of citizenship or permonent residence. On termination of contract, oir fickets are provided to the country of recruitment. A baggage and freight allowance is also provided. Vacation - 60 days poid annual leave and various rational

Education - This is provided free in State Schools where the instruction is in Arabic. Staff who have to send their children to non-Arabic schools in Kuwait will have the tuition fees of up to a mozimum of 3 children met by the University. Toxation - There is no income tax in Kuwait, Currency is

### transferable without restriction. METHOD OF APPLICATION

Curriculum vitae in duplicate which should include the names of 3 referees, personal particulars, qualifications with dates, cores history, teaching experience, research accomplishments and where appropriate directol experience should be sent to the Director of Planning and Academic Staff Recruitment, Faculty of the Company of th Medicine, University of Kuwait, Health Science Centre, P.O. Bar 24923, Safat, Kuwait, to arrive no later than 30th October

racy means the right to form politi-cal parties, political freedom is rampant in Brazil. Since the armed forces stepped down in March, 25 new parties have been legalized and more are waiting in the wings.

The five parties permitted to op-crate in the final stages of the 21-year military dictatorship remain the only ones with widely recog-nized initials, yet even they are adding to the alphabet soup as dis-sidents form their must recognize

sidents form their own movements.

The result has been confusion, caused not only by the multiplication of parties, but also by the similarity of their names. Six parties describe the second of their names. describe themselves as "democratic," five refer to "workers," and three use the word "liberal." There is a PRT and a PTR, a Brazilian Communist Party and a Communist Party of Brazil

In November, the strength of old and new parties will be tested in mayoralty elections in state capi-tals. As the first elections since the tais. As the first elections since the dictatorship ended, they also will gauge the country's thinking before legislative elections next year, and they may even create favorities for the first direct presidential elections since 1960. Those elections are expected to be called in 1988.

"The snowingous organization

The spontaneous organization of new parties reflects a level of energy that is new," said Candido Mendes, a political scientist. "But is this the best way of channeling the population's aspirations?"

Some experts say they see the phenomenon as a natural reaction to the lifting of a wide range of political controls, including limita-tions on the right to form parties and strict requirements of party loyalty. Pent-up ambitions and long-proscribed ideas suddenly are

Yet the galaxy of new parties also reflects the traditional weakness of Brazil's political movements. Even before the 1964 coup, they were built around regional in-

terests or charismatic individuals rather than clear ideological positions. They rarely displayed much internal democracy, with candidates selected behind the scenes rather than at conventions.

Therefore, it proved easy for the military regime to dismantle the existing parties and decree two new parties - one pro-government, the other in cautions opposition -into existence. As the country prepared to return to democracy in the early 1980s, these two parties were forced to change their names, while three new opposition parties were authorized to run candidates.

By last year, even this structure had begun to disintegrate, with an important faction from the govern-ing Democratic Social Party de-fecting to a new party, the Liberal Front. This faction in turn backed Tancredo Neves, the Brazilian Democratic Movement's candidate for president, in an electoral college vote seven months ago.

But after Mr. Neves died without taking office and his running mate, José Sarney, became president, the governing coalition began to fall apart as squabbling crupted be-tween and within its two parties. Communist legislators who had been elected in 1982 under the Bra-zihan Democratic Movement's banner left to form their own bloc.

"The end of restrictions over parties made it more complicated to maintain discipline and order," said Senator Fernando Henrique Cardoso, the government's spokes-man in Congress. "Anyone could leave and form his own party."

Aspasia Alcantara de Camargo, a scholar who has written extensively about Brazilian politics, said: "Political parties do not enjoy pub-lic credibility. And the standing of Congress is even worse."

Recently, the image of Congress was further bruised when seven members were photographed vot-ing twice on important bills and when they escaped with only a rep-rimend

BAMENDA. Cameroon — Pope John Paul II urged Africans on Monday to ignore ideas from the developed world on limiting the size of families by contraception and abortion.

On a visit to Bamenda, in the English-speaking western part of country, the pope praised the high value Africans traditionally placed on children.

He said these were threatened by "a powerful anti-life mentality," a term the Roman Catholic Church uses for artificial birth control and abortion. This mentality, the pope said, is

widespread in developed countries and is being passed on to developing nations as if it were the prelude

to development and progress. He warned against "the path of selfish materialism and consumerism which have produced so much suffering in other parts of the world

# Insurgents in Uganda Said to Expand Control

KAMPALA — Guertillas who July 27 coup. have resisted ending a four-year insurgency, despite the overthrow last month of President Milton Obote, are now in control of most of western Uganda, according to reports received here Monday.

The reports of the rebels' gains came a day before peace talks.

The latest garrisons taken by National Resistance Army guerrillas are in the two largest cities in southwestern Uganda — Mbarara, about 180 miles (288 kilometers) from Kampala, and Kabale, 85 miles further southwest, according to frequent reports that could not

Reliable sources in south-central Uganda, who asked that their names not be used, said other rebel units were converging on Naka-seke, 30 miles north of Kampala, with the apparent intention of establishing a major base.

Both there and in the west, soldiers loyal to the new government were reportedly disarmed with lit-

The National Resistance Army. led by a former defense minister. Yoweri Museveni, is the largest of several guerrilla groups that had been fighting Mr. Obote's forces.

Lieutenant General Tito Okello. the new head of state and chairman of the military council, announced Saturday that he and other leaders would go to Tanzania for talks with Mr. Museveni on Tuesday.

The guerrillas have said repeatedly they are willing to discuss power-sharing arrangements. Their principal condition — based on a refusal to recognize the new gov-ernment — was that General Okello present himself only as army chief, not as head of state. In another development, a Ro-

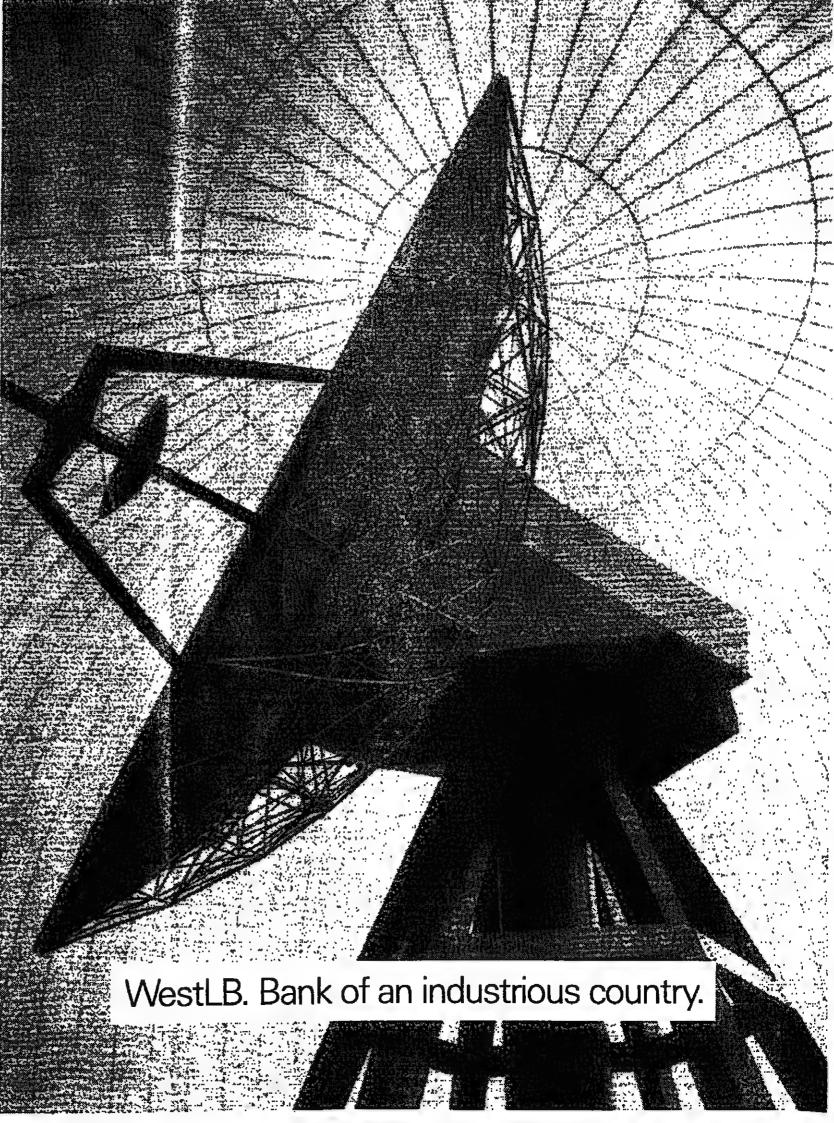

man Catholic newspaper, Munno, reported that at least five persons were killed in a weekend of looting.

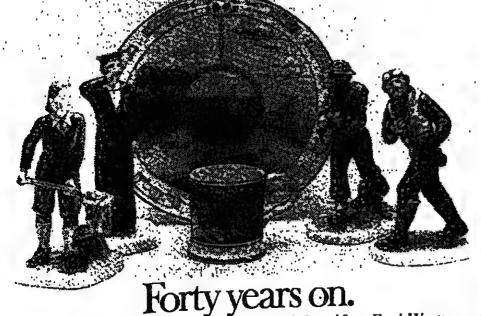

The incident occurred Saturday night and early Sunday in Jinja, Uganda's second-largest city, when soldiers fired into the air and then set upon people who had gathered to welcome Yoweri Kyesimira, a former transport minister who had been freed from detention.

# Heating Up Siberia With Jazz' Warmth

mational Herald Tribune

T) ARIS — It was minus 40 de-Figrees Centigrade (minus 40 degrees Fahrenheit) in Novosibirsk. Alexander Ivansky's hands, as he waited 35 minutes for a bus, stuck to his face when he rubbed it. But after the somber, frozen streets, the saxophonist Vladimir Tolkachev's version of "Satin Doll" in the soldout, 700-seat hall burned off the chill. "You really appreciate the warmth of jazz," said Ivansky, who emigrated to France in June, when you have to light the environment to hear it."

Calling Novosibirsk "the capital of Russian jazz," he compared it with 1960s Paris, where American avant-garde musicians who could not get accepted at home were developing their new "free" style. Moscow, "over the Urals," is like New York — the marketplace.

"It may be hard for Westerners to comprehend, but it's very simple," Ivansky said, shrugging: "In the European part of Russia, you can buy something to eat. Shopping in Siberia is like hunting. Every day you must hunt."

Ivansky was born in Novosibirsk 30 years ago. After studying physics and mathematics, he was awarded a fellowship in Akademgorodok, a nearby scientific center. He listened to Bill Evans, transcribed his solos, practiced them on

magazine, published in Warsaw.
"I was a communicator," he said, in passable English, "I told the world about Siberian jazz. I had access to foreign media because my wife, Anne, is French. I borrowed films from the French Embassy -Michel Petrucciani with Charles great impact on the musicians of

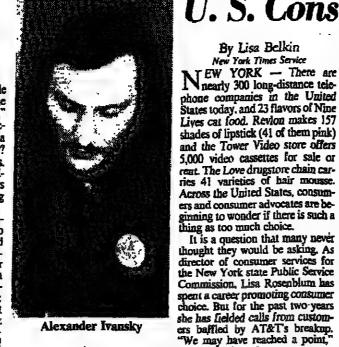

He calls them "a tight circle." They huddle together under the umbreila of "Creative Jazz Unity," posia for 10 years. "These exceed in they wrote positive reports."

musical quality, geographical scale and organizational complexity the official Philharmonic programs," Ivansky said. "But CJU is not rec-ognized officially, it cannot have a bank account." Who are they? "Scientists, intellectuals, doctors. Officials do not welcome such private organizations. Its members work very hard and receive nothing but moral satisfaction.

The CJU president, Sergei Belichenko, a medical researcher who also plays drums, was interviewed by Ivansky in Jazz Forum: "Siberian jazz has only really existed for five years, since clubs appeared in cities like Kemerovo and Krasnoyarsk." To this, Ivansky adds: "Many CJU musicians have built solid reputations on the Soviet jazz scene. The trombonist Victor Budarin won the Soviet critics' poll from 1978 to 1983; Igor Uvarov seems to be the only competent vibist in the Soviet Union, And in the past two or three years, interesting groups have begun to appear in

The critic Efim Barban was an "ideological leader" who spread the word about Siberian jazz in a ivate newsletter before emigrating to London. He made 30 copies. the legal limit for such an unofficial journal. They circulated hand to hand. Gunther Schuller, touring the country leading his New En-gland Conservatory Ragtime En-semble, told Barban; "I was more the piano. But he was always an impressed by the quality of the jazz amateur musician. Then he became I heard in Novosibirsk than anya correspondent for Jazz Forum where else." Ivansky quoted Schuller with pride, while admitting that other cities — Leningrad, Tallinn, Vilnius — have produced better known "names," such as the Vyacheslav Ganelin trio

Belichenko used the AACM, the cooperative that gave birth to the Art Ensemble of Chicago, as a Lloyd, Memphis Slim, Sun Ra, a model of an organization run by documentary about the Nîmes Fesand for musicians. The CIU spontival You cannot imagine the isolation out there. These films had a
rary Music" in 1977, bringing jazz musicians together with representatives of contemporary classical music. "These were people tired of playing the same old standards in their forms," Ivansky said. "All five an organization that has been pre-concerts were sold out. Many critsenting festivals, concerts and symics were invited to Novosibirsk and

Alexander Ivansky

There is a Siberian Jazz Festival about every two years ("We are never sure it will happen until the last minute"), with a concert or so a month in between. Otherwise the musicians "work s-t jobs in restaurants where they make good money but degenerate because they have to play superficial pop songs and they drink very much every night."

Things are more or less the same everywhere in the Soviet Union: "Jazz is tolerated but not encouraged. Nobody is sent to prison for it, but to play this music involves sacrifice." There are about 12 groups authorized by Gosconcert, the official state booking agency, to play jazz. "They can make a living at it, but not the others. For a CJU concert, musicians get paid only if there's a positive balance."

Belichenko told Ivansky in Jazz Forum: "I dream some day of forming a Siberian Jazz Association. Then maybe an Asian one." Here Ivansky inserted a parenthetical "(laughs)" in the interview.

ivansky appears to have had much of the capacity for laughter wrung out of him. He and his wife read a copy of "1984" in Novosibirsk and agreed that reality was worse than the book. "Life is terri-ble in Siberia," he said. "You must live with a lot of contradictions. As with Negroes in the States, great energy is combined with enormous frustration. But contradiction can be good for an art form."

before in virtually every category and many are more complicated than ever before," said David Berliner, a spokesman for the maga-zine. He said readership had inshades of lipstick (41 of them pink) creased in part because "people and the Tower Video store offers feel overwhelmed."

Much of the expansion of options can be traced to the deregulation of major industries in the last five to ten years. "As a result of deregulation, the theme of the 80s is choice," said Barbara Berger Opotowsky, president of the Better Business Bureau of Metropolitan New York. "Never before have consumers had as many choices in areas like financial services, travel and telephone service.

The breakup of AT&T created seven regional telephone companies instead of one national and paved the way for about two dozen long-distance phone companies in the New York area and about 300 throughout the United States. Regulation of airline fares ended in 1978 and now "there are more flights, more airlines, more fares," said Dan Smith, manager of consumer and industry affairs for the

Airline Passenger Association. Recent changes in financial services include eliminating the interest ceiling on saving deposits, exinding money-market funds and individual retirement accounts, availability of interest-bearing checking accounts and electronic methods of transferring funds, said Meredith Fernstrom, senior vice president for public responsibility for American Express.

"Coming all at once, this can be ighly confusing," Fernstrom said. "It takes longer to make informed decisions and people tend to make them on habit rather than on infor-

A decade ago the average super-market carried 9,000 items. Today it carries 22,000, said Robert Wunderie, a vice president of Pathmark supermarkets. A study by the Manhattan advertising agency Dancer Fitzgerald Sample found that 235 new items were introduced to conbe increasing as well. The Better Business Bureau of Metropolitan New York received tens of thousumers in May, the highest total in the 21 years since the monthly survey began. Among the new producis are a worm-shaped version of sands of requests for its report on Gummy Bears candies and a felt-At Consumer Reports magazine, tipped pen designed for polishing circulation has reached 3.4 million, nails.

cat isn't even the one who decides," Wunderle said. "It's probably better that way. Now only the people are confused."

Manufacturers and retailers emhasize that the ever-expanding variety in the marketplace is an attempt to cater to, rather than right one. You go to a department confuse, the consumer. Of the 157 shades of lipstick, Nancy Risdon, a spokesman for Revion, said: of them, or they wouldn't be there. We don't make products to sit on the shelf."

The company is stressing its plethora of colors in magazine ads. Sweet confusion," reads the headline beneath a picture of a lipstick tube: "41 shades of pink, 29 shades of coral, 18 shades of red, 17 shades of purple, 24 shades of brown, 25 shades of wine." "A lot of people are spending a

lot of time on choices where the differences are not all that pro-found," said Dr. Norman Sussman, a psychiatrist at New York Univer-

U. S. Consumers Baffled by Oversupply of Choice ence once you get it home? Many consumers seem to agree.

"About a year ago I vowed never to set foot in a department store again," said Leslie Slateman, who had just finished trying on a dozen pairs of jeans before finding the store to find a white shirt and there are a zillion different departments that might have white shirts. By the There is someone who wants each time you get to all of them you fitten, or they wouldn't be there. Now I stick to small stores with no escalators.

Tell them to bring back primary colors for clothes," said Linda Bur-nett, a travel agent in Washington. "Nowadays the blouse isn't pink, it's dusty rose. The suit isn't gray, it's battleship gray. It's impossible to buy anything that matches anything else."

More and more consumers seem

to be simply deciding not to decide.

Of the more than two million telephone customers in New York said. "Deciding has become the state who were asked to choose evening's entertainment."

the highest in its 49-year history. "We have aisles of shampoo, sity Medical Center. The black among two dozen tong distance."
There are more products than ever shelves of granola bars, 23 varieties video-cassette recorder versus the companies, 67.5 percent have left it before in virtually every category of Nine Lives cat food — and the silver one. Will it make any differvariety of high-interest-bearing ac-counts are available and well-advertised, more than \$250 billion remains in statement savings accounts earning 5.5 percent interest, said Stephen Brobeck of the Consumer Federation of America.

TUTUR!

But choices are not likely to go away. On a recent evening, Maran Opaline roamed the assles at Tower Video with two friends, trying to choose a tape to go with their Chinese food. They rejected some movies because they had seen them, others because they did not know what they were about. Some were too heavy to suit their mood, others too light. Some were too long to sit through, others too short to fill an evening. After nearly half an hour of considering tapes, someone suggested that they close their eyes and choose, rather than miss

# **Haunting Reverberations** In Roeg's 'Insignificance'

By Sheila Benson

Los Angeles Times Service
TOS ANGELES — "Insignifi-Leance," an intelligent, satiric comedy, brings together four 1950s icons on a sweltering Manhattan night, with haunting reverbeistions. Though never named, the white-blonds movie star (Theresa Russell) filming on a creek acceptance. Russell) filming on a street grating, ber skirts blowing up around her ears, is the personification of Mari-

**MOVIE MARQUEE** husband (Gary Busey) is a legend-ary ballplayer suspiciously like Joe DiMaggio; the bareloot Princeton scientist (Michael Emil) is Albert Einstein and the sweaty senator (Tony Curtis) threatening him with subpoena is Joseph McCarthy.

The director, Nicolas Rocg, has taken Terry Johnson's adaptation of his irreverently inventive play, set in 1954, and given it additional layers; flashes of memory and aw-ful prescience. The result is absorbing, peculiar, richly comic and odd-

The actress and the scientist are at crisis points, he with the implica-tions of his work, she with the erosion of her second marriage and her life as a commodity. On a whim, she turns up at the scientist's door to prove that she understands the theory of relativity. (The notion is not that surreal; Einstein and Mon-roe once met, and were reportedly charmed by each other.) After a dazzling demonstration, as grounded in fact as it is long on ingenuity, she demands that he reply in kind: Now you have to show me your

In bursts the DiMaggio character. The film's most tender moments come from this hulking, noisy athlete; his loving, frustrated understanding of the impasse he and his wife have reached and his shrewd analysis of her needs, to children (Jason Lively and Dana have "a thousand people touching Hill) and the Griswalds' philistinher all the time and . . to be alone all the time also." ism, which knows no bounds.

As the impotent, vengeful senator, unfortunately the least well drawn of the characters, Tony Curtis has the same sneering energy he had in "Sweet Smell of Success";

no higher praise exists. Michael Emil resists playing Einstein as a cumning guru, instead portraying

Janet Maslin of The New York Times on "Real Genius": The story is set at a college with a

highly advanced science program, which, unknown to the whiz kids, is being used to develop advanced weapons for the military. It centers on a boy wonder (Val Kilmer) with a tirelessly facetious sense of hnmor and a 15-year-old newcomer (Gabe Jarret) who has yet to get the hang of college life. Martha Coo-lidge, who also directed "Valley Girl," gives the dormitory scenes something of a high-tech "Animal House" flavor. Kilmer appears to be capable of being much funnier than his dialogue here. (The film has him make a lot of unfunny phalific jokes, which seem particu-larly strange coming from a female director.) Jarret is charmingly nat-

mal as the shy 15-year-old who's smarter than any of his classmates. William Atherton is good as the teacher overseeing the program and trying to stay calm in the face of Kilmer's incessant clowning.

Maslin on "National Lampoon's European Vacation": This sequel to "National Lampoon's Vacation" is not as funny

but has a jokey, loose-jointed com-ic style. The gags tend to be broad, and the director, Amy Heckerling, has a way of repeating them. Clark Griswald (Chevy Chase) has to hit three Englishmen in a row to estab-lish that he's a bad driver. The film derives its jokes from the stressory. derives its jokes from the stereotypical foreigners the family encounters, the restlessness of the teen-age

Masiin on "Animais Are Beautiful People": Jamie Uys has accompanied a

series of cute voice-over observations about desert creatures with footage sufficiently fascinating to dispense with any sense of silliness. Uys, the South African director of "The Gods Must Be Crazy," made this documentary several years earlier and gives it a naïve charm very like that of his big hit. The film includes a few embarrassing scenes in which tribesmen, seen in their native habitat, are described in much the same terms Uys uses for

# FUTURES AND OPTIONS

# The Gold-Market Bears **Come Out of Hibernation**

By H.J. MAIDENBERG

EW YORK — After meandering aimlessly for months, the gold futures market suddenly awoke with a start last Friday, causing the once sommolent bears to had sold short. As prices rose, brokers reported a flurry of fresh burning by bullish investors New York Times Service

When the final bell sounded on New York's Commodity Exchange, the world's biggest precious-metals futures market, the August contract was up \$6.50 on the day and \$6.80 for the week. "All week long our Geneva and London offices were telling us that European bullion dealers were waiting for an opportunity to but "Martin A Appetrone"

buy," Martin A. Armstrong, president of Princeton Economic Consultants of Princeton, New Jersey, said. "They apparently found it Friday afternoon, when many Comex traders had left for the week-

If prices retreat, technical indicators point to a testing of last February's low. The fundamental reason

that European bullion dealers were waiting to buy, Mr. Armstrong said, was that gold prices had hit a record low the previous Friday, Aug. 2. "Gold is traded in dollars," he noted, "and to get the dollars required fewer pounds, yen, marks and Swiss francs on Aug. 3."

Rased on the closing spot New York gold price of \$321 on Aug.

Based on the closing spot New York gold price of \$321 on Aug.

2, when many of the European buy orders were placed, it took £226 to buy an ounce of bullion. At the close of trading Friday after the rush of orders, it took £240.5 pounds, Mr. Armstrong said. Similarly, an ounce of gold for a Japanese investor went to 77,991 yen from 76,234; for West Germans, to 916.5 Deutsche

marks from 907, and for a Swiss, to 755 francs from 738.5.

"In fact, as denominated in European and Japanese currencies on Aug. 2, the price of gold was the same as that on last Feb. 22, when bullion but a low of \$291 an ounce," said Mr. Armstrong, whose firm acts as a market and economic consultant to many international companies.

S for the gold market's technical structure, he said the charts indicated continued strength this week. On Aug. 2, the charts indicated an upward resistance level, based on the spot price, of \$329.30, he said. "If that level is breached," Mr. Armstrong continued, "then the next upward resistance point will be in the \$342-\$352 area."

But if gold prices retreat this week, Mr. Armstrong's technical indicators point to another testing of last February's low of \$291 an ounce. Basically, these resistance levels are charted by drawing lines touching the recent daily low and high prices, he said.

Meanwhile, Bette Raptopoulos, a metals-market analyst at Prudential-Bache Securities Inc., agreed that, aside from local traders covering their short positions, most of the gold buying last Friday came from abroad.

"But the shorts had reason to be surprised," she said Friday, "because, for one, the market on the Comex had been dead, despite the deteriorating South African situation and the weakening domestic economy that Kaufman warned the market about Heavy Kaufman, chief economist at Salomon Brothers Inc.,

said Friday that the Federal Reserve Board was unlikely to tighten credit in the face of a softening economy. If so, domestic interest rates could decline further, thus making dollar investments less attractive.

"Gold needs a weak dollar and low interest rates to make paper investments less competitive," Mrs. Raptopoulos said; "because after all, gold is a form of currency, and nondollar currencies tend to rise when the dollar weakens."

iai conflict and mine labo disputes in South Africa, are still being ignored by the gold market. South Africa, the biggest supplier of newly mined gold, (Continued on Page 11, Col. 1)

# Wholesale **Prices Up** In U.S.

July Rise Led By Food Costs

The Associated Press

WASHINGTON - Wholesale prices in the United States, led by a sharp increase in food costs, rose 0.3 percent in July, the Labor De-

partment reported Monday. The gain in the Producer Price Index followed a revised 0.2 per-cent decline in June. For the first seven months of the year, wholesale prices have risen at an annual rate of 1.4 percent, Wholesale prices for the past 12 months have risen just

Few analysts see any reason to fear the the good performance will change in coming months, al-though some warn that inflation will pick up next year as the impact

of a declining dollar is felt.
"We should have a better performance on inflation than we did last year and one in line with the super performances of the early 1960s," said Allen Sinai, chief economis for Shearson Lehman Brothers.

"The economy remains slack, oil and energy prices are dropping and commodity prices continue to benefit from earlier increases in the

Food costs, which had been declining through the first half, jumped 1.3 percent last month, mainly because of higher prices for fresh vegetables and pork. Pork prices rose 6.9 percent. Fish

costs, less important to the overall index, were up 7.1 percent. But the biggest increase was a 22.2-percent increase in fresh vegetable prices.

Energy costs; along with food the other major component in the index, fell for the second consecutive month. Gasoline prices were off 1.4 percent; fuel-oil prices were down 5.4 percent; natural gas prices declined 0.7 percent.

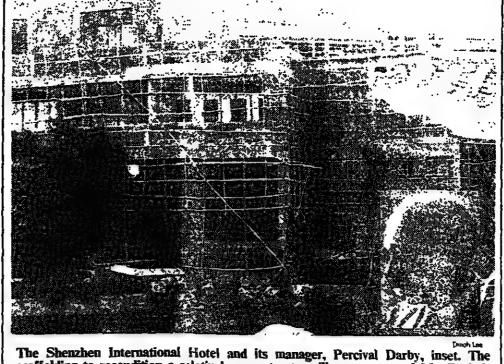

July was the first time that the government revised its survey techniques to end a reporting lag for refined petroleum products. The figures reflect price changes in July, just as for the other items in the index. The report was to have been released Friday, but officials postponed the amouncement.

The department blamed "processing errors" having to do with changes in the way the report is compiled, including the change in energy price calculations.

change at the wholesale level after two monthly increases of 0.4 percent. Light truck prices rose 0.6 percent after a 0.9 percent drop in

The initial June report had shown no change at the wholesale level and followed four months of gradual increases. The July spurt was the largest since a revised 0.4 percent rise in April, which had originally been reported as a 0.3-

percent increase. "At some point, the declining dollar is going to exert upward pressure on prices, but the dollar has not dropped far enough or been down long enough for that impact to show up yet," Mr. Sinai said. He predicted that wholesale prices for the whole year would rise by only I

scaffolding to recondition a relatively new structure illustrates one of Mr. Darby's problems: An indifference to maintenance before his arrival about two months ago.

# China Hotel Manager Tackles Reform Percival Darby Oversees 96 Rooms, 50,000 Shower Caps

By Dinah Lee mai Herald Tribun,

SHENZHEN, China - Heed the tale of Percival Darby -- not the hero of some Victorian romantic novel, but general manager of the Shenzhen International Hotel, a joint venture between a Hong Kong businessman and the Forestry Ministry of Shenzhen.

Shenzhen is one of 14 coastal cities, and Hainan island, that are designated as Special Economic Zones. But the focus of the zone program has been put recently on Guangzhou, Shanghai. Tianjin and

Together with Xiamen, Shantou and Zhuhai, Shenzhen is one of the four original special zones announced under the reforms of Deng Xiaoping, the Chinese leader, in 1979, Shenzhen, Shantou and Zhuhai are in China's southernmost province of Guangdong, with Shenzhen at the busiest border crossing between Hong Kong and China.

Mr. Darby is only one of hundreds of foreigners now living in southern China, managing joint ventures in hotels, telecommunications and offshore oil, Since Mr. Deng established the first four Special Economic Zones as laboratories for economic reform. Shenzhen has mushroomed from a sleepy border town of 30,000 farmers to a sprawling boomtown of more than 300,000, utilizing the equivalent of \$700 million in foreign investment.

The speed with which Shenzhen has grown has led to acute problems in the system - clogged roads, electricity brown-outs and inadequate tele-

phone-line capacity. The influence of Hong Kong television, radio and visitors has brought Shenzhen closer to the British colony in many ways than to the nearest mainland city, Guangzhou. Black-market activities are rife, and despite the efforts of the government, the currency used everywhere in Shenzhen is not the currency of China, nor the Foreign Exchange Certificates for use by foreigners, but the

Hong Kong dollar.

Many of Mr. Darby's challenges are like those facing all foreign managers of new joint ventures in China. On arrival, he immediately introduced an incentive system of points linked to wage bonuses intended to wean his local Chinese staff away from their complacent attitudes. Included in this was an 'employee of the month" award. "At first, the system seemed fine until I was

walking through the coffee shop and one of the waitresses told me she would be winning the 'employee of the month' award for August. 'But this is only July,' I said, 'August hasn't even started. 'That doesn't matter,' she said, 'The supervisor promised I would win it." The frustrated Mr. Darby has since kept up

# Japan Ship Line Reported to Be Close to Collapse

TOKYO - Toshio Komoto, a member of the Japanese cabinet. offered to resign Monday because Steamship Co., which he founded,

an aide said. Meanwhile, Kyodo News Agency and Jiji Press quoted "reliable sources" as saying that Sanko, one of the world's largest operators of oil tankers, planned to file Tuesday for court protection from its creditors under the Corporate Rehabilitation Law.

A company spokesman denied the reports, saying that Sanko had no plans at present to file for court protection,

If the company did seek protec-tion, it would mark Japan's largestever corporate failure.

Sanko, Japan's largest shipping concern, owns 27 ships, totaling 2.63 million deadweight tons, in-cluding 12 oil tankers at 1.11 mil-

It also charters 217 ships amounting to 18.02 million deadweight tons, including 77 tankers at 11 million tons, a Sanko spokes-

man said. The aide to Mr. Komoto, quoted by The Associated Press, said the minister met Monday with Prime Minister Yasuhiro Nakasone. The aide, who asked not to be named, said Mr. Nakasone tried to persuade him to remain in his post, but finally agreed "to keep the letter of

resignation for the time being." Mr. Komoto, former directorgeneral of the Economic Planning Agency, is now state minister for external economic affairs.

The minister, 74, who founded the company in 1937, was Sanko's president until 1974 but has not been directly involved in its management in recent years. He is the largest individual shareholder.

On the Tokyo stock exchange, trading in Sanko shares was suspended Monday for the second time since news of the company's financial trouble broke late last week. Sanko shares, which closed the morning unquoted with sell offers at 27 yen, were down from 72 yen last Wednesday.

Trading was also suspended

the company's three main creditor banks, Daiwa Bank Ltd., Long-Term Credit Bank of Japan Ltd. of financial troubles at Sanko and Tokai Bank Ltd\_ were refusing to extend large new loans to the

company.

The reports were denied by the company, and Daiwa said the three banks were only in the process of reviewing financial help to the

On Friday, however, Daing said was reluctant to continue leading to the company, a bank official

In April 1984, Sanko announced a three-year plan to reduce losses. Its current outstanding debt is estimated by banking sources at 400 billion yen (\$1.68 billion).

The parent company's net loss for the year ended March 31 rose to 68.35 billion yen from 55.08 billion a year earlier, as 1984-85 sales rose to 267.96 billion from 246.26 bil-

■ Increasing Competition Earlier, Susan Chira of The New

York Times reported from Tokyo: Sanko's troubles come at a time of worldwide recession in the shipping industry. Japanese companies. still the leaders in the field, have been particularly hurt by the general decline in the crude-oil tanker business worldwide.

They are also facing increasing competition from South Korean bipbuilders.

The Japanese government has been studying ways to help Sanko. The company has not yet received any direct government aid. but the Ministry of Transport has been considering ways to scrap surplus tankers. However, the ministry has reportedly decided against using government money to buy the excess lankers.

That decision, coupled with dissatisfaction about the progress of Sanko's own restructuring, appears to have prompted the three banks to reconsider loans to Sanko.

Sanko is not alone in suffering financial problems. In the last fixcal year only two of the six major shipping lines paid dividends and only three made profits.

### Producer Prices Rise in Britain

LONDON - Producer

prices in Britain rose 0.3 percent in July while manufacturers' costs dropped 2 percent, the Trade and Industry Department said Monday.

In June, producer prices rose 0.1 percent and manufacturers' costs dropped 1.5 percent, according to revised figures. Manufacturers' costs showed no change in the 12 months ended in July, after having risen 1.7 percent over the year to June.

The Trade and Industry department also released provisional figures showing that re-tail sales rose 0.1 percent in July to a record 116.1 in seasonallyadjusted figures, after a 1.2-percent increase in June.

# Market Lower in Light Trading

NEW YORK — The New York Stock Exchange was lower late Monday in light trading. The Dow Jones industrial average was down 1.46 to 1,319.33 shortly before 3 P.M. Five-hour volume on the NYSE amounted to about 59.2 million shares, compared with 70 million in the same period Friday.

Prices were lower in light trading of American Stock Exchange issues.

Although prices in tables on these pages are from the 4 P.M. close in New York, for time reasons, this article is based on the market at 3 P.M.

Analysts said the market weakened as investors adjusted to the view that the economy will not grow as much in the second half of the year

as many had hoped.

The outlook for corporate profits has become bleaker, said Monte Gordon of Dreyfus Corp. Enormous competitive pressures created by foreign imports mean domestic companies cannot raise prices to increase their profits, he said. Mr. Gordon said the economy will remain sluggish during the third quarter and will not make significant improvements during the

# ASEA Profit Rose 4.7% in First Half

By Juris Kaza International Herald Tribune

STOCKHOLM — ASEA AB, the Swedish electrical and heavy industrial group, reported Monday that its pretax earnings rose 4.7 percent in the first half of 1985, to 1.11 billion kronor (\$132 million), from 1.06 billion kronor in the first half of 1984.

Sales totaled 17.18 billion kronor, up 9.5 percent from 15.69 bil-tion kronor in the first half of 1984 ASEA said in an interim report

Rieberthe union's chief negotiator, Vice President and the union's chief harman and the union saying the car maker's return to profitability means employees deserve parity in pay and the union's chief negotiator. When the union saying the car maker's return to profitability means employees deserve parity in pay and the union's chief negotiator, vice President and the union's chief harman and the u to seek gas elsewhere at greater

The opening ceremony with the UAW president, Owen F. Bieber, and ton Natural Gas Corp. in May for the union's chief negotiator, Vice President Marc Stepp, and the company's chief bargainer, Vice President Thomas W. Miner, signaled the start paid about \$2.5 billion for American Natural Resources Inc. in Face-to-face bargaining among the main negotiators was not expected to begin until the month before the contract expires Oct. 15.

The company posted a record 1984 profit of \$2.4 billion, although its March, Tenneco Inc, bought some pipeline properties last month from Goodyear Tire & Rubber Co. for \$500 million. showing this year has not been as strong because of taxes.

The typical Chrysler assembler earns \$12.79 per hour, 39 cents less

United's earnings have dropped than the \$13.18 per hour earned for the same work at General Motors sharply in the last three years, and its revenues have declined for two consecutive years. In 1984, the company earned \$35.6 million on A pay increase set for Sept, 2 will bring typical Chrysler assembly workers to within 6 cents an hour of their GM and Ford counterparts. But revenues of about \$4 billion, Some analysts have expected the company's profits to improve this year, but they have said revenues would

Schering Reports Rise in Earnings In the First Half

BERLIN - Schering AG. the West German chemical group, said Monday that it had increased first-half earnings in its parent company and group from the period in 1984. It also predicted continued good re-sults in the second half.

Profit figures were not provided. Last year, Schering recorded a record 138 million DM in net profit, a 72-percent increase over 1983.

First-half group sales volume rose 12 percent, to 2.78 billion Deutsche marks (\$982 million), with all sectors recording growth. Volume in the parent company increased 11 percent, to 1.23 billion DM, Schering said in a letter to shareholders. Parent-company earnings were higher than a year earlier despite a considerable increase in research and development

spending, it said. The group recorded an overall rise in first-half earnings even though U.S. profits fell.

### Gulf, Petro-Canada Stall Pact Reuters

TORONTO - A transaction between Gulf Canada Ltd. and Petro-Canada, the government-owned oil company, has been delayed for technical reasons, but is not in jeopardy, analysts said Monday. The plan is said to involve the sale of some Guif Canada assets to Petro-Canada for up to 900 million dollars (\$661 million).

# cause of a slowdown in the world economy, earnings for all of 1985 would be "approximately un-Slow U.S. Growth Brought Slack Profits in Quarter

New York Times Service NEW YORK — Weak economic growth led to lackluster U.S. corpo-rate earnings in the second quarter, with the brish a test of the second quarter, with the brish a test of the second quarter, with the brish a test of the second quarter, with the brish at second quarter, which are second quarter and quarter are second quarter and quarter are second quarter. rate earnings in the second quarter, with the bright spots overwhelmed by depressed profits in a wide

range of industries.
The profits picture was disappointing, but not unexpected, given the slow economy in general in the first half of the year," said Robert A. Gough, an economist at Data Resources Inc.

The U.S. economy grew at only a l-percent annual rate in the first six months of 1985 and at a 1.7-percent rate in April through June.

The weak second-quarter results followed disappointing earnings in the first quarter. Many companies continue to suffer from a strong dollar and a flood of imports, economists said.

Total annualized, seasonally-adusted, after-tax profits were \$136.3 billion in the second quarter, down 0.5 percent from the first-quarter total of \$137 billion and down 9.3 percent from the \$150.2 billion recorded in the second quarter of 1984, according to Data Resources. U.S. corporate profits hit their

all-time high of \$150.6 billion in the first quarter of 1984.

By Richard W. Stevenson were automakers, computer companies, textile makers and chemiresults were mixed.

A compilation by The New York Chrysler's earnings comparisons Times of second-quarter earnings at 274 companies showed that earnings increased at 140 companies from the same period last year, decreased at 99 and were the same at five concerns; 30 companies

Most makers of computers and other office equipment had a diffi-cult quarter as they suffered from weak demand and transition to new product lines. Net income at International Business Machines Corp. dropped 13 percent from the period last year. Wang Laboratories had a \$109 million loss, and Apple Computer, which went through management shakeup that resulted in the co-lounder and chairman, Steven P. Jobs, losing his day-to-day responsibilities, posted

Weak demand from industrial customers hurt chemical makers. American Cyanamid Co.'s profits

### Adviser to the exchange proposals: Credit Suisse First Boston Limited

To tender a Note for exchange, you should obtain from any of the addresses listed below a Form of Acceptance and Voting Instruction (and Circular) and complete and return the Form by not later than 11.30 a.m. (London time) on 2nd September, 1985. A holder of Notes in Cedel or Euro-clear should, to tender a Note for exchange, obtain the Form (and Circular) from the operator of such system and complete and return the Form to such operator by not later than 10.00 a.m. (Brussels time) on 30th August, 1985.

TRADING Arrangements have been made for the continued trading of the Notes through Cedel and Euro-clear pending the outcome of the exchange proposals as follows:

(a) Cedel and Euro-clear have opened separate clearing accounts, respectively numbered 273520 and 13568 (the "Assented Accounts"). Upon receipt of a duly completed Form of Acceptance and Voting Instruction in respect of Notes tendered for exchange, Cedel or Euro-clear, as the case may be, will transfer such Notes (the "Assented Notes") to their respective Assented Account. If the extraordinary resolution of Noteholders is passed, all Notes will thereupon

(b) Trading may take place in both the Notes and the Assented Notes but not between the Notes and the Assented Notes. Until 7th November, 1985 or the exchange proposals lapse, Assented Notes may not be traded for settlement (i) outside the relevant Cedel or Euro-clear Assented Account; (ii) after 7th November, 1985; or (iii) for 48 hours prior to the time of the Meeting (or any adjournment thereof). (c) If the exchange proposals become effective, the Assented Notes will be credited on 7th November, 1985 to the new Primary Capital Notes clearing

(d) If the exchange proposals lapse, the Assented Notes will be transferred back to their original clearing accounts.

Similar arrangements have been made for the continued trading of Notes in respect of which Cedel or Euro-clear may receive instructions merely to vote on the extraordinary resolution as referred to in the Circular.

### **Notice of Meeting**

Notice is thereby given that a Meeting of the holders (the "Noticholders") of the U.S.\$300,000,000 Junior Gumanised Undesed Floating Rate Notes (the "Notes") of Standard Chartered Finance BV ("Finance") which are constituted by a

Chapter 11 Case No. 8485377G

NOTICE OF ORDER FIXING DEADLINE FOR FILING PROOFS OF CLAIM (Bankruptcy Rules 3003 (c) (3) and 2002 (a) (8) )

TO: CREDITORS, EQUITY SECURITY HOLDERS, PARTIES WHO HAVE REQUESTED SPECIAL NOTICE, AND OTHER PARTIES IN INTEREST:

PLEASE TAKE NOTICE that the Bankruptcy Court has entered its Order fixing October 12, 1985, at 4:30 p.m., as the last date for the filing of proofs of claim in the above-captioned chapter II cases. Reference is made to

BARKURICY NUE 3003.

ANY CLAIMS FILED AFTER OCTOBER 12, 1985, SHALL BE DISALLOWED. ANY ENTITY THAT IS

REQUIRED TO FILE A PROOF OF CLAIM AND THAT FAILS TO DO SO BY OCTOBER 12, 1985, SHALL

NOT BE TREATED AS A CREDITOR FOR PURPOSES OF VOTING OR DISTRIBUTION, AND ANY

CLAIM OF SUCH ENTITY SHALL BE FOREVER BARRED: provided, however, that a proof of claim for any
claim against any of the Debtors arising out of the rejection by any of the Debtors in Possession of an executory
contract or unexpired lease, or the recovery by any of the Debtors in Possession of a voidable transfer, as described in
Bankruptcy Code § 502 (g) and 502 (h), must be filed on or before the later of October 12, 1985 and 30 days after the entry of an order authorizing the rejection of the executory contract or unexpired lease, or 30 days after the entry of an

order or judgment avoiding the transfer, respectively.

This claim filing requirement applies to all prepetition claims, except that THE FOLLOWING TYPES OF CLAIMS AND INTERESTS HAVE BEEN EXEMPTED FROM THE BAR DATE REQUIREMENTS AND HOLDERS THEREOF NEED NOT FILE PROOFS OF CLAIM OR INTEREST:

(a) claims for principal and interest due under the term of any publicly traded debt securities of any of the Debtors, including the 9' i Convertible Subordinated Debentures due 2001 issued by Storage Technology Corporation, the 1196' Notes due 1993 issued by Storage Technology Corporation, the 1196' Notes due 1993 issued by Storage Technology Corporation, the 1196' issued by Debentures due 1993 issued by Storage Technology Corporation, the 1196' issued by Debentures due 1993 issued by Storage Technology Subordinated Debentures due 1998 issued by Documation Incorporated, and the 12% Subordinated Debentures due 1999 jabued by Documation Incorporated;

(b) interests asserted by holders or owners of the common stock of Storage Technology Corporation based on holding or owning such stock;

claims and interests which are listed but not listed as disputed, contingent or unliquidated in the schedules of liabilities heretofore filed with the Court by the Debtors:

(d) claims by present or former employees of any of the Debtors for prepetition wages, salaries, or expenses that have been authorized for payment pursuant to this Court's orders; and (c) claims of the Debtors against any other Debtor of any of its affiliates.

If a holder of any equity security or any debt security asserts any claim against any of the respective Debtors, other than the claim or interest evidenced by the debt security or the share certificate, such holder must file a proof of claim by October 12, 1985. Thus, any claim for rescission of the purchase or sale of a security or for alleged damages arising from the purchase or sale of a security and any claim against the Debtors arising in connection with limited partnership interests in Storage Technology Partners or Storage Technology Partners II must be filed. Persons asserting such claims should not rely upon a class representative, if any, to file a proof of claim on their behalf. Each person resentative purchase or sale of share against any of the debtors.

asserting such claims against any of the debtors should file an individual proof of claim. To be deemed properly filed, a proof of claim must be filed with the Clerk of the United States Bankruptcy Court, 1845 Sherman Street, Columbine Building, Fourth Floor, Denver, Colorado 80203-1190. Claims are not deemed filed until actually received by the Clerk, CLAIMANTS WHO HAVE ALREADY FILED THEIR PROOFS OF CLAIM SHOULD NOT FILE A DUPLICATE CLAIM.

ANY CLAIM NOT PROPERLY FILED WITH THE CLERK WITHIN THE TIME SET FORTH ABOVE WILL BE FOREYER BARRED FROM SHARING IN THE ESTATES OR BEING TREATED AS A CLAIM FOR PRINCIPLE OF MOTOR OF DISTRIBUTION.

FOR PURPOSES OF VOTING OR DISTRIBUTION.

A full copy of the Court's Order may be inspected at the Office of the Clerk at the address listed bereinabove.

In London, the pound was up sharply against the dollar. It closed at \$1.3770, and, a stabilization.

Traders in Zurich said there was 3.182. Against the mark, it moves a belief that U.S. rates were about up throughout the day, following to come down again, but in Longian. trader said, " after Friday night's don, where the market was quiet, selling in New York pushed it down, the dollar "found some support around the lower levels." in Frankfurt, the dollar was fixed at 2.7984 Deutsche marks, down from 2.8313 on Friday. In Zorich, it was valued at 2,3063 Swiss francs, down from 2.3480,

francs, from 8,660

THE EUROMARKETS

LONDON - The Eurobond

market was dominated Monday by a flood of new yen/dollar dual-

currency issues. The issues totaled

nearly 100 billion yen by the close

of secondary-market trading, deal-

Dealers were bemused by the

rush of new issues. Many assumed

that the new paper would remain in

the hands of managers for some

time. The issues are believed to be

aimed largely at Japanese inves-

tors, who cannot buy the bonds

until six months after their launch.

Syndicate managers said that

they believed that the dual-curren-

cy bonds could attract strong Japa-

nese investor demand, noting that

all of Friday's issues pay 8 percent

a year over 10 years, nearly 2 points

above Japanese government bond

floating-rate dollars.

They added that they believed

Some said that Japanese compa-

Farlier, in Tokyo, the dollar ended to push the dollar through 2.78 the day at 237.75 yen, compared Marks," one said. with 238.55 on Friday.

There was some uncertainty as to the causes of the broad decline early in the day and the subsequent

traders said they were awaiting U.S. retail sales figures, to be released Tuesday, and industrial production, due Thursday.

Both sets of figures are expected said. to show continued sluggish eco-nomic growth in the United States. "Sterling has moved higher on the day and people are saying that's Swiss francs, down from 2.3480, But traders voiced uncertaintly enough," a U.S. trader said. He and in Paris it slid to 8.565 French about the response to the figures. added that a British bank base rate "We do not expect there to be cut was believed to be some way In Milan the dollar was fixed at much reaction and people are not off.

1,879.00 lire, down from 1,895.40. sure the numbers will be sufficient

Among other currencies, the pound gained against major currencies, rising to 3.8765 DM in London from Friday's 3.8425, and

But some traders said the pound's strength was limited. "It has traded higher but hasn't managed to consolidate higher," one

# France Will **Boost Growth**

PARIS - France's economy will grow more rapidly next year but not rapidly enough to prevent an increase in unemployment, the Paris-based Organization for Economic Cooperation and Development

said Monday. The gross domestic product, which measures the output of goods and services excluding income from operations abroad, will grow by 1.9 percent next year in eal terms, after a rise of 1.1 percent this year, the OECD said in its

annual report on France. But it also predicted that unem-ployment would climb to an average of 11 percent of the work force. or more than 2.5 million people, from 10.5 percent this year.

It had praise for an economic austerity program adopted in March 1983, but it also said the government continued to control namy key sectors of the economy. These controls, it said, should be relaxed further.

The existence of an extremely complex body of legislation undoubtedly constitutes a major psychological constraint and may discourage some employers from taking on labor," it said. The organization, which groups

24 industrialized countries, said the program had reduced economic imbalances, but that recovery is only partial and there should be no

The OECD applauded policymakers for curbing inflation, nar-rowing external deficits and increasing corporate profits. But it also said that the austerity program had contributed to stagnating domestic demand and slow growth.

However, it said, growth in do-mestic demand would accelerate to 1.6 percent next year from 0.6 percent this year.

The report also said that inflation would decline to an annual average of less than 5 percent next vear. For this year, inflation is expected to exceed 5.5 percent.

France would have a \$3.2-billion trade deficit this year, down from last year's \$3.8-billion deficit. (Reuters, AP)

# OECD Says China Hotel Manager Fights Apathy

(Continued from Page 9)

round-the-clock daily inspections, holding supervisors responsible for the work of staff in their department. He quickly saw that few had any understanding of how a modern hotel was maintained, and he wrote a 26-page checklist outlining the basic duties of each depart-

"Four people resigned on the sput," he recalled.

Training was not Mr. Darby's only problem. Although the building is graced with well-designed gardens and a fishpond near the entrance. Mr. Darby discovered on his arrival that both were in a surprisingly dilapidated state, considering that they had been built only wo years earlier.

But so enthusiastic are Shenzhen officials, businessmen and even many foreigners working there that recent signs of hesitation in Beijing over Shenzhen's development only spurred greater local loyalty to the liberal experiment that Shenzhen represents.

On July 26, in a feisty response to statements from Mr. Deng that Shenzhen's success was still unproven, the Communist Party secretary general of Shenzhen, Zou Erkang, gave an outspoken interview to a leftist daily newspaper in Hong Kong, Da Kung Bao, Mr. Zou defended the rapid construc-tion of high-rise buildings in Shenzhen as necessary to attract foreign

investment. "If Shenzhen were a place — like five years ago - where one has to sit on the back of a bicycle to hold trade talks, who would do business

with us?" he said. Mr. Zou also denied that Shenzhen depended on "blood transfusions" of state funds for its growth. He said that in only a few years it attracted the equivalent of \$2.6 biltion in overseas investment, of which \$700 million was already in

Mr. Darov counts himself as one of the willing, if exasperated, pio-

"Oh, I really feel for that guy," commented a colleague, Joachim Burger, who runs the China Hotel in nearby Guangzhou. "But at least The OECD also predicted that he's kept his sense of humor."

After years of managing hotels in Florida and two years of teaching Januaican-born Mr. Darby has only

months. His task is to knock into when we already had 20,000 spare shape a hotel that has for the past ones in stock. You know, I look out two years been loosely managed in the window in the morning half absentia from Hong Kong by its expecting to see the population of foreign joint-venture partner. Shenzhen wearing Shenzhen Inter-Francis Cheung, the owner of the national Hotel shower caps on their Celine chain of boutiques in Hong heads."

Although Mr. Darby sometimes describes his hotel as "the Fawlty Mr. Darby fired a number of his Towers" after the British television series about a small chaotic English seaside hotel, he is nevertheless determined to bring order to his new

"I found two women cutting the grass with little barber's scissors." he recalled. "I tried to get a lawnmower, only to be told that there aren't any lawnmowers in Shenz-hen. I still find it hard to believe that our joint venture partners at the Forestry Ministry don't have a single lawnmower. I'm guess I'm going to have to go to Hong Kong

and buy one myself."

Recently he looked down from the window of his office on the second floor to see members of his staff piliering the decorative goldfish from the pond for supper. Meanwhile, he personally went

out and bought rat-traps and set them out around the hotel building. Then he set out poison for the cats, which were so fat from breaking into the flimsy hotel garbage bags that they ignored the rats. "The first morning I got up at 6

A.M. to see how many rats I'd got, but the local people had already stolen the traps," he said.

Purchasing supplies is a common problem for all foreign hotels in China, and Mr. Darby has suggested to fellow hoteliers in the region that they combine forces against the headaches of Chinese customs regulations, black-marketeering, irregular deliveries and short sup-plies. In the meantime, he has had to straighten out a few internal mysteries at his own hotel.

'I found out that the individual refrigerators in the guest rooms had been hooked up and running for two years, but nobody had bothered to put anything inside them," he said. "I immediately ordered whatever I could - peanuts, beer, tonic water, and so forth.

Then I found out that the hotel had ordered 2,000 new blankets. But we already have enough blanat the Hong Kong Polytechnic, the kets, and anyway, we only have 96 rooms. Then I discovered that we

been in his new job about two had on order 30,000 shower caps,

Not surprisingly, in his first few weeks on the job, the determined staff, and gradually is building his own handpicked team.

"One of the biggest problems with the local staff is getting them to understand that the customer is always right," Mr. Darby said. Communication can be difficult. since few of the staff speak English and Mr. Darby has not had time yet to study Mandarin.

At the moment he has one Hong Kong recruit for every three locals in a staff of more than 300. His wife, Norma, holds English classes geared to staff duties according to a schedule the couple worked out together, "so that as few as possible have to attend at the end of long

working day."
Some of the classes for the Chinese restaurant staff have to go from 10:30 P.M. until 11:45, she explained. Most of the employees are tired, and she has a lot of trouble keeping them awake.

"So, I've set a lot of the most important words to music," she explained, "and when they start to nod off, we sing them — numbers, alphabets, verbs — especially verbs, which Chinese don't like to

> Part of Mr. Darby's concern is to get his operation running smoothly before the onslaught of a threatened hotel glut in Shenzhen. Foreign investment of more than \$700 million has already put a strain on comfortable accommodations for resident businessmen. Border crossings have now reached 40,000 a day. He says he has heard of

proposals for another 20 hotels to be built in Shenzhen soon. Mr. Darby's friendly competition at the moment consists mainly of the East Lake Hotel, another joint venture between Hong Kong and Chinese interests, which is not so centrally located but offers tennis courts and a swimming pool. Recreational facilities are keenly valued by foreigners in mainland

posts, where leisure activities are nearly nonexistent. Mr. Darby is not entirely con- didn't deliver?"

ENGLAND, FIRST & LAST

By Anthony Bailey. 212 pages. \$15.95. Elizabeth Sifton Books/Viking, 40 West 23d Street, New York, N. Y. 10010. Reviewed by Jonathan Yardley

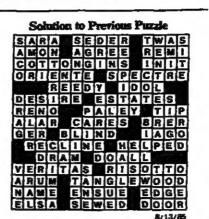

ANTHONY BAILEY'S second volume of memoirs opens in the late fall of 1944, as

he returns to England after spending four years in the United States. For his mother, who meets him in Scotland, the reunion is both joyful and startling: "The seven-year-old boy in gray shorts and blue gabardine raincoat to whom she had waved goodbye in September 1940 had become a youth of nearly 12, wearing long trousers and speaking in a broad American accent."

No one who read and admired this book's predecessor, "America, Lost & Found," will want to miss "England, First & Last," and perhaps it will also bring new readers to Bailey's wonderfully clear-eyed, affecting autobi-

ography.

Back in the reduced circumstances of wartime England, Bailey must cope with scarcity
and, even within his own family, "an intermittent feeling of strangeness, of being on one side of a transparent but definite screen, through which I looked at them and they looked at me. At school in Fareham, on England's southern coast, he is ribbed for a while as "Yank" and has to relearn another language and culture. His love for the United States and his American family is undiluted, but first and last he is an English boy; his readjustment is speedy,

sure, and happy. Soon he is busily about the normal business of boyhood: He makes friends, learns to sail and develops a lifetong devotion to boats, explores the seacons discovers girls and or he seacons. devotion to boats, explores the seaconst, and discovers girls and other terrors of adoles-

Ah yes: girls, "Presumably some fortunate youths grew up with an instinctive apprecia-tion of the fact that, in general, girls were as interested in boys as boys were in them. I did not." No one who was once a shy, unconsident boy will fail to wince in recognition at Bailey's funny, painful descriptions of hanging aroun for hours in hopes of a glimpse of a lovely thing, who does not acknowledge his existence, or of bicycling miles out of his way praying for a chance encounter with a girl whose beauty is impossibly radiant.

So Bailey immerses himself in school, both his studies and his extracurricular activities, He goes off to Churcher's, "a grammar school with a public school organization," and fits right in: "In school, as I later found in the army, to be 'keen' was the highest virtue, and for the moment I was keen to participate, keen to have a hand in the running of things that affected me, and keen not to be an ostadar." He is a considerable success, but like most of us looking back to adolescence he does so with discomfort:

At this point one trouble with thinking about those years is the difficulty of doing so about mose years is the districtly of doing so without an upsurge of distaste for the adolescent one was, which may color the process of recollection unfairly. That was me, and I couldn't help it. Pimply. Shy, yet full of self-aggrandizing ambition. Incoherent yet wasting desperately to be articulate. Interested it wasting one arts by to be articulate. Interested it wasting desperately to be articulate. Interested in war-ous arts yet saturated with arrogant prejudices and philistine feelings. With an embarrasted shiver that the passage of 34 years does not alleviate I see myself on stage in Mr. Kershaw's production of "The Merchant of Venace," on the verge of being flummoxed by absolute stage fright, and yet with the speeches of Auto-nio coming out of me as if from some sort of nio coming out of me as if from some sort of recalcitrant speaking machine. And it is hard not to appland Mr. Kershaw's britliam casting: I am as pompous and priggish as Antonio; Shakespeare makes him such a mealymouthed, self-regarding fellow."

That passage is characteristic of the book, and goes a long way toward explaining why Bailey is such an agreeable autobiographer.

A typical example of using the endgame to win is provided by the endgame to win is provided by the endgame. counter between Dennis Younglove of St. Louis and Maxim Dhugy, a Queens inter-national master, in the United States Junior Championship at the Manhattan Chess Club.

The attraction of the Rubinstein system against the English Opening, 3... P-Q4 and 5... N-BZ, is that it aggressively aims for a Maroczy bind of the type that Black achieves in this game after 12... P-K4. Because the Maroczy bind gives its possessor a superior structure in the center, it forces the opponent to take incisive tactical action to pry it loose. For this reason, Younglove should have played 9 B-Q2, planning after 9... O-O; 10 the ward on a half-open file. While Dlugy could not overwhelm this target by main strength, he kept it under lock and key with 26... R/3-K3 and began cramping the white position further with 29... P-N5! Soon, after 33... P-B5!, the white position was subjected to powerful pressure.

Dlugy's 35... P-B6! stalemated the white king knight and doomed the KP. Younglove, in a helptess position, kost the exchange with 36 R-N1, P-

frantic final round, which amount- vino got to within 12 feet of the ed to match play after it became hole. Price to within eight apparent that Nick Price (who had The drama grew when been within a stroke at one point).
Tom Watson and Fred Comples were not going to threaten the leadas part of a four-way tie for sixth, at 283; Price claimed fifth place at

There were a number of other closed with a 68 - but none that bole on," said Green.

For three holes starting with the seventh, Trevino and Green waged an old-fashioned shot-for-shot challenge. The huge galleries were thrilled by the exhibition of two fine golfers with unorthodox styles daring each other.

They were tied at six under for under and even briefly joined in the

Those three hit drives within six feet of one another in the fairway of the 405-yard par-4 seventh hole, which has a slight left dogleg. Green hit his approach first, his ball bouncing over the back of the green and into deep grass three feet beyond the putting surface. TreThe drama grew when Green,

using his choked-up grip on a sand wedge, cronched low and popped his ball onto the green; it trickled another 30 feet — and into the cup for a birdie. But Trevino and Price quickly sank their birdie putts.

Price reached the green of the 234-yard par-3 eighth hole with his tee shot, but Green went way right in trampled-down grass. Trevino hit a poor tee shot into a front bunker. Green hit first and chipped 18 feet past the cup. Trevino blasted to within four feet of the hole, putting pressure on Green. But Green sank his par-saver and Tre-vino made his up-and-down par; Price two-putted for par from 35

The best shots in the duel came at the ninth, a 438-yard par-4. Green and Trevino drove the fairway but Trevino was quite short. Price drove into the right rough.

Trevino's 200-yard approach stopped 15 inches from the cup. Green couldn't see the shot because the putting surface is not visible from the middle of the uphill fairway. But he heard the roar — and then hit a 180-yarder to within 18 inches of the cup. That drew an even loader roar from a crowd witmajor tournament this year. another 175 yards. His third shot

came right back and hit one nearly as close.

Both Green and Trevino sank their birdie putts (Price had a bo-gey 5) and made the turn tied for the lead at seven under. Trevino bogeyed from a bunker at No. 10, and Green was a shot in front with eight holes to go.

Green had lost his three-stroke lead over the first five holes, and fell to one back at the 543-yard par-5 fifth when Trevino recorded a superb eagle 3 as Green was taking a bogey 6. On the 11th, Green fell back into a tie for the lead when he bogeyed and Trevino three-putted for a par 5 — from 15 feet.
The defending titlist also three-

putted the 15th (from 12 feet); again Green had a stroke lead, but this time with only three holes to

"The turning point was the 11th

hole," Trevino said, "and the 15th was lights out." Trevino struggled to save par 4 at No. 16 when he drove the left rough, hit his second shot into deep rough short of the green but pitched to within four feet and sank

the putt. Green's par was routine. The par-5 17th gave Trevino more difficulty as he drove into the right rough and remained there afing the best stretch duel in a ter his second shot advanced him

"That's what it's all about," said was a flyer out of the grass; his ball Green. "Lee hit one stiff, and I rolled off the back of the green. From a downhill lie, Trevino pitched to within four feet of the pin, but his chances ended right there: He missed that short par putt and was two shots behind Green going to the difficult 491-yard par-4 finishing hole.

Both leaders remained highly critical of the Cherry Hills greens. Even after he chipped in from 35 feet on No. 7, Green stomped off and started talking to himself. He had hit a "perfect 8-iron" ap-proach, he said, and was still mad, "I was furious — I lost my compo-sure, but I couldn't believe what was happening. Because the greens were tricked up, I never knew what to expect. One green would be like a brick and the next one would be

ing back to the 1977 season and his U.S. Open victory. "I had won four tournaments the year before and had been among the leading money winners for three or four years, and it was more or less expected that I would win a major championship,

"This time, I came back after being down - I died a couple of years ago. It's nice being on top again and having friends stop me in

the locker room and say, 'Nice game, Hubert.' "(N)T, WP, LAT) Contenders in the main event: 1985 PGA champion Hubert Green, right, and Lee Trevino.

Those considerable antes by Except for a faceful of dust, Juan Samuel came up empty on this steal attempt Sunday Green and Trevino accounted for a against St. Louis, but the Cardinals had to face up to the Phillies' knocking them out of first.

# White Sox Reach Down, Pick Up a Victory

CHICAGO - The fourth-place Chicago White Sox, sitting eight games off the pace in the American League West, reached down to the minor leagues Sunday in an at-

tempt to move up in the standings.

Joel Davis and Joe De Sa, both called up Sunday from Chicago's Triple-A affiliate in Buffalo, New York, keyed Chicago's 4-1 triumph over the Milwaukee Brewers. Davis, 20, pitched a five-hitter

over seven innings and De Sa chipped in one of three White Sox

After losing five straight for Buffalo to drop to 2-5 with a 4.79

### BASEBALL ROUNDUP

earned-run average. Davis was a little awed at making his major-league debut Sunday. Being called was the last thing on my mind," he said. "I was on a plane about an hour after they told me, so it was pretty fast."

"It feels like a shock," said Da-"After the first batter [Paul Molitor, who struck out] I calmed

both benches. "He went after the hitters real good," said Coach Jim Leyland, serving as manager in place of Tony LaRussa, who was in the second day of a two-day suspension. After the second inning, Leyland said, "He got under control and kept his poise. It certainly was a great day for Joel Davis." "The kid has a hell of an arm,"

said George Bamberger, the Milwankee manager. "He was a young kid coming in and he threw strikes."

Davis survived a shaky second inning, which he started with his only two walks of the game, and went on to strike out six before turning the game over to Dan Spillner. "I wanted to take the pres-sure of finishing the game off him," Leyland said. "If we were to lose the game. Davis wasn't going to lose it." Bob James pitched the ninth for his 19th save of the year. A two-out single by Cecil Cooper and a double by Ben Oglivie, the 1,500th hit of his career, produced

the only one off Davis.

Greg Walker, the designated hitter, homered in the first inning to stake Davis to a 2-0. De Sa ho-mered in the second in his first atbat since being recalled to spell Walker at first base. Carlton Fisk became the seventh player in White season when he put a 1-0 pitch into the left-field upper deck in the fourth. Fisk is ued for the majorleague home run lead with Atlanta's Dale Murphy.

All three Chicago homers came off Ray Burris, who recorded his 1.000th career strikeout when he anned Ozzie Guillen in the fourth

Yankees 5, Red Sox 3: In Boston, Ron Guidry became the American League's first 15-game winner as New York completed a threegame sweep of the Red Sox and stretched their winning streak to six games. Guidry, who has won 13 of his last 14 decisions, allowed seven hits and three runs (two of them uncarned) in his 71/3 innings.

Blue Jays 5, Royals 3: In Kansas who had four hits on the day.

City, Missouri, Al Oliver and Indians 7, Tigers 2: Neal Heaton folitor, who struck out] I calmed City, Missouri, Al Oliver and own."

Rookie right-hander Joe for-5, including a three-run home Johnson went seven innings to gain run, to lead Baltimore's 14-hit at-his first major-league victory.

Dodgers 4, Reds 0: in Los Anselowed two hits over the final 41/2 les. Enos Cabell drove in two runs innings in relief of starter Dennis and scored another to support Jer-Martinez. The Orioles chased Mike ry Reuss's six-hitter. Reuss faced Mason and scored five times in the only 31 batters in registering his second with the help of a two-base third shutout of the season and error by Wayne Tolleson, the No. 37 lifetime.

# VANTAGE POINT/Thomas Bonk

# More Labor Pains: Hockey and Basketball and . . .

Los Angeles Times Service

LOS ANGELES — Baseball wasn't going so great a few days ago, and guess what? Things may get a lot worse for pro sports fans; this strike stiff could spread.

The stiff could spread.

negotiations may get sticky.

The National Football League Players Association invented the players' union strike in

1970 — a five-day walkout during training camp —and liked it so much they struck again in 1974 and 1982, but the football players have a union contract with the NFL until the 1987 season. The hockey players have been the first to rattle their sticks. Only minutes after the baseball strike was announced, the National Hockey League Players Association threatened to call its first strike unless major contract changes were

made by club owners. But wait. The NHLPA said it wouldn't strike until the 1986-87 season. Thoughtful of them to give so much notice.

And over what issues would the hockey players strike? Why, for true free agency and against compensation, of course, which seem to be what most sports strikes are about.

Alan Eagleson, head of the hockey players' union, said his clients also want a better pension plan. But the real problem is with the compensation categories in the current collective-bargaining agreement between the union and the NHL.

The union argues that compensation discourages teams from pursing free agents and thus keeps player salaries down. Under the rules, a team that loses a free agent to another team receives compensation according to the amount

of money for which the free agent signs. For instance, if a free agent signs with a new team for up to \$99,000, his old team gets a third-

The other professional leagues are already free agent who is signed to a contract of better bracing for some problems of their own when their union agreements expire.

player movement, Fleisher said. "A player

ployment with whomever he wishes."

The college draft is part of the Robertson Agreement, and the NBA is not really eager to get rid of it. "Obviously, we feel the draft is important," said Gary Bettman, general counsel

The NBA avoided a player strike three seasons ago, but that was when the league was on a lot shakier ground than it is now or promises to be in 1987. Carl Scheer, general manager of the Los Angeles Clippers, believes that a healthy league will raise the expectations of the union, perhaps to a level that could mean big labor. pains for the NBA.

"Before, when we averted a strike, it was for survival," said Scheer. "We're over our earlier" problems, but it's like anything else - when the league becomes more successful, the players want a bigger piece of the pie. I suspect that: would mean the players and the players' association would want to talk about some pretty;

large increases." At the moment, the most secure professional: league is the NFL, which hardly seems fair,since football got us into this strike mode in the first place. The NFL's labor contract with the players' union is the one that ended a 57-day strike that canceled 98 games in 1982.

The big issue then was the players' wanting a percentage of the gross revenue. They didn't get it, but they settled for something similar, which was the owners' guaranteeing to spend a per-

centage on player costs. Jim Miller, a member of the NFL Managegoing to happen. The Robertson Agreement, which is the league's collective bargaining agreement and basically affects free agency, will learned of last week's baseball strike, he wondered about its effect. "If this one lasts any time expire then, and so will the salary cap.

Larry Fleisher, general counsel for the NBA at all, it'll really harden the fans, I think," he

"We would act to eliminate all restraints" of about this strike a couple years down the road." The way things are going in the walkout should be like any other American seeking em- business, there may be many more strikes to think about.

# A Couch in Hampstead

By Michael Wise

LONDON — The world's most famous couch is in storage. awaiting completion of a museum at the spacious red-brick house in Hampstead where Sigmund Freud found refuge from the Nazis in the last year of his life.

Freud's library, his collection of antiquities, and the couch, draped with an Oriental carpet, upon which his patients summoned up their pasts, will be put in place after the Edwardian house has been fully restored, a project scheduled to be finished by the end of next month.

The museum will not open to the public until next May, but its site, where the founder of psychoanaly-sis moved from Vienna in 1938, where he died and where his daughter Anna lived until her death in 1982, is already an attraction, as is the flat at Berggasse 19 in Vienna, where Freud developed his theories of human behavior.

The Vienna flat became a museum after the end of World War II. Anna Freud, an important child psychiatrist, agreed to send a few of her father's possessions for display there, but most remained with her in the three-story house at 20 Maresfield Gardens, Hampstead.

As the renovation work nears completion, "No Trespassing" signs ward off the many zealous Freudians who may be tempted to go beyond the rose bush hedge at the front of the property.

"I could set up a booth out here for all the people who stop by," said the curator, David Newlands. As he spoke, a psychology student arrived to try for a look around. The situation was similar when Freud first came to London at the age of 82. "The reception in Vic-toria Station and then in the newspapers of these first two days was

most kind, indeed enthusiastic," he wrote. "We are buried in flowers." He was visited by eminent scientists, the Zionist leader Chaim Weizmann and the writers H.G. readily available for the first to scholars around the world.

Dali came to sketch his portrait. Dali came to sketch his portrait.

The museum also plans to buy
Freud had cancer and often had
new material providing insights
to put off guests. He spent many, into psychoanalysis. A museum days sitting quietly in the garden. In the just over 12 months before he died, though, he felt well enough

and work on another book, "The Outline of Psychoanalysis," which he never completed.

He did all this in a familiar setting. The Freuds were accompa-nied from Vienna by a housekeeper who took care to reassemble the extensive library and collection of Greek, Egyptian and primitive sculpture as they had been in the

Berggasse.
"When it's put back again," said Newlands, "it will feel very much the same." He will rely on pictures of the Bergeasse flat taken a few days before the Freuds abandoned it, and photographs made in Maresfield Gardens shortly after Anna Freud's death.

A slight difference is that the local borough council has said that the top story, with its white-painted dormer windows, must be let out as an apartment. The council has been worried that, since so many famous people lived in the area, Hampstead's housing could become "fos-silized" if many former residences

were turned entirely into museums.

The nearby house of the poet
John Keats is one. Prime Minister Herbert Asquith lived in Mares field Gardens, too, and the Fabian socialists Sidney and Beatrice Webb lived a short walk away.

The U. S.-based Freud Archives in charge of the bulk of Freud's papers deposited with the Library of Congress, is spending £800,000 (a little over \$1 million) on new insulation, modern lighting and security equipment at the Freud house

Newlands said the museum "is not going to be a secular temple. To some people, it will be. But I want it to be more than that." Lectures and changing exhibitions on the development of the psychoanalytic movement are planned, aimed at laymen and psychiatrists alike.

The books in the library are being microfilmed and experts are examining annotations Freud made in their margins. The films will make much of the material readily available for the first time

pamphlet cites Freud's sentiments on the subject: "A collection to which there are no new additions is

# Trend Time in the South: From 'Shine to Wine

By Dudley Clendinen
New York Times Service

CLAYTON, Georgia — As a chorus of katydids began to screnade the fall of night from the mountain laurel beyond the cabin porch. Tobe, a "white likker" man, held a glass of his host's homemade wild fox grape wine. All things considered, he said. "I'd rather have my old moon-

Behind the cabin, the mountain rose into the Chattahoochee National Forest. "Back in the 50s I'd have three or four stills going at the same time," Tobe said. He cooked his mash into the 1960s. and in hidden gullies near clear streams in the vastness of the streams in the vastness of the woods here, other men still do, selling shine by the gallon jug.

It remains a staple of these hills. But, as Tobe said: "Lot of

the people I used to sell to, they died, because they older than I was. You just can't make money at it." He rose, spat a stream of brown tobacco juice toward the darkening woods and poured himself some more wild fox.

In northern Georgia and across the South, the time, the tastes and the population have been changing. In red clay fields beside the woods and hills that once held stills, a new breed of farmer is planting vines. And from Florida to Virginia, from Mississippi to the Carolinas are wineries making

"I'm happy to report that most of these states, but not Louisiana, have blossomed with vineyards and wineries," Leon Adams, author of "Wines of America," said from his home in Sausalito, California "Georgia is a very good example."

The settings of these efforts range from modest to magnificent. Outside Clayton, Russell Dobbins, Tobe's host, grows bunch grapes in his garden and gathers wild fox grapes from the vines that flourish in the woods, making wine from them in the basement of the rambling cabin he built after retiring from Bethlehem Steel. He likes the wine bet-ter than the apple brandy the moonshiners used to offer him.

Just a bit southwest, near Clarkesville, Georgia, down Stonepile Road from the Stone-

tablished Stonepile Vineyards. Thirty acres (12 hectares) of trellised vidal, seyval blanc, cabernet franc and 23 other varieties of grapes roll in a leafy carpet toward the foothills of the Blue Ridge, looming distant in the summer haze. For two years they have yielded wine.

Up in Ashville, North Carolina, William A. V. Cecil has 220 acres of vines under cultivation and a winery in operation at his grandfather's historic Biltmore estate, selling the Chateaux Biltmore label to tourists And to 18 store accounts in North Carolina.

G. R. Ammerman, head of the department of food science and human nutrition at Mississippi State University at Starkville, said there were no commercial wineries in the region 10 years ago.

The new commercial efforts have not been, as Slick put it, "a lead-pipe cinch." He has had to battle record droughts, record rains, record freezes and the dry passions of local Southern Baptists, who approve of grapes but not fermenting them. Like Slick's grapes, the Biltmore vineyards were hurt by crippling freezes last winter, and many vineyards have failed because of weather, fungus, bacteria, public rejection or inadequate financing. There were five vineyards in

Florida a year ago, all of them new. Now there are two. But the fact of dozens of commercial vineyards across the South, and their attempt in the last five years to grow European vines, has made reality of an old American dream.

"One of the foremost authorities of his era on European wines was Thomas Jefferson," said Parks Redwine, a wine judge who established the first annual Southern Barrel Tasting at the At-lanta International Wine Festival last October. "At his home in Monticello, in Virginia, he attempted to grow the fine European vines. And every time, they would die."

Now, in Virginia, in the Carolinas, in north Georgia, northern Mississippi, even in Florida, Redwine said, "Vitis vinifera, the type of wine grape that all the fine wines of the world come from," is being grown.

Erin Kiney, of Stonepile Vineyard, checking grapes.

gether with a continuing effort to civilize the strong, sweet native grapes of the South, constitute the new viticulture of the region. It is being aided by research and training programs developed at the University of Florida and Missis-

sippi State University. Like the moonshine industry of earlier years, the new viticulture has roots in Prohibition. "The passing of the Prohibition law actually stimulated the growing of grapes in this country," said John A. Mortensen, a geneticist and professor of viticulture at the University of Florida During Prohibition, grapes ostensibly were sold as food, but "people were buying the grapes and mak-ing their stuff at home." Morten-

sen said. "This all happened in the 1920s, and it stimulated planting in Florida like mad," he said. But

vines with equal vigor, and like Jefferson's plantings they began

In 1933, the Florida grape growers' association lobbied the state legislature for money to allow the Watermelon Field Laboratory in Leesburg to research the problem. As the vineyards succumbed in the 1940s to disease and the effect of Prohibition's end, the laboratory began to develop the first disease-resistant

It produced several varieties in the 1960s and 1970s, vines that awaited the interest of those willing to risk planting them commercially. The Stover grape, named for the scientist who bred it at Leesburg in 1968, now flourishes among the French-American hybrids planted at LaFayette Vine-yard near Monticello, Florida. "It from an overturned truck: "I makes a darn good champagne,"

growing national appetite encouraged entrepreneurs to once again attempt to establish vineyards in the South, Mississippi State University began producing wine makers.

The enology laboratory there was established in the mid-1970s by a university vice president who liked wine and had an empty, chateau-like building on campus, Adams said. Its students are trained by Professor Richard P. Vine. who learned his art in the New York wine region.

One of his graduates, Russell Jones, works for Slick's Stonepile Vineyard producing vidals, char-donnays, savignon blanes and dry muscadines under the Habersham label. While Erin Keney, a Georgia college graduate, tends the vines and Jones worries about the cold, the wet, acidity and alkalinity, Slick worries about the Southern Baptists.

The Habersham County Commission, in a meeting room filled with protesting Baptists, refused to give him a license to ferment his grape juice into wine in the county. The two commissioners who voted against it were unfazed by the Biblical story of Jesus making wine from water.

"But that was pure wine," Commissioner Hebron Lovell insisted in a television interview about the vote. Of the wine Slick wanted to make, he said, "It's got a lot of alcohol it, and Jesus, ev-

erything he done was perfect."
The Clarkesville city fathers turned Slick down, too, one of them declaring: "I don't know why Jesus did that. It's been an embarrassment to me all my life." Finally, Slick found a refuge for his winery in the town of Bal-

dwin. From there he continues the economic fight for survival. For the Southern wine industry, it appears that where there is a will, there is a way. As one moonshiner in northern Georgia told Dobbins last fall, after be advised that the weather was turning too chill to allow him to ferment the grapes he had gotten don't give a damn. If it don't

American wine consumption has quadrupled over the last 12 or 15 years, Adams said, and as the

cranic vice-presidential candidate, Surgent Shriver, and his wife, the former Ennice Kennedy, the stain president's sister. Simon le Bon, 26, lead singer of the British band Duran Duran, sad five crewmen huddled in an air pocket in the hull of his yacht for 4. turned in gales off Falmouth, England. They were freed by a diver.

> The Italian tenor Luciano Pararotti, the Greek mezzo-soprano Ag-nes Baitsa and the Spanish tenor José Carreras plan to participate in a charity concert for African lamine victims Aug. 18 in Verona, Italy. A publicist, Don Percival, said the show would feature the actors Burt Lancaster and Claristopher Lee as announcers. Meanwhile, organizers of last month's Live Aid rock concert announced plans for a weeklong benefit sports festival next May in Birmingham, England.
